*Introduction to Statistical Theory Jun 15 2024*

*The SAGE Handbook of Personality Theory and Assessment Jul 04 2023 This Handbook of Personality Theory and Assessment 2-Volume Set constitutes an essential resource for shaping the future of the scientific foundation of personality research, measurement, and practice. It reviews the major contemporary personality models (Volume 1) and associated psychometric measurement instruments (Volume 2) that underpin the scientific study of this important area of psychology. With contributions from internationally renowned academics, this work will be an important reference work for a host of researchers and practitioners in the fields of individual differences and personality assessment, clinical psychology, educational psychology, work and organizational psychology, health psychology and other applied fields as well. Volume 1: Personality Theories and Models. Deals with the major theoretical models underlying personality instruments and covers the following broad topics, listed by section heading: " Explanatory Models For Personality " Comprehensive Trait Models " Key Traits: Psychobiology " Key Traits: Self-Regulation And Stress " New Trait And Dynamic Trait Constructs " Applications*

*The Semantic Conception of Logic Nov 15 2021 This collection of new essays presents cutting-edge research on the semantic conception of logic, the invariance criteria of logicity, grammaticality, and logical truth. Contributors explore the history of the semantic tradition, starting with Tarski, and its historical applications, while central criticisms of the tradition, and especially the use of invariance criteria to explain logicity, are revisited by the original participants in that debate. Other essays discuss more recent criticism of the approach, and researchers from mathematics and linguistics weigh in on the role of the semantic tradition in their disciplines. This book will be invaluable to philosophers and logicians alike.*

*Strong Shape and Homology Jun 22 2022 Shape theory, an extension of homotopy theory from the realm of CW-complexes to arbitrary spaces, was introduced by Borsuk 30 years ago and Mardesic contributed greatly to it. One expert says: "If we need a book in the field, this is it! It is thorough, careful and complete."*

*An Introduction to Systems Psychodynamics Aug 05 2023 This book provides an introduction to systems psychodynamic theory and its application to organisational consultancy, research and training, outlining systems dynamics methods and their historical and theoretical developments. Systems Psychodynamics is an emerging field of social science, the boundaries of which are continually being refined and re-defined. The 'systems' designation refers to open systems concepts that provide the*

framing perspective for understanding the structural aspects of organisational systems. These include its design, division of labour, levels of authority, and reporting relationships; the nature of work tasks, processes and activities; its mission and primary task; and the nature and patterning of the organisation's task and sentient boundaries and the transactions across them. This book presents a critical appraisal of the systems psychodynamics paradigm and its application to present-day social and organisational difficulties, showing how a holistic approach to organisational and social problems can offer a fresh perspective on difficult issues. Bringing together the theory and practice of systems psychodynamics for the first time, this book provides an examination of the systems psychodynamics paradigm in action. This book gives an accessible and thorough guide to understanding and using systems psychodynamic ideas for analysts, managers, policy makers, consultants and researchers in a wide range of professional and clinical settings.

*Research Handbook on Behavioral Law and Economics* Jul 24 2022 The field of behavioral economics has contributed greatly to our understanding of human decision making by refining neoclassical assumptions and developing models that account for psychological, cognitive, and emotional forces. The field's insights have important implications for law. This Research Handbook offers a variety of perspectives from renowned experts on a wide-ranging set of topics including punishment, finance, tort law, happiness, and the application of experimental literatures to law. It also includes analyses of conceptual foundations, cautions, limitations and proposals for ways forward.

*Image Understanding Workshop* May 22 2022 "The main theme of the 1988 workshop, the 18th in this DARPA sponsored series of meetings on Image Understanding and Computer Vision, is to cover new vision techniques in prototype vision systems for manufacturing, navigation, cartography, and photointerpretation." P. v.

*Philosophy of Mathematics* Jul 12 2021 Shapiro argues that both realist and anti-realist accounts of mathematics are problematic. To resolve this dilemma, he articulates a "structuralist" approach, arguing that the subject matter of a mathematical theory is not a fixed domain of numbers that exist independent of each other, but rather is the natural structure, the pattern common to any system of objects that has an initial object and successor relation satisfying the induction principle.

