**The Condition of Digitality** Robert Hassan,2020-01-10 David Harvey s *The Condition of Postmodernity* rationalised capitalism s transformation during an extraordinary year 1989 It gave theoretical expression to a material and cultural reality that was just then getting properly started globalisation and postmodernity whilst highlighting the geo spatial limits to accumulation imposed by our planet However this landmark publication author Robert Hassan argues did not address the arrival of digital technology the quantum leap represented by the move from an analogue world to a digital economy and the rapid creation of a global networked society Considering first the contexts of 1989 and Harvey s work then the idea of humans as analogue beings he argues this arising new human condition of digitality leads to alienation not only from technology but also the environment This condition he suggests is not an ideology of time and space but a reality stressing that Harvey s time space compression takes on new features including those of outward and inward globalisation and the commodification of all spheres of existence Lastly the author considers culture s role drawing on Rahel Jaeggi s theories to make the case for a post modern Marxism attuned to the most significant issue of our age Stimulating and theoretically wide ranging *The Condition of Digitality* recognises post modernity s radical new form as a reality and the urgent need to assert more democratic control over digitality

**Age of Fracture** Daniel T. Rodgers, 2011 In the last quarter of the twentieth century the ideas that most Americans lived by started to fragment Mid century concepts of national consensus managed markets gender and racial identities citizen obligation and historical memory became more fluid Flexible markets pushed aside Keynesian macroeconomic structures Racial and gender solidarity divided into multiple identities community responsibility shrank to smaller circles In this wide ranging narrative Daniel T Rodgers shows how the collective purposes and meanings that had framed social debate became unhinged and uncertain Age of Fracture offers a powerful reinterpretation of the ways in which the decades surrounding the 1980s changed America Through a contagion of visions and metaphors on both the intellectual right and the intellectual left earlier notions of history and society that stressed solidity collective institutions and social circumstances gave way to a more individualized human nature that emphasized choice agency performance and desire On a broad canvas that includes Michel Foucault Ronald Reagan Judith Butler Charles Murray Jeffrey Sachs and many more Rodgers explains how structures of power came to seem less important than market choice and fluid selves Cutting across the social and political arenas of late twentieth century life and thought from economic theory and the culture wars to disputes over poverty color blindness and sisterhood Rodgers reveals how our categories of social reality have been fractured and destabilized As we survey the intellectual wreckage of this war of ideas we better understand the emergence of our present age of uncertainty

**Cosmopolitanism and the Geographies of Freedom** David Harvey, 2009-08-22 Liberty and freedom are frequently invoked to justify political action Presidents as diverse as Woodrow Wilson Franklin Delano Roosevelt John F Kennedy Ronald Reagan and George W Bush have built their policies on some version of these noble values Yet in practice idealist agendas often turn sour as they confront specific circumstances on the ground Demonstrated by incidents at Abu Ghraib and Guant namo Bay the pursuit of liberty and freedom can lead to violence and repression undermining our trust in universal theories of liberalism neoliberalism and cosmopolitanism Combining his passions for politics and geography David Harvey charts a cosmopolitan order more appropriate to an emancipatory form of global governance Political agendas tend to fail he argues because they ignore the complexities of geography Incorporating geographical knowledge into the formation of social and political policy is therefore a necessary condition for genuine democracy Harvey begins with an insightful critique of the political uses of freedom and liberty especially during the George W Bush administration Then through an ontological investigation into geography s foundational conceptsspace place and environmenthe radically reframes geographical knowledge as a basis for social theory and political action As Harvey makes clear the cosmopolitanism that emerges is rooted in human experience rather than illusory ideals and brings us closer to achieving the liberation we seek
