"'A 'must have' for anyone with the slightest interest in cake decorating'" -- Publishers Weekly In the mid-1950s, legendary avant-garde composer John Cage and artist Lois Long created a truly marvelous object. Part artist's book, part cookbook, and part children's book, Mud Book is a spirited, if not satirical, take on almost every child's first attempt at cooking and making. Through the humble mud pie—add dirt and water!—Cage and Long encourage children to explore their imagination and to get their hands dirty, and they offer this warning: "Mud pies are to make and look at, not to eat." A unique hybrid of art book, unconventional cookbook, and inspiration for young makers, this new edition of Mud Book will delight children and parents alike, and makes a charming gift for all ages. Join Bartholomew Cubbins in Dr. Seuss’s Caldecott Honor–winning picture book about a king’s magical mishap! Bored with rain, sunshine, fog, and snow, King Derwin of Didd summons his royal magicians to create something new and exciting to fall from the sky. But with the assistance of the wise page boy Bartholomew, the king (along with young readers) learns that the simplest words can sometimes solve the stickiest problems. A primary care doctor is skeptical of his patient’s concerns. A hospital nurse or intern is unaware of a drug’s potential side effects. A physician makes the most “common” diagnosis while overlooking the signs of a rarer and more serious illness, and the patient doesn’t see the necessary specialist until it’s too late. A pharmacist dispenses the wrong drug and a patient dies as a result. Sadly, these kinds of mistakes happen all the time. Each year, 6.1 million Americans are harmed by diagnostic mistakes, drug disasters, and medical treatments. A decade ago, the Institute of Medicine estimated that up to 98,000 people died in hospitals each year from preventable medical errors. And new research from the University of Utah, HealthGrades of Denver, and elsewhere suggests the toll is much higher. Patient advocates and bestselling authors Joe and Teresa Graedon came face-to-face with the tragic consequences of doctors’ screwups when Joe’s mother died in Duke Hospital—one of the best in the world—due to a disastrous series of entirely preventable errors. In *Top Screwups Doctors Make and How to Avoid Them*, the Graedons expose the most common medical mistakes, from doctor’s offices and hospitals to the pharmacy counters and nursing homes. Patients across the country shared their riveting horror stories, and doctors recounted the disastrous—and sometimes deadly—consequences of their colleagues’ oversights and errors. While many patients feel vulnerable and dependent on their health care providers, this book is a startling wake-up call to how wrong doctors can be. The good news is that we can protect ourselves, and our loved ones, by being educated and vigilant medical consumers. The Graedons give patients the specific, practical steps they need to take to ensure their safety: the questions to ask a specialist before getting a final diagnosis, tips for promoting good communication with your doctor, presurgery checklists, how to avoid deadly drug interactions, and much more. Whether you’re sick or healthy, young or old, a parent of a young child, or caring for an elderly loved one, *Top Screwups Doctors Make and How to Avoid Them* is an eye-opening look at the medical mistakes that can truly affect any of us—and an empowering guide that explains what we can do about it. To most of us, learning something “the hard way” implies wasted time and effort. Good teaching, we believe, should be creatively tailored to the different learning styles of students and should use strategies that make learning easier. *Make It Stick* turns fashionable ideas like these on their head. Drawing on recent discoveries in cognitive psychology and other disciplines, the authors offer concrete techniques for becoming more productive learners. Memory plays a central role in our ability to carry out complex cognitive tasks, such as applying knowledge to problems never before encountered and drawing inferences from facts already known. New insights into how memory is encoded, consolidated, and later retrieved have led to a better understanding of how we learn. Grappling with the impediments that make learning challenging leads both to more complex mastery and better retention of what was learned. Many common study habits and practice routines turn out to be counterproductive. Underlining and highlighting, rereading, cramming, and single-minded repetition of new skills create the illusion of mastery, but gains fade quickly. More complex and durable learning come from self-testing, introducing certain difficulties in practice, waiting to re-study new material until a little forgetting has set in, and interleaving the practice of one skill or topic with another. Speaking most urgently to

students, teachers, trainers, and athletes, *Make It Stick* will appeal to all those interested in the challenge of lifelong learning and self-improvement. To make a bird, you'll need hundreds of tiny, hollow bones, so light you can barely feel them on your palm, so light they can float on air. Next you'll need feathers, for warmth and lift. There will be more besides - perhaps shells and stones for last touches - but what will finally make your bird tremble with dreams of open sky and soaring flight? This picture book shows how even the smallest of things, combined with wonder and a steady heart, can transform into works of magic. The worldwide book market generates almost \$90 billion annually, and more than half of those sales are made in non-bookstore outlets such as discount stores, airport shops, gift stores, supermarkets, and warehouse clubs. *How to Make Real Money Selling Books* provides a proven strategy for selling books to these enterprises.