Godan Dec 29 2022

*A Theory of Musical Narrative* Aug 13 2021 Byron Almén proposes an original synthesis of approaches to musical narrative from literary criticism, semiotics, historiography, musicology, and music theory, resulting in a significant critical reorientation of the field. This volume includes an extensive survey of traditional approaches to musical narrative illustrated by a wide variety of musical examples that highlight the range and applicability of the theoretical apparatus. Almén provides a careful delineation of the essential elements and preconditions of musical narrative organization, an eclectic analytical model applicable to a wide range of musical styles and repertoires, a classification scheme of narrative types and subtypes reflecting conceptually distinct narrative strategies, a wide array of interpretive categories, and a sensitivity to the dependence of narrative interpretation on the cultural milieu of the work, its various audiences, and the analyst. *A Theory of Musical Narrative* provides both an excellent introduction to an increasingly important conceptual domain and a complex reassessment of its possibilities and characteristics.

*Punishment & Sentencing* Jan 10 2024 First published in 2001. Routledge is an imprint of Taylor & Francis, an informa company.

*Reflections on the Liar* Sep 06 2023 In recent years there have been a number of books-both anthologies and monographs-that have focused on the Liar Paradox and, more generally, on the semantic paradoxes, either offering proposed treatments to those paradoxes or critically evaluating ones that occupy logical space. At the same time, there are a number of people who do great work in philosophy, who have various semantic, logical, metaphysical and/or epistemological commitments that suggest that they should say something about the Liar Paradox, yet who have said very little, if anything, about that paradox or about the extant projects involving it. The purpose of this volume is to afford those philosophers the opportunity to address what might be described as reflections on the Liar.

*The Routledge Handbook of Stylistics* Dec 17 2021 *The Routledge Handbook of Stylistics* provides a comprehensive introduction and reference point to key areas in the field of stylistics. The four sections of the volume encompass a wide range of approaches from classical rhetoric to cognitive neuroscience and cover core issues that include: historical perspectives centring on rhetoric, formalism and functionalism the elements of stylistic analysis that include the linguistic levels of foregrounding, relevance theory, conversation analysis, narrative, metaphor, speech acts, speech and thought presentation and point of view current areas of 'hot topic' research, such as cognitive poetics, corpus stylistics and feminist/critical stylistics emerging and future trends including the stylistics of multimodality, creative writing, hypertext fiction and neuroscience Each of the thirty-two chapters provides: an introduction to the subject; an overview of the history of the topic; an analysis of the main current and critical issues; a section with recommendations for practice, and a discussion of possible future trajectory of the subject. This handbook includes chapters written by some of the leading stylistics scholars in the world today, including Jean Boase-Beier, Joe Bray, Michael Burke, Beatrix Busse, Ronald Carter, Billy Clark, Barbara Dancygier, Catherine Emmott, Charles Forceville, Margaret Freeman, Christiana Gregoriou, Geoff Hall, Patrick Colm Hogan, Lesley Jeffries, Marina Lambrou, Michaela Mahlberg, Rocio Montoro, Nina Nørgaard, Dan Shen, Michael Toolan and Sonia Zyngier. *The Routledge Handbook of Stylistics* is essential reading for researchers, postgraduates and undergraduate students working in this area.

*Shape Theory* Jun 03 2023 *North-Holland Mathematical Library, Volume 26: Shape Theory: The Inverse System Approach* presents a systematic introduction to shape theory by providing background materials, motivation, and examples, including shape theory and invariants, pro-groups, shape fibrations, and metric compacta. The publication first ponders on the foundations of shape theory and shape invariants. Discussions focus on the stability and movability of spaces, homotopy and homology pro-groups, shape dimension, inverse limits and shape of compacta, topological shape, and absolute neighborhood retracts. The text then takes a look at a survey of selected topics, including basic topological constructions and shape, shape dimension of metric compacta, complement theorems of shape theory, shape fibrations, and cell-like maps. The text ponders on polyhedra and Borsuk's approach to shape. Topics include shape category of metric compacta and metric pairs, homotopy type of polyhedra, and topology of simplicial complexes. The publication is a valuable source of data for researchers interested in the inverse system approach.

