Read the following passage carefully and answer the question given at its end:

Something is radically wrong with the entire structure of human relationship that makes man delight in killing man, whether it be in the name of civilization or religion or anything else. Two wrongs do not make a right, hatred must beget hatred. It is this fundamental truth that women have got to bring home to the people in their respective countries. No peace treaties can avail that have revenge as their basis and self righteous arrogance and hypocrisy in the so called victors. But women are the natural preservers of life.

21. Which of the following expresses most accurately the idea contained in the opening sentence of the passage?
 (A) Man destroying another man is a painful practice.
 (B) A social structure that permits people to kill each other for religion is inherently rotten.
 (C) It is strange that one religion encourages its followers to kill the followers of another religion.
 (D) It is wrong on man's part to derive pleasure out of killing others for any motive whatsoever.
22. The expression "Two wrongs do not make a right" means that:
 (A) A wrong action in retaliation does not mend matters.
 (B) Hatred destroys the person who perpetrates it.
 (C) A tit for tat policy aggravates hatred.
 (D) Even repeated assertions of a wrong statement do not make it right.
23. Which of the following statements is not implied in the passage?
 (A) It is human tendency to kill others professing different religion.
 (B) It is the duty of women to foster peace and harmony amongst their countrymen.
 (C) Peace treaties among nations tend to establish peace in the world.
 (D) If you hate someone, he is bound to respond with the same feeling.
24. Which word is opposite in meaning to 'preserver' as used in the passage?
 (A) Enemy (B) Destroyer
 (C) Rival (D) Belligerent
25. Which of the following would sum up most suitably the central idea of the passage?
 (A) The role of women in the world of hatred and violence
 (B) Man's instinct of destroying others
 (C) Hatred leads to further hatred
 (D) The significance of peace treaties

Black Identities Mary C. WATERS,2009-06-30 The story of West Indian immigrants to the United States is generally considered to be a great success Mary Waters however tells a very different story She finds that the values that gain first generation immigrants initial success a willingness to work hard a lack of attention to racism a desire for education an incentive to save are undermined by the realities of life and race relations in the United States Contrary to long held beliefs Waters finds those who resist Americanization are most likely to succeed economically especially in the second generation

The Anti-Dumping Agreement and Developing Countries Aradhna Aggarwal,2006-10-20 In the era of globalization trade policy has become a key development tool and expanding exports a major policy objective for developing countries However pressures for protectionism are threatening to reverse the gains The surge of anti dumping practices in the 1990s in many countries have triggered an intense debate on the anti dumping agreement and its implementation This volume analyses the importance of anti dumping from a developing country s perspective The author investigates the use of anti dumping in a comparative framework and reviews the genesis and evolution of the Agreement and its legal provisions She further discusses the economic and non economic justifications of anti dumping use and empirically analyses the macro economic factors motivating countries to use anti dumping Finally she examines the wide ranging proposals to reform the WTO anti dumping code The analysis brings out a bias against developing countries and stresses the need for fundamental reform of current anti dumping rules The author also reflects on plausible approaches to refine existing provisions and explores the possibility of reform by including a Public Interest Test She suggests updating the special and differential treatment provisions to remedy existing imbalances

Interleukin Protocols Luke A. J. O'Neill, Andrew Bowie, 2008-02-02 Interleukins are a family of proteins that regulate the maturation differentiation or activation of cells involved in immunity and inflammation and belong to a broader family termed cytokines Collectively these proteins are the key orchestrators of host defense and the response to tissue injury There are currently 23 different interleukins numbered from IL 1 to IL 23 although the full extent of the interleukin family will only become clear upon analysis of the human genome sequence Most important interleukins are central to the pathogenesis of a wide range of diseases that involve an immune component including such conditions as rheumatoid arthritis multiple sclerosis ulcerative colitis psoriasis and asthma Interleukins have also been implicated in other conditions including cancer migraine myocardial infarction and depression In essence when cells are activated by interleukins a program of gene expression is initiated in the target cell that alters the cell's phenotype leading to enhanced immune reactivity inflammation and or proliferation Interleukins are therefore at the core of the cellular basis for many diseases They are the subject of intense investigation by biomedical researchers and the targeting or use of interleukins in the clinic is proceeding apace Approaches such as targeting IL 4 in asthma or IL 1 in joint disease are being pursued and it is likely that in the next 5 10 years a number of new therapies based on either inhibiting or administering interleukins will be available

