The Colosseum Keith Hopkins And Mary Beard

The Colosseum Keith Hopkins, Mary Beard, 2011-04-14 The Colosseum was Imperial Rome's monument to warfare. Like a cathedral of death, it towered over the city and invited its citizens, 50,000 at a time, to watch murderous gladiatorial games. It is now visited by two million visitors a year. Hitler was among them. Award-winning classicist Mary Beard with Keith Hopkins tell the story of Rome's greatest arena: how it was built, the gladiatorial and other games that were held there, the training of the gladiators, the audiences who revelled in the games, the emperors who staged them, and the critics. And the strange after-story: the Colosseum has been fortress, store, church, and glue factory.

The Colosseum Keith Hopkins, Mary Beard, 2012-06-01 Byron and Hitler were equally entranced by Rome's most famous monument, the Colosseum. Mid-Victorians admired the hundreds of varieties of flowers in its crannies and occasionally shuddered at its reputation for contagion, danger, and sexual temptation. Today it is the highlight of a tour of Italy for more than three million visitors a year, a concert arena for the likes of Paul McCartney, and a national symbol of opposition to the death penalty. Its ancient history is chock full of romantic but erroneous myths. There is no evidence that any gladiator ever said "Hail Caesar, those about to die and we know of not one single Christian martyr who met his finish here." Yet the reality is much stranger than the legend, as the authors, two prominent classical historians, explain in this absorbing account. We learn the details of how the arena was built and at what cost; we are introduced to the emperors who sometimes fought in gladiatorial games staged at the Colosseum and we take measure of the audience who revelled in or opposed these games. The authors also trace the strange afterlife of the monument as fortress, shrine of martyrs, church, and glue factory. Why are we so fascinated with this arena of death?

home to the most violent and deadly spectator sports in history and the making of many gladiator heroes Using state of the art computer graphics Colosseum brings the world of Ancient Rome to life and shows how and why this most extraordinary of human monuments was built New research debunks the myths perpetuated in the film Gladiator and helps us understand the nature of these games why the chariot races of Gladiator could not have happened within the Colosseum walls for instance Here for the first time new evidence reveals exactly how the Colosseum was regularly flooded with water for the spectacle of deadly sea battles

BOOK JACKET *The Circus Maximus and the Colosseum* Charles River Charles River Editors,2018-02-05 Includes pictures Includes ancient accounts Includes online resources and a bibliography for further reading The ambitious and fearless emperors that built the legendary Roman Empire from scratch the broad shouldered and bronzed gladiators with their iconic plume helmets and glinting swords and elaborate parties attended by toga wearing Romans fueled by alcohol violence orgies and other godless acts all paint a picture of Roman life At the Circus Maximus the guttural cheers of the spectators reverberated across the enormous open space but their cries could hardly be heard over the rumble of the ground On the ellipse shaped track 5 charioteers would skew their bodies and steer their magnificent vehicles around the curves Gusts of sand and dirt flew up from the whizzing wheels and encircled the pounding hooves of the stunning stallions Distracted personnel and guards dragging their feet were considered fair game As one chariot careened to the side preparing to collide with another chariot a row of guards might have to try to duck out of the way in the nick of time Some would be trampled by hooves Chariot races were dangerous for participants too A charioteer could become disoriented and fail to position himself as his horses moved instinctively sending his body catapulting forward out of the chariot Needless to say chariot racing in Rome was a nail biting spectacle When the Colosseum was built in the late 1st century A D the Romans a people known for their architectural acumen managed to amaze themselves Martial a Roman poet writing during the inauguration of the Colosseum clearly believed the Colosseum was so grand a monument that it was even greater than the