*Theory of Prose* Apr 01 2023 "Viktor Shklovsky's 1925 book *Theory of Prose* might have become the most important work of literary criticism in the twentieth century had not two obstacles barred its way: the crackdown by the Soviet dictatorship on Shklovsky and other Russian Formalists in the 1930s, and the unavailability of an English translation. Now translated in its entirety for the first time, *Theory of Prose* not only anticipates structuralism and post-structuralism, but poses questions about the nature of fiction that are as provocative today as they were in the 1920s. Arguing that writers structure their material according to artistic principles rather than from attempts to imitate "reality," Shklovsky uses Cervantes, Tolstoi, Sterne, Dickens, Bely, and Rozanov to give us a new way of thinking about fiction and, in his most impassioned moments, about the world. Benjamin Sher's lucid translation will allow Shklovsky's *Theory of Prose* to fulfill its destiny as a major theoretical work of the twentieth century." from back cover.

*Criminal Law in the Age of the Administrative State* Feb 16 2022 What is the criminal law for? One influential answer is that the criminal law vindicates pre-political rights and condemns wrongdoing. On this account, the criminal law has an intrinsic subject matter-certain types of moral wrongdoing-and it provides a distinctive response to that wrongdoing, namely condemnatory punishment. In *Criminal Law in the Age of the Administrative State*, Vincent Chiao offers an alternative, public law account. What the criminal law is for, Chiao suggests, is sustaining social cooperation with public institutions. Consequently, we only have reason to support the use of the criminal law insofar as its use is consistent with our reasons for valuing the social order established by those institutions. By starting with the political morality of public institutions rather than the interpersonal morality of private relationships,

*this account shows how the criminal law is continuous with the modern administrative and welfare state, and why it is answerable to the same political virtues. Chiao sketches a democratic egalitarian account of those virtues, one that is loosely consequentialist, egalitarian but not equalizing, and centered on a form of freedom-effective access to central capabilities-as its currency of evaluation. From this point of view, the role of the criminal law is to help public institutions create a society in which each person can lead a life as a peer among peers. Chiao shows how a democratic egalitarian approach to criminal justice provides a fresh perspective on a range of contemporary problems, from mass incarceration to overcriminalization, due process and the collateral consequences of a criminal conviction.*

*In Praise of Blame Mar 08 2021 Blame is an unpopular & neglected notion that goes against the grain of a therapeutically-orientated culture & has received relatively little philosophical attention. George Sher discusses questions about the nature, normative status & the relation to character of blame, arguing that it is inseparable from morality itself.*

*Responsibility Collapses Dec 09 2023 Our worldview assumes that people are morally responsible. Our emotions, beliefs, and values assume that a person is responsible for what she thinks and does, and that this is a good thing. This book argues that this worldview is false. It provides four arguments for this conclusion that build on the free will and responsibility literatures in original and insightful ways: Foundation: No one is responsible because there is no foundation for responsibility. A foundation for responsibility is something for which a person is responsible but not by being responsible for something else Epistemic Condition: No one is responsible because no one fulfills the epistemic condition necessary for blameworthiness Internalism: If a person were responsible, then she would be responsible for, and only for, what goes on in her head. Most of the evidence for responsibility says the opposite Amount: No one is responsible because we cannot make sense of what makes a person more or less praiseworthy (or blameworthy) There is no other book that argues against moral responsibility based on foundationalism, the epistemic condition, and internalism and shows that these arguments cohere. The book's arguments for internalism and quantifying responsibility are new to the literature. Ultimately, the book's conclusions undermine our commonsense view of the world and the most common philosophical understanding of God, morality, and relationships. Responsibility Collapses: Why Moral Responsibility Is Impossible is essential reading for scholars and advanced students in philosophy, religious studies, and political science who are interested in debates about agency, free will, and moral responsibility.*

