

Teen Smoking

By: Kate Phillips

Lately a problem has occurred with teen smoking. The number of teens who smoke has dramatically risen over the past years. This is a problem because smoking causes big health risks that lead to problems and diseases that can kill you. Teens are mainly smoking when there is no supervision. It usually occurs in the parks, under bridges, and in town away from their parents. They are usually doing it because of peer pressure and they think it is cool. Those are the reasons why smoking is bad, and why, when and where their doing it.

One of my solutions to stop smoking is by educating the teens and their parents. Schools could have after school classes that tell the hazards of smoking. In the classes they could talk about is how bad smoking is to your health. They could also show the parents some visuals showing how smoking ages your skin and yellows your teeth. In the classes they could also show or tell the parents what will happen to their kids if they do not stop smoking. This would hopefully convince them to stop buying cigarettes for their kids. It would also be important to teach both the students and parents about the health risks/ problems and diseases smoking can cause such as cancer, emphysema, and heart disease. Finally you could have motivational speakers come in and talk to the parents and teens. They could talk to the families about alternatives to smoking and share their experiences. That would be my first step to end teen smoking.

My second solution on how to stop smoking is by stopping the media that supports smoking. First, we could stop magazine ads. I think stopping magazine ads would be a good idea because teens are always reading magazines and seeing the pictures in them. If you do not have the ads in print, the "glamour" of smoking would be lessened. Next, we could get rid of clothing that promotes cigarettes or smoking. It would be a good idea because teens are always having to deal with peer pressure. So, if it is not on the market or in stores, teens will not think of it as being "cool". Lastly, we could stop advertising smoking on television and in movies. One reason why, you should stop having actors/actresses advertise smoking because teens look up to them and want to be like them. Also, kids and teens are always watching television and movies. That would be my second step in stopping teen smoking.

If I was having to begin today with stopping smoking by teenagers I would begin by stopping the media that supports smoking. One reason why I think this is the best idea is because teens or kids are always seeing these

How Tobacco Smoke Causes Disease United States. Public Health Service. Office of the Surgeon General, 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke Many Surgeon General s reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies Mechanisms of disease are important because they may provide plausibility which is one of the guideline criteria for assessing evidence on causation This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke This evidence is relevant to understanding how smoking causes disease to identifying those who may be particularly susceptible and to assessing the potential risks of tobacco products **Smoking**

Bullshit Jobs David Graeber,2019-05-07 From bestselling writer David Graeber a master of opening up thought and stimulating debate Slate a powerful argument against the rise of meaningless unfulfilling jobs and their consequences Does your job make a meaningful contribution to the world In the spring of 2013 David Graeber asked this question in a playful provocative essay titled On the Phenomenon of Bullshit Jobs It went viral After one million online views in seventeen different languages people all over the

world are still debating the answer There are hordes of people HR consultants communication coordinators telemarketing researchers corporate lawyers whose jobs are useless and tragically they know it These people are caught in bullshit jobs Graeber explores one of society's most vexing and deeply felt concerns indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln Clever and charismatic The New Yorker Bullshit Jobs gives individuals corporations and societies permission to undergo a shift in values placing creative and caring work at the center of our culture This book is for everyone who wants to turn their vocation back into an avocation and a thought provoking examination of our working lives Financial Times

Smoking Prevention and Cessation Mirjana Rajer,2018-12-05 Smoking was and remains one of the most important public healthcare issues It is estimated that every year six million people die as a result of tobacco consumption Several diseases are caused or worsened by smoking different cancer types heart disease stroke lung diseases and others In this book we describe the different toxic effects of smoke on the human body in active and in passive smokers It is also well known that many people who smoke wish to quit but they rarely succeed Smoking prevention and cessation are of utmost importance thus we also describe different strategies and aspects of these issues We hope that this book will help readers to understand better the effects of smoking and learn about new ideas on how to effectively help other people to stop smoking

The Cigarette Century Allan M. Brandt,2009-01-06 The invention of mass marketing led to cigarettes being emblazoned in advertising and film deeply tied to modern notions of glamour and sex appeal It is hard to find a photo of Humphrey Bogart or Lauren Bacall without a cigarette No product has been so heavily promoted or has become so deeply entrenched in American consciousness And no product has received such sustained scientific scrutiny The development of new medical knowledge demonstrating the dire harms of smoking ultimately shaped the evolution of evidence based medicine In response the tobacco industry engineered a campaign of scientific disinformation seeking to delay disrupt and suppress these studies Using a massive archive of previously secret documents historian Allan Brandt shows how the industry pioneered these campaigns particularly using special interest lobbying and largesse to elude regulation But even as the cultural dominance of the cigarette has waned and consumption has fallen dramatically in the U S Big Tobacco remains securely positioned to expand into new global markets The implications for the future are vast 100 million people died of smoking related diseases in the 20th century in the next 100 years we expect 1 billion deaths worldwide