World Development Report 2021 World Bank, 2021-06-15 Today's unprecedented growth of data and their ubiquity in our lives are signs that the data revolution is transforming the world And yet much of the value of data remains untapped Data collected for one purpose have the potential to generate economic and social value in applications far beyond those originally anticipated But many barriers stand in the way ranging from misaligned incentives and incompatible data systems to a fundamental lack of trust World Development Report 2021 Data for Better Lives explores the tremendous potential of the changing data landscape to improve the lives of poor people while also acknowledging its potential to open back doors that can harm individuals businesses and societies To address this tension between the helpful and harmful potential of data this Report calls for a new social contract that enables the use and reuse of data to create economic and social value ensures equitable access to that value and fosters trust that data will not be misused in harmful ways This Report begins by assessing how better use and reuse of data can enhance the design of public policies programs and service delivery as well as improve market efficiency and job creation through private sector growth Because better data governance is key to realizing this value the Report then looks at how infrastructure policy data regulation economic policies and institutional capabilities enable the sharing of data for their economic and social benefits while safeguarding against harmful outcomes The Report concludes by pulling together the pieces and offering an aspirational vision of an integrated national data system that would deliver on the promise of producing high quality data and making them accessible in a way that promotes their safe use and reuse By examining these opportunities and challenges the Report shows how data can benefit the lives of all people particularly poor people in low and middle income countries

Mathematics Learning in Early Childhood National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Early Childhood Mathematics, 2009-11-13 Early childhood mathematics is vitally important for young children's present and future educational success. Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics. Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's potential in mathematics is not fully realized, especially those children who are economically disadvantaged. This is due in part to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities. Improvements in early childhood mathematics education can provide young children with the foundation for school success. Relying on a comprehensive review of the research, *Mathematics Learning in Early Childhood* lays out the critical areas that should be the focus of young children's early mathematics education, explores the extent to which they are currently being incorporated in early childhood settings, and identifies the changes needed to improve the quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early childhood mathematics. It will be especially useful for policy makers and practitioners, those who work directly with children and their families in shaping the policies that affect the education of young children.

Open Middle Math Robert Kaplinsky, 2023-10-10 This book is an amazing resource for teachers who are struggling to help students develop both procedural fluency and conceptual understanding. Dr. Margaret Peg Smith, co-author of *5 Practices for Orchestrating Productive Mathematical Discussions*, and Robert Kaplinsky, the co-creator of Open Middle math problems, bring his new class of tasks designed to stimulate deeper thinking and lively discussion among middle and high school students in *Open Middle Math Problems That Unlock Student Thinking, Grades 6-12*. The problems are characterized by a closed beginning meaning all students start with the same initial problem and a closed end meaning there is only one correct or optimal answer. The key is that the middle is open in the sense that there are multiple ways to approach and ultimately solve the problem. These tasks have proven enormously popular with teachers looking to assess and deepen student understanding, build student stamina, and energize their classrooms. Professional Learning Resource for Teachers. *Open Middle Math* is an indispensable resource for educators interested in teaching student-centered mathematics in middle and high schools consistent with the national and state standards. Sample Problems at Each Grade. The book demonstrates the Open Middle concept with sample problems ranging from dividing fractions at 6th grade to algebra, trigonometry, and calculus. Teaching Tips for Student-Centered Math Classrooms. Kaplinsky shares guidance on choosing problems, designing your own math problems, and teaching for multiple purposes, including formative assessment, identifying misconceptions, procedural fluency, and conceptual understanding. Adaptable and Accessible Math. The tasks can be solved using various strategies at different levels of sophistication, which means all students can access the problems and participate in the conversation. *Open Middle Math* will help math teachers transform the 6th-12th grade classroom into an environment focused on problem solving, student dialogue, and critical thinking.

Helping Children Learn Mathematics National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Mathematics Learning Study Committee, 2002-07-31 Results from national and international assessments indicate that school children in the United States are not learning mathematics well enough Many students cannot correctly apply computational algorithms to solve problems Their understanding and use of decimals and fractions are especially weak Indeed helping all children succeed in mathematics is an imperative national goal However for our youth to succeed we need to change how we re teaching this discipline Helping Children Learn Mathematics provides comprehensive and reliable information that will guide efforts to improve school mathematics from pre kindergarten through eighth grade The authors explain the five strands of mathematical proficiency and discuss the major changes that need to be made in mathematics instruction instructional materials assessments teacher education and the broader educational system and answers some of the frequently asked questions when it comes to mathematics instruction The book concludes by providing recommended actions for parents and caregivers teachers administrators and policy makers stressing the importance that everyone work together to ensure a mathematically literate society