*Desert, Retribution, and Torture Sep 13 2021 In general, there are two ways in which punishment is justified. Forward-looking justifications look to the good results that punishment brings about and that therefore occur after it. These results include the wrongdoer being deterred, incapacitated, or improved, as well as the deterrence of would-be wrongdoers, a decrease in costs associated with crime prevention, less fear in the community, and the promotion of hatred and disgust for actions that victimize others. In contrast, backward-looking justifications look to events that occurred before the punishment. On this approach, punishment is not justified via the good results that it brings about. The dominant backward-looking justification is retributivism. According to it, the wrongdoer in virtue of his past act deserves punishment and this desert justifies punishment. This book is an in-depth defense of retributivism. Since punitive desert lies at the heart of retributivism, it is important to provide an analysis of it. This is the focus of the first part of the book. I argue that punitive desert has to do with punishment being an intrinsically valuable event, where its value results from its standing in a certain relation to a person's having culpably performed a wrongdoing. I argue that this type of desert does not by itself contain moral duties to act in any way. In particular, it does not impose on someone the duty to punish a wrongdoer. This results in retributivism being more complex than the traditional accounts, since it must therefore involve duties that refer to but are not constituted by punitive desert. I also argue that punitive desert is independent of the wrongdoer's moral character and instead rests solely on a person's acts. Lastly, I argue that the value of punitive desert cannot be accounted for via more fundamental moral considerations. This results in punitive desert being a rather primitive moral notion in that it is not justified via more fundamental moral values. Like other intrinsically good things, e.g.*

friendship, and other intrinsically bad things, e.g. promise-breaking, punitive desert can be used to explain why certain states of affairs are both good and right.--Adapted from introduction.

*Ethics: Essential Readings in Moral Theory* Apr 13 2024 *Ethics: Essential Readings in Moral Theory* is an outstanding anthology of the most important topics, theories and debates in ethics, compiled by one of the leading experts in the field. It includes sixty-six extracts covering the central domains of ethics: why be moral? the meaning of moral language morality and objectivity consequentialism deontology virtue and character value and well-being moral psychology applications: including abortion, famine relief and consent. Included are both classical extracts from Plato, Aristotle, Hume, Kant and Mill, as well as contemporary classics from philosophers such as Thomas Nagel, Thomas Scanlon, Martha Nussbaum, Derek Parfit, and Peter Singer. A key feature of the anthology is that it covers the perennial topics in ethics as well as very recent ones, such as moral psychology, responsibility and experimental philosophy. Each section is introduced and placed in context by the editor, making this an ideal anthology for anyone studying ethics or ethical theory.

*Unifying the Philosophy of Truth* Apr 20 2022 This anthology of the very latest research on truth features the work of recognized luminaries in the field, put together following a rigorous refereeing process. Along with an introduction outlining the central issues in the field, it provides a unique and unrivaled view of contemporary work on the nature of truth, with papers selected from key conferences in 2011 such as *Truth Be Told* (Amsterdam), *Truth at Work* (Paris), *Paradoxes of Truth and Denotation* (Barcelona) and *Axiomatic Theories of Truth* (Oxford). Studying the nature of the concept of 'truth' has always been a core role of philosophy, but recent years have been a boom time in the topic. With a wealth of recent conferences examining the subject from various angles, this collection of essays recognizes the pressing need for a volume that brings scholars up to date on the arguments. Offering academics and graduate students alike a much-needed repository of today's cutting-edge work in this vital topic of philosophy, the volume is required reading for anyone needing to keep abreast of developments, and is certain to act as a catalyst for further innovation and research.

*Critical Social Theory in the Interests of Black Folks* Feb 28 2023 Examining the situations of African Americans in the U.S.A., Lucius Outlaw's essays illustrate over twenty years of work dedicated to articulating a 'critical theory of society' that would account for issues and limiting-factors affecting African-descended peoples in the U.S. Attempting to put politics aside, Outlaw writes from a non-partisan standpoint, in the hopes that the issues he raises in his essays will inspire improvement for the well-being of African Americans and will also strengthen America's democracy. Outlaw envisions a democratic order that is not built upon racist projections of the past. Instead, he seeks in these essays a transformative social theory that would help create a truly democratic social order.

