The force that expressed itself through Jesus, Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as channels for what is commonly referred to as God communicates again today as the world begins to enter a period of Spiritual Ascension with a new consciousness and awareness. This force, which refers to itself as Cosmic Awareness, has dictated this book as a set of 144 carefully structured lessons that took over 10 years to create.

They are designed to lead you, step by step, from where you are to where you want to be. This amazing information begins with Cosmic Awareness explaining what It is, how the Universe was created, and leads you through birth, childhood, adulthood, magic, sex, death and far beyond into other dimensions - explaining all of the mysterious "Secrets of the Universe" that everyone is looking for the absolute answer of "Who, In Fact, You Really Are." Who owns the media and communications in Africa today and with what implications? The book elegantly answers this urgent question by unpacking multiple dimensions of media ownership through rare and authoritative perspectives, including both historical and contemporary digital developments. It traces the evolving forms of ownership of media and communications in specific African contexts, showing how they interact with broader changes in and outside the continent. The book also shows how Big Techs, such as Meta (formerly known as Facebook), are involved in a scramble for Africa's digital ecosystem and how their advance brings both opportunities and concerns about ownership and control. The chapters analyse evolving forms of ownership and their implications on media concentration and democracy across Africa. The book offers a nuanced account of how media ownership structures are in some instances captured with an ever-growing and complex ecosystem that also has new opportunities for public interest media. Offering a significant representation of the trends and diversity of existing media systems, the book goes beyond the postcolonial geographical divisions of North and Sub-Saharan Africa to highlight common patterns and significant similarities and differences of communications ownerships between and within African countries. The contributors expose media and communications ownership patterns in Africa that are centralised and yet decentralising and in some cases, battling, resurging and globalising. This summary, together with the one on farm crops, by the use of maps and supplementary charts, portrays the

quantitative and geographic significance of production of the Nation's food supply. An Expanded, Interpretative Paraphrase of a Chronological Harmony of the Four Gospels, with Cross References, Supplementary Notes, and Indexes
