<p><b>Recommendation (p. 266)</b></p>	<p>"We recommend performing early mobilization of adult ICU patients whenever feasible to reduce the incidence and duration of delirium (+1B)." (+1B = strong recommendation for intervention based on evidence of moderate strength)</p>	<p>Early mobilization requires coordination among many members of the ICU team. This recommendation reinforces the value of this intervention to those directly involved (eg, physical therapist, nurse, and respiratory therapist) and indirectly involved (eg, physician) in this intervention.</p>
<p><b>Supporting analysis (p. 287)</b></p>	<p>"These studies suggest that early and aggressive mobilization is unlikely to harm ICU patients, but may reduce the incidence and duration of delirium, shorten ICU and hospital LOS, and lower hospital costs."</p>	<p>The analysis explains the rationale for the recommended intervention and justifies secondary benefits.</p>
<p><b>Tools to facilitate implementation of the guideline—Pocket Card recommendations (p. 292)</b></p>	<p>"Patients should be awake and able to purposely follow commands in order to participate in their care unless a clinical indication for deeper sedation exists."</p>	<p>Early mobilization requires a system-wide shift in patient management. The physical therapist may use these recommendations to advocate for changes in patient management or to inform quality improvement initiatives.</p>
	<p>"Promote sleep in ICU patients early when feasible to reduce the incidence and duration of delirium, and to improve functional outcomes."</p>

*Documentation for Rehabilitation* Lori Quinn, James Gordon, 2015-12-11 Better patient management starts with better documentation. *Documentation for Rehabilitation: A Guide to Clinical Decision Making in Physical Therapy* 3rd Edition shows how to accurately document treatment progress and patient outcomes. Designed for use by rehabilitation professionals, documentation guidelines are easily adaptable to different practice settings and patient populations. Realistic examples and practice exercises reinforce concepts and encourage you to apply what you've learned. Written by expert physical therapy educators Lori Quinn and James Gordon, this book will improve your skills in both documentation and clinical reasoning. A practical framework shows how to organize and structure PT records, making it easier to document functional outcomes in many practice settings and is based on the International Classification for Functioning, Disability and Health (ICF) model, the one adopted by the APTA. Coverage of practice settings includes documentation examples in acute care, rehabilitation, outpatient, home care, and nursing homes, as well as a separate chapter on documentation in pediatric settings. Guidelines to systematic documentation describe how to identify, record, measure, and evaluate treatment and therapies, especially important when insurance companies require evidence of functional progress in order to provide reimbursement. Workbook/textbook format uses examples and exercises in each chapter to reinforce your understanding of concepts. NEW Standardized Outcome Measures chapter leads to better care and patient management by helping you select the right outcome measures for use in evaluations, re-evaluations, and discharge summaries. UPDATED content is based on data from current research, federal policies, and APTA guidelines, including incorporation of new terminology from the Guide to Physical Therapist 3.0 and ICD-10 coding. EXPANDED number of case examples covers an even broader range of clinical practice areas.

**Occupational Therapy in Acute Care** Helene Smith-Gabai, 2011 Occupational therapy is an allied health profession with an underlying belief that engaging in occupations promotes both health and wellness. This comprehensive text lays the foundation for occupation-based practice and addresses the contextual issues of working within the acute care setting. The chapters help to demystify medical conditions and issues routinely encountered by occupational therapists working in this practice area. Detailed research covers the importance of occupational therapists' knowledge of how diseases affect the human body, including the cardiovascular, nervous, and endocrine systems. Chapters review the evaluation process, including chart review, measures, and interpretations, and recommendations for intervention to ensure the ultimate level of independence for each patient. *Occupational Therapy in Acute Care* is designed specifically for therapists working in a hospital setting to acquire better knowledge of the various body systems, common conditions, diseases, and procedures. Students and educators will find this new publication to be the most useful text available on the topic. The book features color illustrations of the human body's systems and functions, as well as tables delineating the signs and symptoms for various diseases. **HIGHLIGHTS** include: Evaluation of the Acute Care Patient; The Intensive Care Unit (ICU); The Cardiac System; The Vascular System; The Pulmonary System; The Nervous System; Orthopedics and Musculoskeletal Disorders; The Endocrine System; The Gastrointestinal System; The Genitourinary System; Oncology; Infectious Diseases and Autoimmune Disorders; Dysphagia; Transplantation; Burns; Appendices; Common diagnostic tests; medications; deconditioning and immobility; energy conservation; patients with altered mental status; low vision; bariatrics; vertigo; safe patient handling; pain management; evidence-based practice; ethics; discharge planning; blood disorder.
