Strategic Procurement details
why procurement is critical to
successful business
performance. It explores the
strategic value of procurement
to business and the potential
for significant cost savings
through maximising value from
suppliers and third-party
spend. A lot has changed in the
world of strategic
procurement. While many
developments have served to
reinforce the business value of

good procurement practices, there are many risks associated with poor procurement. On the upside, procurement's role has increased in many recent mega-mergers. On the downside, there are glaring examples of supply continuity issues triggered by natural disasters; reputational issues related to supply chains of companies like BP and Apple; and the inadvertent role played by suppliers as the weakest link in cyber-crime. This second edition of Strategic Procurement has been thoroughly updated to reflect these developments. Besides real-life case studies, there is a new chapter on procurement's role in delivering successful mergers and acquisitions as well as three new chapters exploring the mitigants to a variety of supplier-related risks. Additionally, there are expanded sections on corporate responsibility, procurement proficiency, good procurement across the organisation, and new ways of supplier collaboration. Efficient planning and superior

execution against clear objectives is the way companies operate best. For many companies, the planning process is carefully orchestrated, objectives are set, budgets are negotiated, resources are allocated, and then it's up to the organization to execute. But what happens when the unexpected occurs? Say, an event occurs that throws the status quo into turmoil. What if your business declines by 40% in 1 month, what do you do? Conversely, what if your demand spikes by 50% in just a few months, what then? Suppose a natural disaster happens, or a new technology creates a significant, but unplanned opportunity? We call these events 'stretch opportunities'. This book will focus on strategic thinking and tactical examples of how best to prepare for such events. We will outline common themes across all such challenges. We will introduce three key management concepts: Flexibility, Agility and Real Options. We also include a

specific chapter on how to structure supply chains to capitalize on stretch opportunities and we provide specific tactical frameworks to build in agility, flexibility and real options into a supply chain. We will end with a checklist that managers can use to ensure that the right questions are asked in developing supply chains so that the ability to "surge" at profitable opportunities is nourished. Written primarily for directors and managers of food design and development, food scientists, technologists, and product developers, this book explains all the necessary information in order to help meet the increasing demands for innovation in an industry that is providing fewer resources. This updated edition, by a group of seasoned food industry business professionals and academics, provides a real-world perspective of what is occurring in the food industry right now, offers strategic frameworks for problem solving and R&D strategies,

and presents methods needed to accelerate and optimize new product development. Accelerating New Food Product Design and Development, Second Edition features five brand new chapters covering all the changes that have occurred within the last decade: A Flavor Supplier Perspective, An Ingredient Supplier Perspective, Applying Processes that Accelerate New Product Development, Looking at How the University Prepares Someone for a Career in Food, and Innovative Packaging and Its Impact on Accelerated Product Development. Offers new perspectives on what really goes on during the development process Includes updated chapters fully describing the changes that have occurred in the food industry, both from a developer's point of view as well as the consumer requirements Features a completely rewritten chapter covering the importance of packaging which is enhanced through 3D printing All of this

against the impact on speed to market Filled with unique viewpoints of the business from those who really know and a plethora of new information, Accelerating New Food Product Design and Development, Second Edition will be of great interest to all professionals engaged in new food product design and development. Discover never-before-told details of POW underground operations during the Vietnam War told through one airman's inspiring story of true love, honor, and courage. Air Force pilot Captain Carlyle "Smitty" Harris was shot down over Vietnam on April 4, 1965 and taken to the infamous Hoa Lo prison--nicknamed the "Hanoi Hilton." For the next eight years, Smitty and hundreds of other American POWs--including John McCain and George "Bud" Day--suffered torture, solitary confinement, and unimaginable abuse. It was there that Smitty covertly taught many other POWs the Tap Code--an old, long-unused method of communication from World

