Phase Separation Coupled with Damage Processes Christian Heinemann,Christiane Kraus,2014-03-24 The authors explore a unifying model which couples phase separation and damage processes in a system of partial differential equations The model has technological applications to solder materials where interactions of both phenomena have been observed and cannot be neglected for a realistic description The equations are derived in a thermodynamically consistent framework and suitable weak formulations for various types of this coupled system are presented In the main part existence of weak solutions is proven and degenerate limits are investigated

Using the Engineering Literature Bonnie A. Osif,2006-08-23 The field of engineering is becoming increasingly interdisciplinary and there is an ever growing need for engineers to investigate engineering and scientific resources outside their own area of expertise However studies have shown that quality information finding skills often tend to be lacking in the engineering profession Using the Engineerin

Constitutive Equations for Polymer Melts and Solutions Ronald G. Larson, 2013-10-22 *Constitutive Equations for Polymer Melts and Solutions* presents a description of important constitutive equations for stress and birefringence in polymer melts as well as in dilute and concentrated solutions of flexible and rigid polymers and in liquid crystalline materials The book serves as an introduction and guide to constitutive equations and to molecular and phenomenological theories of polymer motion and flow The chapters in the text discuss topics on the flow phenomena commonly associated with viscoelasticity fundamental elementary models for understanding the rheology of melts solutions of flexible polymers and advanced constitutive equations melts and concentrated solutions of flexible polymer and the rheological properties of real liquid crystal polymers Chemical engineers and physicists will find the text very useful
