MODEL QUESTION
(EFFECTIVE FROM 2077)

Grade XI

Subject Code : Che. 301

Time :3 hours

Attempt all questions

Subject: Chemistry (Theory)

Full marks: 75

Group 'A'

Circle the best alternative to the following questions.

(11×1 = 11)

1. How many atoms are there in two molecules of water?
 - a. 3
 - b. 4
 - c. 5
 - d. 6
2. What is the number of moles of ammonia gas formed when 0.5 mole of nitrogen gas is reacted with excess of hydrogen gas?
 - a. 0.5
 - b. 1
 - c. 2
 - d. 3
3. Which of the following bonding is responsible for the solubility of ammonia gas in water?
 - a. Hydrogen bonding
 - b. Ionic bonding
 - c. Covalent bonding
 - d. Van der Waals' force
4. What happens when Sulphur dioxide (SO_2) gas is passed through an acidified solution of hydrogen sulfide (H_2S) gas?
 - a. SO_2 is oxidized to Sulphur
 - b. H_2S is reduced to Sulphur
 - c. SO_2 is oxidized to H_2SO_4
 - d. SO_2 is reduced to Sulphur

NCET National Common Entrance Test-Chemistry Subject Practice Sets eBook Chandresh Agrawal,Nandini Books,2024-04-20 SGN The NCET

National Common Entrance Test Chemistry Subject Practice Sets Covers Objective Questions With Answers Solutions Wherever Possible **The Ultimate General Chemistry Exam Guide** Doctor Chemistry, 2017-09-03 This special addendum to the popular *The Ultimate Guide to Learning or Teaching Chemistry* This book contains the exam questions from a college AP chemistry class so you can see REAL test questions ahead of the exam *The Ultimate Chemistry Series* Teachers Never plan another lesson again Students Ace your upcoming exam This series covers all of the topics of High School Chemistry and General Chemistry including Accuracy and Significant Figures Mixtures Metric System Bonding Atomic Theory Periodic Table VSEPR Ionic and Covalent Bonding Geometric Bonding The Mole and Molar Mass Equation Balancing Thermodynamics Stoichiometry States of Matter Gas Laws and Calculations Reaction Calculations Acids and Bases Limiting Reagents Redox and Electro Chemistry Organic Chemistry Basics *720 Concept Building Questions of Organic Chemistry* Ajnish Kumar Gupta, Bharti Gupta, 2020-05-05 The guiding principle in writing this book was to create a set of Test papers for students A test paper that presents the material in a way that they learn to solve all the questions of Organic Chemistry in conceptual and sequential way In Test paper we mixed all our teaching experience of 15 years along with theoretical and experimental knowledge to generate a series of test paper for all students to reason their way to a solution rather than memorize a multitude of facts hoping they don't run out of memory This Test paper covers 24 papers with all type of questions which can give you a clear cut picture of subject that you must know before examination Each paper includes 10 Single Correct Question SCQ 7 Multiple Correct Question MCQ 5 Assertion Reason A R 2 Match the Column MTC 2 Comprehension 2 2 Questions 2 Integer i e 30 Questions in each paper Student can judge their preparation level by practicing in one hour These 24 papers are divided into 2 sets of 12 paper each In each set first of papers cover the whole organic chemistry into small segments Next 3 paper intermix two to three papers of the first eight paper and the last paper covers whole organic chemistry By doing this we want to revise your organic chemistry in 3 tiers so that not a single doubt should left out Organic chemistry is very easy and conceptual subject and need proper understanding of the basics and strategy to solve the questions in correct manner This Test paper will prepare your right mindset for learning Organic Chemistry This mindset is essentially the one that focuses you on a small number of straight forward fundamental concepts and helps you to apply them in different ways to solve the variety of problems you face in organic chemistry In this book balance has to be achieved between the number of questions and the quality of the questions especially because it is relatively easy to frame a very large number of multiple choice questions and theory of the subject The questions in this book have been selected keeping three things in mind First the questions are such that they really test the understanding of the subject Second the questions cover all concepts Third the number of questions has been kept large enough to offer meaningful practice to the students *Cracking the AP Chemistry Exam, 2014 Edition (Revised)* Princeton Review, 2014-03-18 THE PRINCETON REVIEW GETS RESULTS Get all the prep you need to ace the revised AP Chemistry

