now you can learn the same techniques that Joe shares in his seminars and lectures in a book that brings Joe's sessions to life. What makes the book so unique is the triangle of learning where 1 Joe distills the concept down to one brief sentence. It usually starts with something like "An editor at National Geographic once told me..." and then he shares one of those hard-earned tricks of the trade that you only get from spending a lifetime behind the lens. Then 2 on the facing page is one of Joe's brilliant images that perfectly illustrates the technique you'll recognize in many of his photos from magazine covers. And 3 you get the inside story of how that shot was taken, including which equipment he used, lens, f-stop, lighting accessories, etc., along with the challenges that type of project brings and how to set up a shot like that of your own. This book also gives you something more: it inspires, it challenges, it informs. But perhaps most importantly, it will help you understand photography and the art of making great photos at a level you never thought possible. This book is packed with those "Ah-ha" moments, those clever insights that make it all come together for you. It brings you that wonderful moment when it suddenly all makes sense; that moment it clicks.