War II. Using the code, they could softly tap messages of encouragement to lonely neighbors and pass along resistance policies from their leaders. The code quickly became a lifeline during their internment. It helped the prisoners boost morale, stay unified, communicate the chain of command, and prevail over a brutal enemy. Meanwhile, back home in the United States, Harris's wife, Louise, raised their three children alone, unsure of her husband's fate for seven long years. One of the first POW wives of the Vietnam War, she became a role model for other military wives by advocating for herself and her children in her husband's absence. Told through both Smitty's and Louise's voices, Tap Code shares the riveting true story of: Ingenuity under pressure Strength and dignity in the face of a frightening enemy The hope, faith, and resolve necessary to endure even the darkest circumstances Praise for Tap Code: "Tap Code is an incredible story about two

American heroes. Col. "Smitty" Harris and his wife, Louise, epitomize the definition of commitment--to God, to country, and to family. This tale of extreme perseverance will restore your faith in the human spirit." --Brigadier General John Nichols, USAF "The incomprehensibly long ordeal of the Harris family is agonizing. Their love, faith, loyalty, and courage epitomize all that is good about America." --Lt. Col. Orson Swindle, USMC (ret.), POW, Hanoi, 11/11/1966 to 3/4/1973 This book provides new and seasoned users with step-by-step procedures on creating and modifying 3D models, working with cameras and lights, assigning materials to objects, rendering, and printing. Unlike many AutoCAD competitors, it uses both metric and imperial units to illustrate the myriad tools for this popular application. Use the companion CD to set up drawing exercises and projects and see all of the book's figures including color. AutoCAD 2018 3DModeling includes 50 "mini-workshops," that complete

small projects from concept through actual plotting. Solving all of the workshops will simulate the creation of full projects (architectural and mechanical) from beginning to end, without overlooking any of the basic commands and functions in AutoCAD 2018. Features: * Provides new and seasoned users with step-by-step procedures on creating and modifying 3D models in both metric and imperial units * CD can be used to set up in-text drawing exercises and projects and to see the book's figures in color eBook Customers: Companion files are available for downloading with order number/proof of purchase by writing to the publisher at info@merclearning.com. Nobel-Prize-winning economist Paul Krugman argues that business leaders need to understand the differences between economic policy on the national and international scale and business strategy on the organizational scale. Economists deal with the closed system of a national economy, whereas executives live in the open-system world of business. Moreover, economists know that an economy must be run on the basis of general principles, but businesspeople are forever in search of the particular brilliant strategy. Krugman's article serves to elucidate the world of economics for businesspeople who are so close to it and yet are continually frustrated by what they see. Going Down Fighting Ty Covington likes to keep things as uncomplicated as possible. By day, all that matters to him is his horse and winning in the rodeo ring. At night, all he wants is a deliciously hot, no-strings affair with his rival,

Kenzie Malone. Then everything changes in one heart-stopping split second. The accident should have killed both Ty and his horse. Instead, they're both on the road to a hard recovery—but only thanks to Kenzie's family connections and fortune. Which means he owes her. He owes a woman who is both everything he despises and his deepest desire. As need—hungry and demanding—takes them both over, Ty knows that this time, uncomplicated isn't an option. And this cowboy always pays his debts... In a merciless summer of biblical heat and destructive winds, Gabrielle Fox's main concern is a personal one: to rebuild her career as a psychologist after a shattering car accident. But when she is assigned Bethany Krall, one of the most dangerous teenagers in the country, she begins to fear she has made a terrible mistake. Raised on a diet of evangelistic hellfire, Bethany is violent, delusional, cruelly intuitive and insistent that she can foresee natural disasters - a claim

which Gabrielle interprets as a symptom of doomsday delusion. But when catastrophes begin to occur on the very dates Bethany has predicted, and a brilliant, gentle physicist enters the equation, the apocalyptic puzzle intensifies and the stakes multiply. Is the self-proclaimed Nostradamus of the psych ward the ultimate manipulator, or could she be the harbinger of imminent global cataclysm on a scale never seen before? And what can love mean in 'interesting times'? A haunting story of human passion and burning faith set against an adventure of tectonic proportions, *The Rapture* is an electrifying psychological thriller that explores the dark extremes of mankind's self-destruction in a world on the brink.