*Reasonable Responses* Oct 15 2021 This tribute to the breadth and influence of Trudy Govier's philosophical work begins with her early scholarship in argumentation theory, paying special attention its pedagogical expression. Most people first encounter Trudy Govier's work and many people only encounter it through her textbooks, especially *A Practical Study of Argument*, published in many editions. In addition to the work on argumentation that has continued throughout her career, much of Govier's later work addresses social philosophy and the problems of trust and response to moral wrongs. The introduction by Catherine Hundleby situates Govier's research along the path of her unusual academic life. While following the timeline of Govier's research publication, in this collection the authors build on her work and suggest certain new connections between her argumentation theory and social philosophy. *A Practical Study of Argument*, first published in 1985, situates Govier among a distinct segment of informal logicians whose concerns about teaching reasoning to post-secondary students orient their research, Takuzo Konishi argues. Moira Kloster evaluates Govier's progress in the challenge of providing critical thinking education to diverse and changing social contexts. Shifting gears to social philosophy but still addressing education, Laura Elizabeth Pinto explores the significance of Govier's work on trust for explaining the problem of "audit culture" for teaching. At the centre of this volume, social philosophy receives an abstract meta-ethical defense from Linda Radzik. Moving solidly into the domain of normative social philosophy, Alice MacLachlan reconsiders Govier's condemnation

of revenge by viewing it as a form of moral address, but she notes how revenge as an act of communication contrasts with argumentation in lacking the respect that Govier maintains is intrinsic to argumentation. MacLachlan ultimately agrees that revenge is morally indefensible. The practical challenges of addressing others in the aftermath of wrongdoing, especially in public contexts, can make it difficult to distinguish between victims and combatants or wrongdoers, Alistair Little and Wilhelm Verwoerd explain, and Kathryn Norlock argues that forgiveness is psychologically vexed too. People may recognize transformation to be in principle possible for all people, Norlock argues, and yet we may find the evidence regarding some particular evildoer sufficient to count that person as an exception. Finally Govier responds to the various papers.

*Philosophy and Model Theory* Nov 08 2023 Model theory is an important area of mathematical logic which has deep philosophical roots, many philosophical applications, and great philosophical interest in itself. The aim of this book is to introduce, organise, survey, and develop these connections between philosophy and model theory, for the benefit of philosophers and logicians alike.

*A Companion to Philosophical Logic* Nov 27 2022 This collection of newly commissioned essays by international contributors offers a representative overview of the most important developments in contemporary philosophical logic. Presents controversies in philosophical implications and applications of formal symbolic logic. Surveys major trends and offers original insights.

*Superstring Theory* Jan 18 2022 The twenty-fifth anniversary edition featuring a new Preface, invaluable for graduate students and researchers in high energy physics and astrophysics.

*Driving With Care: Education and Treatment of the Impaired Driving Offender-Strategies for Responsible Living* Apr 08 2021 This is a three-level education and treatment program for persons convicted of driving while impaired (DWI). Clients learn that change in behavior is made by changing their thoughts, attitudes and beliefs. The book presents a comprehensive overview of cognitive behavioral treatment for impaired driving offenders; a thorough review theory and practice related to client evaluation; legal and cultural considerations; as well as operational procedures for assessing and matching DWI offenders to appropriate levels of education and treatment services. Guidelines are provided for developing individualized treatment plans, and implementing appropriate education and treatment curriculum protocol whereby clients relate and apply the lesson and session material to their own unique circumstances and situations.

*A Theory of Justice for Animals* Oct 27 2022 At the same time, he argues that humans have a greater interest in life and liberty than most species of nonhuman animals.

*Social Theory and Practice* May 10 2021

*Epistemic Friction* Feb 04 2021 Gila Sher offers an original view of knowledge from the perspective of our basic human epistemic situation, as limited yet resourceful beings, trying to understand the world in all its complexity. She develops an integrated theory of knowledge, truth, and logic, centred on the idea of epistemic friction: knowledge must be constrained by the world.

*Levinas and Analytic Philosophy* Oct 07 2023 This volume examines the relevance of Emmanuel Levinas's work to recent developments in analytic philosophy. Contemporary analytic philosophers working in metaethics, the philosophy of mind, and the metaphysics of personal identity have argued for views similar to those espoused by Levinas. Often disparately pursued, Levinas's account of "ethics as first philosophy" affords a way of connecting these respective enterprises and showing how moral normativity enters into the structure of rationality and personal identity. In metaethics, the volume shows how Levinas's moral phenomenology relates to recent work on the normativity of rationality and intentionality, and how it can illuminate a wide range of moral concepts including accountability, moral intuition, respect, conscience, attention, blame, indignity, shame, hatred, dependence, gratitude and guilt. The volume also tests Levinas's innovative claim that ethical relations provide a way of accounting for the irreducibility of personal identity to psychological identity. The essays here contribute to ongoing discussions about the metaphysical significance and sustainability of a naturalistic but nonreductive account of personhood. Finally, the volume connects Levinas's second-person standpoint with analogous developments in moral philosophy.

