

"The command module pilot (CMP), the second in command of an Apollo spacecraft, was the least understood and least appreciated crew member by the media and the general public. In *Falling to Earth*, Al Worden, CMP of Apollo 15, clearly and candidly recounts the wonder, the challenge, the triumph, and the pitfalls of flying to the moon."

—Neil Armstrong, Gemini 8 and Apollo 11 astronaut

Falling To Earth An Apollo 15 Astronauts Journey The Moon Al Worden

Falling to Earth Al Worden, Francis French, 2011-07-26 As command module pilot for the Apollo 15 mission to the moon in 1971 Al Worden flew on what is widely regarded as the greatest exploration mission that humans have ever attempted He spent six days orbiting the moon including three days completely alone the most isolated human in existence During the return from the moon to earth he also conducted the first spacewalk in deep space becoming the first human ever to see both the entire earth and moon simply by turning his head The Apollo 15 flight capped an already impressive career as an astronaut including important work on the pioneering Apollo 9 and Apollo 12 missions as well as the perilous flight of Apollo 13 Nine months after his return from the moon Worden received a phone call telling him he was fired and ordering him out of his office by the end of the week He refused to leave What happened in those nine months from being honored with parades and meetings with world leaders to being unceremoniously fired has been a source of much speculation for four decades Worden has never before told the full story around the dramatic events that shook NASA and ended his spaceflight career Readers will learn them here for the first time along with the exhilarating account of what it is like to journey to the moon and back It s an unprecedentedly candid account of what it was like to be an Apollo astronaut with all its glory but also its pitfalls

Falling to Earth Al Worden, Francis French, 2011 The author describes his life from his early years growing up on a farm to his years as an astronaut with NASA including flying the Apollo 15 mission to the moon in 1971

The Light of Earth Al Worden, Francis French, 2021-11 Apollo 15 command module pilot Al Worden was one of the highest profile personalities among the Apollo astronauts renowned for his outspokenness and potent views but also recognized as a warm and well liked person who devoted much of his life after retiring from NASA to sharing his spaceflight experiences Worden had nearly finished writing this book before his passing in 2020 at the age of eighty eight Coauthored with spaceflight historian Francis French The Light of Earth is Worden s wide ranging look at the greatest ever scientific undertaking in which he was privileged to be a leading participant Here Worden gives readers his refreshingly candid opinions on the space program flying to the moon and the people involved in the Apollo and later shuttle programs as well as sharing hard hitting reflections on the space shuttle program the agonies and extraordinary sights and delights of being a NASA Apollo astronaut and the space program s triumphs and failures Worden delves into areas of personal grief that reveal the noble and truly human side of the space program s earliest years He does not hold back when discussing the shocking deaths of his fellow astronauts in the three major tragedies that struck the space agency nor does he shy away from sharing his personal feelings about fellow Apollo astronauts including Neil Armstrong and Buzz Aldrin Worden was known as a charismatic speaker and one of the most thoughtful Apollo astronauts His candid entertaining and unique perspective in The Light of Earth will captivate and surprise

Forever Young John W Young, 2012-09-16 He walked on the Moon He flew six space missions in

three different programs more than any other human He served with NASA for more than four decades His peers called him the astronaut s astronaut Enthusiasts of space exploration have long waited for John Young to tell the story of his two Gemini flights his two Apollo missions the first ever Space Shuttle flight and the first Spacelab mission Forever Young delivers all that and more Young s personal journey from engineering graduate to fighter pilot to test pilot to astronaut to high NASA official to clear headed predictor of the fate of Planet Earth Young with the assistance of internationally distinguished aerospace historian James Hansen recounts the great episodes of his amazing flying career in fascinating detail and with wry humor He portrays astronauts as ordinary human beings and NASA as an institution with the same ups and downs as other major bureaucracies He frankly discusses the risks of space travel including what went wrong with the Challenger and Columbia shuttles Forever Young is one of the last memoirs produced by an early American astronaut It is the first memoir written by a chief of the NASA astronaut corps Young s experiences and candor make this book indispensable to everyone interested in the U S space program

