The Strategic Defence and Security Review and the National Security Strategy Great Britain: Parliament: House of Commons: Defence Committee,2011-08-03 This report notes mounting concern that UK Armed Forces may be falling below the minimum utility required to deliver the commitments that they are currently being tasked to carry out let alone the tasks they are likely to face between 2015 to 2020 when it is acknowledged that there will be capability gaps The Committee is concerned that UK Armed Forces will be continually operating at the maximum level envisaged by the Defence Planning Assumptions The Committee is not convinced that this aspiration can be achieved by co operation with our allies given the challenges of aligning political with operational needs The SDSR identified seven military tasks and the Defence Planning Assumptions that underpin them However the Review fails to show how decisions such as those on the Aircraft Carriers and Nimrod MRA4 will lead to the Armed Forces being able to undertake those military tasks The Committee has serious concerns over the realisation of what is called Future Force 2020 the Government s intended shape of the Armed Forces from 2020 particularly as the provision of the necessary resources is only a Government aspiration not Government policy The MoD must reform and ensure substantially improved transparency and control over its finance and budgetary practices When committing to undertake new operations the Government should state from the outset where that operation fits in the Defence Planning Assumptions and which of the military tasks it is meeting The Committee is concerned that the Government seems to have postponed the sensible aspiration of bringing commitments and resources into line in that it has taken on the new commitment of Libya while reducing the resources available to MoD

Bargaining on Nuclear Tests Or Rabinowitz,2014-05-01 Most observers who follow nuclear history agree on one major aspect regarding Israel s famous policy of nuclear ambiguity mainly that it is an exception More specifically it is largely accepted that the 1969 Nixon Meir understanding which formally established Israel s policy of nuclear ambiguity and transformed it from an undeclared Israeli strategy into a long lasting undisclosed bilateral agreement was in fact a singularity aimed at allowing Washington to turn a blind eye to the existence of an Israeli arsenal According to conventional wisdom this nuclear bargain was a foreign policy exception on behalf of Washington an exception which reflected a relationship growing closer and warmer between the superpower leading the free world and its small Cold War associate Contrary to the orthodox narrative this research demonstrates that this was not the case The 1969 bargain was not in fact an exception but rather the first of three Cold War era deals on nuclear tests brokered by Washington with its Cold War associates the other two being Pakistan and South Africa These two deals are not well known and until now were discussed and explored in the literature in a very limited fashion Bargaining on Nuclear Tests places the role of nuclear tests by American associates as well as Washington s attempts to prevent and delay them at the heart of a new nuclear history narrative

Work in Progress: Donald Trump's Asia Team Ashley Townshend, 2017-01-24 President Donald Trump has hinted at a more muscular US foreign policy in the Asia Pacific. In tweets and speeches since the election he has adopted a hard line on China's island building in the South China Sea, vowed to prevent North Korea from acquiring a functional nuclear missile, condemned Beijing over its unfair trade practices, and raised the prospect of deeper US-Taiwan relations. His Asia team is shaping up to reflect Trump's hawkish stance towards China on trade and security. But it is also likely to be an eclectic group whose perspectives on other Asia policy issues differ both internally and with figures on the national security cabinet. Australia will have to prepare for a more turbulent US-China relationship as well as greater uncertainty in Washington's Asia policy.

Spies and Shuttles James E. David, 2015-01-27 In this real-life spy saga, James E. David reveals the extensive and largely hidden interactions between NASA and US defense and intelligence departments. The story begins with the establishment of NASA in 1958 and follows the agency through its growth, not only in scope but also in complexity. In *Spies and Shuttles*, David digs through newly declassified documents to ultimately reveal how NASA became a strange bedfellow to the Department of Defense (DoD) and the Central Intelligence Agency (CIA). He tracks NASA's early cooperation, supplying cover stories for covert missions, analyzing the Soviet space program, providing weather and other scientific data from its satellites, and monitoring missile tests that eventually devolved into NASA's reliance on DoD for political and financial support for the Shuttle. David also examines the restrictions imposed on such activities, as photographing the Earth from space and the intrusive review mechanisms to ensure compliance. The ties between NASA and the intelligence community have historically remained unexplored, and David's riveting book is the first to investigate the twists and turns of this labyrinthine relationship.

Rediscovering Sustainability Mr. A. R. G. Heesterman, Ms. W. H. Heesterman, 2013-02-28 Drawing on historical and current data, this thought-provoking book summarizes the pathways to the present predicament and maps out strategies to develop financial and economic systems for a sustainable world. The content is arranged in three parts: *Stylised Market Equilibrium*, *The Real Market Economy*, and *Present Affluence Versus the Future*. In *Rediscovering Sustainability*, the authors help bridge the gap in understanding between scientists and the green movement on the one side and many economists on the other. Greens worry about catastrophic climate change and anthropocene mass extinction. Economists express reservations about spending substantial amounts of money on preventing environmental degradation. Aart and Wiebina Heesterman argue that there are inherent limitations in standard economics which cause blind spots in its environmental economics sub-field, as well as issues to do with simple lack of knowledge. In this timely book, the limitations of the neoclassical economics framework are examined. The authors explore the relationship between Keynesian aggregate economics and financial sustainability, as well as that between scale economies, locational economics, and the understated cost of fuel for transport. The impact of economic theory on practice is examined. Conventional economic theory and political compromise bear unhelpfully on an energy market constrained by emissions targets. *Rediscovering Sustainability* is an invaluable aid to understanding for those teaching, studying, campaigning, policy-making, or involved with the science or politics of environmental and sustainability issues. It is also a book for those concerned with the application of economic theory in any context.