*Children of Alcoholics* Mar 12 2024 This study offers a comprehensive, critical look at what is known and not known about children of alcoholics, and also constructs a model for assessing existing theory and introducing new methodological rigor into this field.

*Theory of Addiction* Aug 25 2022 The word 'addiction' these days is used to refer to a chronic condition where there is an unhealthily powerful motivation to engage in a particular behaviour. This can be driven by many different factors – physiological, psychological, environmental and social. If we say that it is all about X, we miss V, W, Y and Z. So, some people think addicts are using drugs to escape from unhappy lives, feelings of anxiety and so on; many are. Some people think drugs become addictive because they alter the brain chemistry to create powerful urges; that is often true. Others think that drug taking is about seeking after pleasure; often it is. Some take the view that addiction is a choice – addicts weigh up the pros and cons of doing what they do and decide the former outweigh the latter. Yet others believe that addicts suffer from poor impulse control; that is often true... And so it goes on. When you look at the evidence, you see that all these positions capture important aspects of the problem – but they are not complete explanations. Neuroscience can help us delve more deeply into some of these explanations, while the behavioural and social sciences are better at exploring others. We need a model that puts all this together in a way that can help us decide what to do in different cases. Should we prescribe a drug, give the person some 'tender loving care', put them in prison or what? *Theory of Addiction* provides this synthesis. The first edition was well received: 'Throughout the book the reader is exposed to a vast number of useful observations...The theoretical aims are timely, refreshing, ambitious and above all challenging. It opens up a new way of looking at addiction and has the potential to move the field of addiction a considerable leap forward. Thus we wholeheartedly would like to recommend the book for students as well as scholars. Read and learn!' *Nordic Studies on Alcohol and Drugs* 'The book provides a comprehensive review of existing theories - over 30 in all - and this synthesis of theories constitutes an important contribution in and of itself... West is to be commended for his synthesis of addiction theories that span neurobiology, psychology and social science and for his insights into what remains unexplained.' *Addiction* This new edition of *Theory of Addiction* builds on the first, including additional theories in the field, a more developed specification of PRIME theory and analysis of the expanding evidence base. With this important new information, *Theory of Addiction* will continue to be essential reading for all those working in addiction, from student to experienced practitioner – as urged above, Read and learn!

*The Jazz Theory Book* Feb 11 2024 The most highly-acclaimed jazz theory book ever published! Over 500 pages of comprehensive, but easy to understand text covering every aspect of how jazz is constructed---chord construction, II-V-I progressions, scale theory, chord/scale relationships, the blues, reharmonization, and much more. A required text in universities world-wide, translated into five languages, endorsed by Jamey Aebersold, James Moody, Dave Liebman, etc.

*Forgiveness and Retribution* Mar 20 2022 *Forgiveness and Retribution: Responding to Wrongdoing* argues that ultimately, forgiveness is always the appropriate response to wrongdoing. In recent decades, many philosophers have claimed that unless certain conditions are met, we should resent those who have wronged us personally and that criminal offenders deserve to be punished. Conversely, Margaret Holmgren posits that we should forgive those who have ill-treated us, but only after working through a process of addressing the wrong. Holmgren then reflects on the kinds of laws and social practices a properly forgiving society would adopt.

*Introduction to Statistical Theory* May 14 2024 Basic principles; Estimation; Testing hypotheses; Linear models - estimation; Linear models - testing; Nonparametric methods.