Light This Candle Neal Thompson,2007-12-18 The definitive biography of Alan Shepard America s first man in space with a new Foreword by Chris Kraft One of the finest books ever written about the space program Homer Hickam author of Rocket Boys A wonderful and gripping biography meticulously reported in the best tradition of David Halberstam Buzz Bissinger New York Times bestselling author of Friday Night Lights Alan Shepard was the brashest cockiest and most flamboyant of America s original Mercury Seven but he was also regarded as the best Intense colorful and dramatic he was among the most private of America s public figures and until his death in 1998 he guarded the story of his life zealously Light This Candle based on Neal Thompson s exclusive access to private papers and interviews with Shepard s family and closest friends including John Glenn Wally Schirra and Gordon Cooper offers a riveting action packed account of Shepard s life

Lunar Sourcebook Grant Heiken,David Vaniman,Bevan M. French,1991-04-26 The only work to date to collect data gathered during the American and Soviet missions in an accessible and complete reference of current scientific and technical information about the Moon

We Have Capture Thomas P. Stafford,Michael Cassutt,2014-01-14 What an amazing career Tom Stafford attained the highest speed ever reached by a test pilot 28 547 mph carried a cosmonaut s coffin with Soviet Secretary Leonid Brezhnev led the team that designed the sequence of missions leading to the original lunar landing and drafted the original specifications for the B 2 stealth bomber on a piece of hotel stationery But his crowning achievement was surely his role as America s unofficial space ambassador to the Soviet Union during the darkest days of the Cold War In this lively memoir written with Michael Cassutt Stafford begins by recounting his early successes as a test pilot Gemini and Apollo astronaut and USAF general As President Nixon s stand in at the 1971 Soviet funeral for three cosmonauts he opened the door to the possibility of cooperation in space between Russians and Americans Stafford s Apollo Soyuz team was the first group of Americans to work at the cosmonaut training center and also the first to visit Baikonur the top secret Soviet launch center in 1974 His 17 July 1975 handshake in space with Soviet commander Alexei Leonov who

became a lifelong friend proved to the world that the two opposing countries could indeed work successfully together Stafford has continued in this leadership role right up to the present participating in designing and evaluating the Space Shuttle Mir and the International Space Station He is truly an American hero who personifies the broadest spirit of exploration and cooperation

Marketing the Moon David Meerman Scott, Richard Jurek, 2014-02-28 One of the most successful public relations campaigns in history featuring heroic astronauts press savvy rocket scientists enthusiastic reporters deep pocketed defense contractors and Tang In July 1969 ninety four percent of American televisions were tuned to coverage of Apollo 11's mission to the moon How did space exploration once the purview of rocket scientists reach a larger audience than My Three Sons Why did a government program whose standard operating procedure had been secrecy turn its greatest achievement into a communal experience In *Marketing the Moon* David Meerman Scott and Richard Jurek tell the story of one of the most successful marketing and public relations campaigns in history the selling of the Apollo program Primed by science fiction magazine articles and appearances by Wernher von Braun on the Tomorrowland segments of the Disneyland prime time television show Americans were a receptive audience for NASA's pioneering brand journalism Scott and Jurek describe sophisticated efforts by NASA and its many contractors to market the facts about space travel through press releases bylined articles lavishly detailed background materials and fully produced radio and television features rather than push an agenda American astronauts who signed exclusive agreements with Life magazine became the heroic and patriotic faces of the program And there was some judicious product placement Hasselblad was the first camera on the moon Sony cassette recorders and supplies of Tang were on board the capsule and astronauts were equipped with the Exer Genie personal exerciser Everyone wanted a place on the bandwagon Generously illustrated with vintage photographs artwork and advertisements many never published before *Marketing the Moon* shows that when Neil Armstrong took that giant leap for mankind it was a triumph not just for American engineering and rocketry but for American marketing and public relations

