*Be * Know * Do* Feb 23 2021 The United States Army is one of the most complex, best run organizations in the world, and central to the Army's success are strong leadership and exceptional leadership development. Army leaders must be able to act decisively and effectively in challenging situations. But the Army, despite its organizational structure, does not train leaders in a hierarchical manner. Dispersed leadership is the key to the success of the Army leadership model. Now, for the first time, you can have access to the Army's successful leadership philosophy and the principles that are outlined in *Be Know Do* the official Army Leadership Manual. *Be Know Do* makes this critical information available to civilian leaders in all sectors--business, government, and nonprofit--and gives them the guidelines they need to create an organization where leadership thrives.

Reliability and Maintainability (RAM) Training Jan 17 2023 The theme of this manual is failure physics - the study of how products, hardware, software, and systems fail and what can be done about it. The intent is to impart useful information, to extend the limits of production capability, and to assist in achieving low-cost reliable products. In a broader sense the manual should do more. It should underscore the urgent need for mature attitudes toward reliability. Five of the chapters were originally presented as a classroom course to over 1000 Martin Marietta engineers and technicians. Another four chapters and three appendixes have been added. We begin with a view of reliability from the years 1940 to 2000. Chapter 2 starts the training material with a review of mathematics and a description of what elements contribute to product failures. The remaining chapters elucidate basic reliability theory and the disciplines that allow us to control and eliminate failures.
