Peters, Nhan T. Tran, Taghreed Adam, World Health Organization, 2013 Interest in implementation research is growing largely in recognition of the contribution it can make to maximizing the beneficial impact of health interventions As a relatively new and until recently rather neglected field within the health sector implementation research is something of an unknown quantity for many There is therefore a need for greater clarity about what exactly implementation research is and what it can offer This Guide is designed to provide that clarity Intended to support those conducting implementation research those with responsibility for implementing programs and those who have an interest in both the Guide provides an introduction to basic implementation research concepts and language briefly outlines what it involves and describes the many opportunities that it presents The main aim of the Guide is to boost implementation research capacity as well as demand for implementation research that is aligned with need and that is of particular relevance to health systems in low and middle income countries LMICs Research on implementation requires the engagement of diverse stakeholders and multiple disciplines in order to address the complex implementation challenges they face For this reason the Guide is intended for a variety of actors who contribute to and or are impacted by implementation research This includes the decision makers responsible for designing policies and managing programs whose decisions shape implementation and scale up processes as well as the practitioners and front line workers who ultimately implement these decisions along with researchers from different disciplines who bring expertise in systematically collecting and analyzing information to inform implementation questions The opening chapters 1 4 make the case for why implementation research is important to decision making They offer a workable definition of implementation research and illustrate the relevance of research to problems that are often considered to be simply administrative and provide examples of how such problems can be framed as implementation research questions The early chapters also deal with the conduct of implementation research emphasizing

the importance of collaboration and discussing the role of implementers in the planning and designing of studies the collection and analysis of data as well as in the dissemination and use of results The second half of the Guide 5 7 detail the various methods and study designs that can be used to carry out implementation research and using examples illustrates the application of quantitative qualitative and mixed method designs to answer complex questions related to implementation and scale up It offers guidance on conceptualizing an implementation research study from the identification of the problem development of research questions identification of implementation outcomes and variables as well as the selection of the study design and methods while also addressing important questions of rigor The Financial Crisis Inquiry Report Financial Crisis Inquiry Commission,2011-05-01 The Financial Crisis Inquiry Report published by the U S Government and the Financial Crisis Inquiry Commission in early 2011 is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed or would have without help from the government The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity The report details among other things the periods before during and after the crisis what led up to it and analyses of subprime mortgage lending credit expansion and banking policies the collapse of companies like Fannie Mae and Freddie Mac and the federal bailouts of Lehman and AIG It also discusses the aftermath of the fallout and our current state This report should be of interest to anyone concerned about the financial situation in the U S and around the world THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent bi partisan government appointed panel of 10 people that was created to examine the causes domestic and global of the current financial and economic crisis in the United States It was established as part of the Fraud Enforcement and Recovery Act of 2009 The commission consisted of private citizens with expertise in economics and finance banking housing market regulation and consumer protection They examined and reported on the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government News Dissector DANNY SCHECHTER is a journalist blogger and filmmaker He has been reporting on economic crises since the 1980 s when he was with ABC News His film In Debt We Trust warned of the economic meltdown in 2006 He has since written three books on the subject including Plunder Investigating Our Economic Calamity Cosimo Books 2008 and The Crime Of Our Time Why Wall Street Is Not Too Big to Jail Disinfo Books 2011 a companion to his latest film Plunder The Crime Of Our Time He can be reached online at www.newsdissector.com