Exam with 2 full length practice tests thorough topic reviews and proven techniques to help you score higher The AP Chemistry course and test are undergoing major changes with a new version of the exam debuting in May 2014 Inside Cracking the AP Chemistry Exam you ll find 2 full length practice tests with detailed explanations that include the new multiple choice and constructed response question types Expert subject reviews for all test topics that reflect the changes to the 2014 AP Chemistry exam including newly incorporated test topics and Big Ideas organization Practice drills at the end of each chapter Step by step strategies techniques for every section of the exam A comprehensive list of key chemistry equations and constants This eBook edition has been specially formatted for on device viewing with cross linked questions answers and explanations

you with the types of questions directions and format of the SAT II Chemistry Subject Test To begin your studies read over the review and the suggestions for test taking take one of the practice tests to determine your areas of weakness and then reread the review material focusing on your specific problem areas The course review includes the information you need to know when taking the exam Be sure to take the remaining practice tests to further test yourself and become familiar with the format of the SAT II Chemistry Subject Test

When Should I Start Studying

It is never too early to start studying for the SAT II Chemistry test The earlier you begin the more time you will have to sharpen your skills Do not procrastinate Cramming is not an effective way to study since it does not allow you the time needed to learn the test material The sooner you learn the format of the exam the more comfortable you will be when you take the exam

FORMAT OF THE SAT II CHEMISTRY

The SAT II Chemistry is a one hour exam consisting of 85 multiple choice questions The first part of the exam consists of classification questions This question type presents a list of statements or questions that you must match up with a group of choices lettered A through E Each choice may be used once more than once or not at all The exam then shifts to relationship analysis questions which you will answer in a specially numbered section of your answer sheet You will have to determine if each of two statements is true or false and if the second statement is a correct explanation of the first The last section is composed strictly of multiple choice questions with choices lettered A through E

Material Tested

The following chart summarizes the distribution of topics covered on the SAT II Chemistry Subject Test

Topic	Percentage	Number of Questions
Atomic	however do not review too much at any one time	Concentrate on one problem area at a time by reviewing the questions and explanations and by studying our review until you are confident you completely understand the material
Keep track of your scores	By doing so you will be able to gauge your progress and discover general weaknesses in particular sections	You should carefully study the reviews that cover your areas of difficulty as this will build your skills in those areas

TEST TAKING TIPS

Although you may be unfamiliar with standardized tests such as the SAT II Chemistry Subject Test there are many ways to acquaint yourself with this type of examination and help alleviate your test taking anxieties Become comfortable with the format of the exam When you are practicing to take the SAT II Chemistry Subject Test simulate the conditions under which you will be taking the actual test Stay calm and pace yourself After simulating the test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual exam with much more confidence Know the directions and format for each section of the test Familiarizing yourself with the directions and format of the exam will not only save you time but will also ensure that you are familiar enough with the SAT II Chemistry Subject Test to avoid nervousness and the mistakes caused by being nervous Do your scratchwork in the margins of the test booklet You will not be given scrap paper during the exam and you may not perform scratchwork on your answer sheet Space is provided in your test booklet to do any necessary work or draw diagrams If you are unsure of an answer guess However if you do guess guess wisely Use the process of elimination by going through each answer to a question and ruling out as many of the answer

choices as possible By eliminating three answer choices you give yourself a fifty fifty chance of answering correctly since there will only be two choices left from which to make your guess Mark your answers in the appropriate spaces on the answer sheet Fill in the oval that corresponds to your answer darkly completely and neatly You can change your answer but remember to completely erase your old answer Any stray lines or unnecessary marks may cause the machine to score your answer incorrectly When you have finished working on a section you may want to go back and check to make sure your answers correspond to the correct questions Marking one answer in the wrong space will throw off the rest of your test whether it is graded by machine or by hand You don t have to answer every question You are not penalized if you do not answer every question The only penalty results from answering a question incorrectly Try to use the guessing strategy but if you are truly stumped by a question remember that you do not have to answer it Work quickly and steadily You have a limited amount of time to work on each section so you need to work quickly and steadily Avoid focusing on one problem for too long Before the Test Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test On the night before the test gather together the materials you will need the next day Your admission ticket Two forms of identification e g driver s license student identification card or current alien registration card Two No 2 pencils with erasers Directions to the test center A watch if you wish but not one that makes noise as it may disturb other test takers On the day of the test you should wake up early after a good night s rest and have breakfast Dress comfortably so that you are not distracted by being too hot or too cold while taking the test Also plan to arrive at the test center early This will allow you to collect your thoughts and relax before the test and will also spare you the stress of being late If you arrive after the test begins you will not be admitted to the test center and you will not receive a refund During the Test When you arrive at the test center try to find a seat where you feel most comfortable Follow all the rules and instructions given by the test supervisor If you do not you risk being dismissed from the test and having your scores canceled Once all the test materials are passed out the test instructor will give you directions for filling out your answer sheet Fill this sheet out carefully since this information will appear on your score report After the Test When you have completed the SAT II Chemistry Subject Test you may hand in your test materials and leave Then go home and relax When Will I Receive My Score Report and What Will It Look Like You should receive your score report about five weeks after you take the test This report will include your scores percentile ranks and interpretive information