Exploring the Moon David M. Harland, 2008-04-16 In this comprehensive overview of Man's relationship with his planet's nearest neighbor David Harland opens with a review of the robotic probes namely the Rangers which returned television before crashing into the Moon the Surveyors which soft landed in order to investigate the nature of the surface and the Lunar Orbiters which mapped prospective Apollo landing sites He then outlines the historic landing by Apollo 11 and the final three missions of comprehensive geological investigations He concludes with a review of the robotic spacecraft that made remote sensing observations of the Moon This Commemorative Edition includes a foreword by one of the original astronauts as well as an extra section reviewing the prospect of renewed exploration there New graphics and images are also included

The Way of the Explorer (Easyread Super Large 18pt Edition), **In the Shadow of the Moon** Francis French, Colin Burgess, 2007-01-01 Tells the story of the exciting and challenging years in space flight with two superpowers engaged in a titanic struggle to land one of their own people on the moon This book explores the inspirations ambitions

personalities and experiences of the select few whose driving ambition was to fly to the moon

Earthrise Edgar Mitchell, Ellen Mahoney, 2014-04-01 This vibrant memoir features the life story of Apollo 14 astronaut Edgar Mitchell focusing on Mitchell's amazing journey to the Moon in 1971 and highlighting the many steps he took to get there. The former astronaut recounts his childhood as a farm boy in New Mexico, flying solo as a teen living in Roswell during the alleged UFO crash, studying at Carnegie Mellon and MIT, his experiences as a navy combat pilot, and finally a NASA astronaut. In suspenseful prose, he details his historic flight to the Moon with Alan Shepard and Stu Roosa, describing everything from the practical (eating, sleeping, and going to the bathroom in space) to the metaphysical (such as the life-changing sense of connectedness to the universe that he felt during his return to Earth). Resources include lists of websites about space museums and organizations, films and videos, and books for further reading. Edgar Mitchell was the Lunar Module Pilot for the Apollo 14 mission and the sixth man to walk on the Moon. He is the author of *The Way of the Explorer*, *Paradigm Shift*, and *The Space Less Traveled*. He is the recipient of many medals and awards, the founder of the Institute of Noetic Sciences. He lives in Lake Worth, Florida. Ellen Mahoney is an instructor in the Department of Journalism and Technical Communication at Metro State University of Denver. She lives in Boulder, Colorado. Dr. Brian Cox is a professor and Royal Society University Research Fellow at the University of Manchester School of Physics and Astronomy, Manchester, England.

The All American Boys Walter Cunningham, 2008-01-30 *The All American Boys* is a no-holds-barred candid memoir by a former Marine jet jockey and physicist who became NASA's second civilian astronaut. Walter Cunningham presents the astronauts in all their glory in this dramatically revised and updated edition. From its insider's view of the astropolitics that guided the functioning of the astronaut corps to its thoughtful discussion of the Columbia tragedy, *The All American Boys* resonates with Cunningham's passion for humanity's destiny in space. Cunningham brings us into NASA's training program and reveals what it takes to be an astronaut. He poignantly relates the story of the devastating Apollo 1 fire that took the lives of three astronauts and his own later successful flight on Apollo 7.

[I Want to Know about a Flight to the Moon](#) Al Worden, Alfred Merrill Worden, 1974 A member of the Apollo 15 crew describes how he became an astronaut, the training he received, and the flight of the Apollo 15.

The Sun, the Earth, and Near-earth Space John A. Eddy, 2009 Concise explanations and descriptions, easily read and readily understood, of what we know of the chain of events and processes that connect the Sun to the Earth, with special emphasis on space weather and Sun Climate. Dear Reader.