other Wonders of the Ancient World which had been written about and visited endlessly by the Romans and Greeks in antiquity. Indeed, although the Wonders were wondrous to behold, the Colosseum was a spectacular achievement in architecture, something new and innovative and therefore an amazing Wonder in its own way. The Colosseum was designed to be both a symbol and show of strength by the famous Flavian emperors, most notably Vespasian and his sons Titus and Domitian. Vespasian had started the construction of the Colosseum shortly after becoming emperor in 69 A.D. but he died before he could present any spectacles in his giant amphitheatre. That honor went to his son Titus who celebrated the inaugural opening in 80 A.D. with 100 days of games despite the fact that the Colosseum was not completely finished. When his brother Domitian came to power in 81 A.D. he finished the amphitheatre but not without making some changes to the overall design. By the time it was truly finished, the Colosseum stood about 150 feet tall with the oval in the center stretching nearly two football fields long and over 500 feet across. The Colosseum is a large stadium even by today's standards and its great size conveys the power of the empire as it dominates the landscape and towers over nearby buildings. Nearly 2,000 years later, the Colosseum still amazes millions of people who come to visit it and when asked to visualize a monument that represents the Roman Empire, many conjure up an image of the large amphitheater. As Keith Hopkins and Mary Beard put it, the Colosseum is the most famous and instantly recognizable monument to have survived from the classical world. At the same time, the Colosseum also represents the Roman games and spectacles, particularly the gladiatorial combats that so many people today find both abhorrent yet fascinating. Given its massive size and the architectural ingenuity involved, the Colosseum played host to all sorts of games, including massive hunts of exotic animals and even sea battles. *Pompeii* Mary Beard, 2010-07-09 WINNER OF THE WOLFSON HISTORY PRIZE 2008. The world's most controversial classicist debunks our movie-style myths about the Roman town with meticulous scholarship and propulsive energy. Laura Silverman Daily Mail. The ruins of Pompeii, buried by an explosion of Vesuvius in 79 CE, offer the best evidence we have of everyday life in the Roman empire. This remarkable book rises to the challenge of making sense of those remains as well as exploding many myths: the very date of the eruption probably a few months later than usually thought; or the hygiene of the baths which must have been hotbeds of germs; or the legendary number of brothels, most likely only one; or the massive death count, maybe less than ten per cent of the population. An extraordinary and involving portrait of an ancient town, its life and its continuing re-discovery by Britain's favourite classicist. The Roman Colosseum Fiona Macdonald, 2010. Inside the enormous, boldly designed Roman Colosseum, gladiators fought for their lives as citizens watched the deadly entertainment. Completed in 96 AD, it's a miraculous feat of engineering. This noble monument and the ancient empire that created it await young readers on these stunningly illustrated pages. Curious children can discover why and how the Colosseum was built, how it was decorated, who was allowed to enter, what took place behind the scenes, and what the Roman world was like. Full-color cutaways reveal the details of this astounding architectural achievement, and pinpoint enlargements focus on the day-to-day life of the people.

A Monument to Dynasty and Death Nathan T. Elkins, 2019-09-03 Go behind the scenes to discover why the Colosseum was the king of amphitheaters in the Roman world a paragon of Roman engineering prowess Early one morning in 80 CE the Colosseum roared to life with the deafening cheers of tens of thousands of spectators as the emperor Titus inaugurated the new amphitheater with one hundred days of bloody spectacles These games were much anticipated for the new amphitheater had been under construction for a decade Home to spectacles involving exotic beasts elaborate executions of criminals gladiatorial combats and even when flooded small scale naval battles the building itself was also a marvel Rising to a height of approximately 15 stories and occupying an area of 6 acres more than four times the size of a modern football field the Colosseum was the largest of all amphitheaters in the Roman Empire In *A Monument to Dynasty and Death* Nathan T Elkins tells the story of the Colosseum s construction under Vespasian its dedication under Titus and further enhancements added under Domitian The Colosseum Elkins argues was far more than a lavish entertainment venue it was an ideologically charged monument to the new dynasty its aspirations and its achievements *A Monument to Dynasty and Death* takes readers on a behind the scenes tour of the Colosseum from the subterranean tunnels where elevators and cages transported gladiators and animals to the blood soaked arena floor to the imperial viewing box to the amphitheater s decoration and amenities such as fountains and an awning to shade spectators Trained as an archaeologist an art historian and a historian of ancient Rome Elkins deploys an interdisciplinary approach that draws on contemporary historical texts inscriptions archaeology and visual evidence to convey the layered ideological messages communicated by the Colosseum This engaging book is an excellent resource for classes on Roman art architecture history civilization and sport and spectacle