*Approximate Justice* May 02 2023 In this book, distinguished philosopher George Sher explores the normative moral and social problems that arise from living in a decidedly non-ideal world\_a world that contains immorality, evil, and injustice, and in which resources (including knowledge) are often inadequate. Sher confronts difficult issues surrounding preferential treatment and equal opportunity, compensatory justice and punishment, the allocation of goods by lottery, and abortion and moral compromise. In each case, Sher asks not what an ideal society would involve, but how we should deal

with failures to live up to individual or social ideals. Challenging current academic orthodoxy, Sher's work is sure to incite discussion among students and scholars alike. *Approximate Justice* is an engaging and provocative book that will excite anyone with interest in social and political philosophy, justice, and law.

*Moral Desert* Jan 30 2023 In *Moral Desert*, Howard Simmons notes that the idea that we deserve to be praised or rewarded for good behavior and blamed or punished when we act badly seems central to everyone's moral deliberation and practices. Simmons subjects this assumption to critical scrutiny. He argues that in a wide range of cases it is almost impossible to know the extent of people's moral responsibility, and indeed that it may be a complete delusion. He attacks the still-popular theory of retributive punishment, with special reference to the views of Peter French and J. Angelo Corlett. Simmons does not conclude that punishment is always unjustified, but insists that any justification should relate to its real world consequences. State punishment should be inflicted according to strict consequentialist precepts, and the author provides systematic principles for determining an appropriate sentence and for deciding when offenders should be excused. He also considers the implications of his views for distributive justice and personal morality.

*Truth: A Contemporary Reader* Sep 25 2022 For the first time *Truth: A Contemporary Reader* brings together essays that have shaped two aspects of a fundamental philosophical topic: the nature of truth and the value of truth. Featuring 22 essays, this up-to-date reader includes seminal work by leading figures in contemporary analytic philosophy. It charts the development of the central 'grand proposals' about the nature of truth, and subsequently how their influence gradually diminished in face of new theories developed in the 20th and 21st-centuries. The reader also demonstrates how truth is often taken to be valuable in various ways, in particular as the norm of correctness for belief and assertion, and the relationship between truth and other epistemic values. With introductory overviews to each group of related papers complemented by guides to further reading, this reader introduces the central debates, familiarizes students with the most important work in the field and covers pivotal theories of truth including: - correspondence theories - coherentism, pragmatism, verificationism - deflationary, primitivist, and pluralist theories Moreover, by showing how thoughts about truth and value bear heavily on one another, *Truth: A Contemporary Reader* provides new opportunities for understanding and advancing the link between these central topics. This is an essential collection for anyone studying or working in metaphysics, epistemology, and the philosophy of language today.

*The Misery of International Law* Jun 10 2021 Poverty, inequality, and dispossession accompany economic globalization. Bringing together three international law scholars, this book addresses how international law and its regimes of trade, investment, finance, as well as human rights, are implicated in the construction of misery, and how international law is producing, reproducing, and embedding injustice and narrowing the alternatives that might really serve humanity. Adopting a pluralist approach, the authors confront the unconscionable dimensions of the global economic order, the false premises upon which they are built, and the role of international law in constituting and sustaining them. Combining insights from radical critiques, political philosophy, history, and critical development studies, the book explores the pathologies at work in international economic law today. International law must abide by the requirements of justice if it is to make a call for compliance with it, but this work claims it drastically fails do so. In a legal order structured around neoliberal ideologies rather than principles of justice, every state can and does grab what it can in the economic sphere on the basis of power and interest, legally so and under colour of law. This book examines how international law on trade and foreign investment and the law and norms on global finance has been shaped to benefit the rich and powerful at the expense of others. It studies how a set of principles, in the form of a New International Economic Order (NIEO), that could have laid the groundwork for a more inclusive international law without even disrupting its market-orientation, were nonetheless undermined. As for international human rights law, it is under the terms of global capitalism that human rights operate. Before we can understand how human rights can create more just societies, we must first expose the ways in which they reflect capitalist society and how they assist in reproducing the underlying terms of immiseration

that will continue to create the need for human rights protection. This book challenges conventional justifications of economic globalization and eschews false choices. It is not about whether one is "for" or "against" international trade, foreign investment, or global finance. The issue is to resolve how, if we are to engage in trade, investment, and finance, we do so in a manner that is accountable to persons whose lives are affected by international law. The deployment of human rights for their part must be considered against the ubiquity of neoliberal globalization under law, and not merely as a discrete, benevolent response to it.
