CELLULAR RESPIRATION WEBQUEST

OBJECTIVE: I will be able to describe the function of, state the site and chemical equation for cellular respiration, and distinguish between two types of cellular respiration by completing a WebQuest.

DIRECTIONS: As you work through the WebQuest, click on the links to find answers to the questions.

Part I: Function and Equation for Respiration

1. Go to the following three links or search for your own resources and read the information available. Write a definition for cellular respiration in your own words.

http://www.phschool.com/science/biology_place/biocoach/ - Click on "Cell Respiration"

<http://www.phsuccessnet.com/> - Online Text

<http://www.emc.maricopa.edu/faculty/farabee/BIOBK/BioBookGlyc.html>

2. What living things carry on the process of cellular respiration?

3. Write the chemical equation for cellular respiration identifying the reactants and products.

A Framework for K-12 Science Education National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on a Conceptual Framework for New K-12 Science Education Standards, 2012-02-28 Science engineering and technology permeate nearly every facet of modern life and hold the key to solving many of humanity s most pressing current and future challenges The United States position in the global economy is declining in part because U S workers lack fundamental knowledge in these fields To address the critical issues of U S competitiveness and to better prepare the workforce A Framework for K 12 Science Education proposes a new approach to K 12 science education that will capture students interest and provide them with the necessary foundational knowledge in the field A Framework for K 12 Science Education outlines a broad set of expectations for students in science and engineering in grades K 12 These expectations will inform the development of new standards for K 12 science education and subsequently revisions to curriculum instruction assessment and professional development for educators This book identifies three dimensions that convey the core ideas and practices

around which science and engineering education in these grades should be built These three dimensions are crosscutting concepts that unify the study of science through their common application across science and engineering scientific and engineering practices and disciplinary core ideas in the physical sciences life sciences and earth and space sciences and for engineering technology and the applications of science The overarching goal is for all high school graduates to have sufficient knowledge of science and engineering to engage in public discussions on science related issues be careful consumers of scientific and technical information and enter the careers of their choice A Framework for K 12 Science Education is the first step in a process that can inform state level decisions and achieve a research grounded basis for improving science instruction and learning across the country The book will guide standards developers teachers curriculum designers assessment developers state and district science administrators and educators who teach science in informal environments

Biology Ken Miller, Joseph Levine, Prentice-Hall Staff, 2004-11 Authors Kenneth Miller and Joseph Levine continue to set the standard for clear accessible writing and up to date content that engages student interest Prentice Hall Biology utilizes a student friendly approach that provides a powerful framework for connecting the key concepts a biology Students explore concepts through engaging narrative frequent use of analogies familiar examples and clear and instructional graphics Whether using the text alone or in tandem with exceptional ancillaries and technology teachers can meet the needs of every student at every learning level

The Carbon Cycle T. M. L. Wigley, D. S. Schimel, 2005-08-22 Reducing carbon dioxide CO₂ emissions is imperative to stabilizing our future climate Our ability to reduce these emissions combined with an understanding of how much fossil fuel derived CO₂ the oceans and plants can absorb is central to mitigating climate change In The Carbon Cycle leading scientists examine how atmospheric carbon dioxide concentrations have changed in the past and how this may affect the concentrations in the future They look at the carbon budget and the missing sink for carbon dioxide They offer approaches to modeling the carbon cycle providing mathematical tools for predicting future levels of carbon dioxide This comprehensive text incorporates findings from the recent IPCC reports New insights and a convergence of ideas and views across several disciplines make this book an important contribution to the global change literature

Plant Cell Organelles J Pridham, 2012-12-02 Plant Cell Organelles contains the proceedings of the Phytochemical Group Symposium held in London on April 10 12 1967 Contributors explore most of the ideas concerning the structure biochemistry and function of the nuclei chloroplasts mitochondria vacuoles and other organelles of plant cells This book is organized into 13 chapters and begins with an overview of the enzymology of plant cell organelles and the localization of enzymes using cytochemical techniques The text then discusses the structure of the nuclear envelope chromosomes and nucleolus along with chromosome sequestration and replication The next chapters focus on the structure and function of the mitochondria of higher plant cells biogenesis in yeast carbon pathways and energy transfer function The book also considers the chloroplast the endoplasmic reticulum the Golgi bodies and the microtubules The final chapters

discuss protein synthesis in cell organelles polysomes in plant tissues and lysosomes and spherosomes in plant cells This book is a valuable source of information for postgraduate workers although much of the material could be used in undergraduate courses

Good Practice In Science Teaching: What Research Has To Say Osborne, Jonathan, Dillon, Justin, 2010-05-01 This volume provides a summary of the findings that educational research has to offer on good practice in school science teaching It offers an overview of scholarship and research in the field and introduces the ideas and evidence that guide it

The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC), 2022-04-30 The Intergovernmental Panel on Climate Change IPCC is the leading international body for assessing the science related to climate change It provides policymakers with regular assessments of the scientific basis of human induced climate change its impacts and future risks and options for adaptation and mitigation This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up to date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks with a focus on resilience risk management response options and adaptation measures considering both their potential and limitations It brings together knowledge on physical and biogeochemical changes the interplay with ecosystem changes and the implications for human communities It serves policymakers decision makers stakeholders and all interested parties with unbiased up to date policy relevant information This title is also available as Open Access on Cambridge Core

Cell Organelles Reinhold G. Herrmann, 2012-12-06 The compartmentation of genetic information is a fundamental feature of the eukaryotic cell The metabolic capacity of a eukaryotic plant cell and the steps leading to it are overwhelmingly an endeavour of a joint genetic cooperation between nucleus cytosol plastids and mitochondria Alter ation of the genetic material in anyone of these compartments or exchange of organelles between species can seriously affect harmoniously balanced growth of an organism Although the biological significance of this genetic design has been vividly evident since the discovery of non Mendelian inheritance by Baur and Correns at the beginning of this century and became indisputable in principle after Renner s work on interspecific nuclear plastid hybrids summarized in his classical article in 1934 studies on the genetics of organelles have long suffered from the lack of respectabil ity Non Mendelian inheritance was considered a research sideline ifnot a freak by most geneticists which becomes evident when one consults common textbooks For instance these have usually impeccable accounts of photosynthetic and respiratory energy conversion in chloroplasts and mitochondria of metabolism and global circulation of the biological key elements C N and S as well as of the organization maintenance and function of nuclear genetic information In contrast the heredity and molecular biology of organelles are generally treated as an adjunct and neither goes as far as to describe the impact of the integrated genetic system