[Fallen Astronauts](#) Colin Burgess, Kate Doolan, Bert Vis, 2016-05-01 Near the end of the Apollo 15 mission, David Scott and fellow moonwalker James Irwin conducted a secret ceremony, unsanctioned by NASA, they placed on the lunar soil a small tin figurine called *The Fallen Astronaut*, along with a plaque bearing a list of names. By telling the stories of those sixteen astronauts and cosmonauts who died in the quest to reach the moon between 1962 and 1972, this book enriches the saga of humankind's greatest scientific undertaking, Project Apollo, and conveys the human cost of the space race. Many people are aware of the first manned Apollo mission in which Gus

Grissom Ed White and Roger Chaffee lost their lives in a fire during a ground test but few know of the other five fallen astronauts whose stories this book tells as well including Ted Freeman and C C Williams who died in the crashes of their T 38 jets the Gemini Twins Charlie Bassett and Elliot See killed when their jet slammed into the building where their Gemini capsule was undergoing final construction and Ed Givens whose fatal car crash has until now been obscured by rumors Supported by extensive interviews and archival material the extraordinary lives and accomplishments of these and other fallen astronauts including eight Russian cosmonauts who lost their lives during training unfold here in intimate and compelling detail Their stories return us to a stirring time in the history of our nation and remind us of the cost of fulfilling our dreams This revised edition includes expanded and revised biographies and additional photographs

Chariots for Apollo Courtney G. Brooks, James M. Grimwood, Loyd S. Swenson, 2012-05-14 This illustrated history by a trio of experts is the definitive reference on the Apollo spacecraft and lunar modules It traces the vehicles design development and operation in space More than 100 photographs and illustrations

I Was a Teenage Space Reporter David Chudwin, 2019-04-02 Drawing on his time as an on site college press reporter covering the July 1969 Apollo 11 launch the author reflects on and mark the mission s 50th anniversary considers lessons learned from the Apollo program and presents possibilities for our future in space

Deke! Donald K. Slayton, Michael Cassutt, 1995-06-15 Deke Slayton was one of the first seven Mercury astronauts and he might have been the first American in space Instead he became the first chief of American Astronaut Corps It was Deke Slayton who selected the crews who flew the Gemini Apollo and Skylab missions It was Deke Slayton who made Neil Armstrong the first man on the moon Deke is Deke Slayton s story told in his own words and in the voices of the men and women who worked with him and knew him best Deke Slayton s knowledge of how the S manned space program worked is the missing piece of every space buff s puzzle Now after decades of silence he tells his priceless stories of those years when American was engaged in the greatest voyage of exploration in human history At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied

Across the Airless Wilds Earl Swift, 2021-07-06 THRILLING Up end s the Apollo narrative entirely The Times London A brilliantly observed Newsweek and endlessly fascinating WSJ rediscovery of the final Apollo moon landings revealing why these extraordinary yet overshadowed missions distinguished by the use of the revolutionary lunar roving vehicle deserve to be celebrated as the pinnacle of human adventure and exploration One of The Wall Street Journal s 10 Best Books of the Month 8 36 P M EST December 12 1972 Apollo 17 astronauts Gene Cernan and Jack Schmitt braked to a stop alongside Nansen Crater keenly aware that they were far far from home They had flown nearly a quarter million miles to the man in the moon s left eye landed at its edge and then driven five miles in to this desolate boulder strewn landscape As they gathered samples they strode at the outermost edge of mankind s travels This place this moment marked the extreme of exploration for a species born to wander A few feet away sat the machine that made the achievement possible an electric go cart that folded like a business letter weighed less than

eighty pounds in the moon's reduced gravity and muscled its way up mountains around craters and over undulating plains on America's last three ventures to the lunar surface. In the decades since the exploits of the astronauts on those final expeditions have dimmed in the shadow cast by the first moon landing. But Apollo 11 was but a prelude to what came later while Neil Armstrong and Buzz Aldrin trod a sliver of flat lunar desert smaller than a football field. Apollos 15, 16, and 17 each commanded a mountainous area the size of Manhattan. All told their crews traveled fifty-six miles and brought deep science and a far more swashbuckling style of exploration to the moon. And they triumphed for one very American reason: they drove. In this fast-moving history of the rover and the adventures it ignited, Earl Swift puts the reader alongside the men who dreamed of driving on the moon and designed and built the vehicle, troubleshot its flaws, and drove it on the moon's surface. Finally shining a deserved spotlight on these overlooked characters and the missions they created, *Across the Airless Wilds* is a celebration of human genius, perseverance, and daring.
