Things to Make and Do in the Fourth Dimension Matt Parker,2014-12-02 A book from the stand up mathematician that makes math fun again Math is boring says the mathematician and comedian Matt Parker Part of the problem may be the way the subject is taught but it s also true that we all to a greater or lesser extent find math difficult and counterintuitive This counterintuitiveness is actually part of the point argues Parker the extraordinary thing about math is that it allows us to access logic and ideas beyond what our brains can instinctively do through its logical tools we are able to reach beyond our

innate abilities and grasp more and more abstract concepts In the absorbing and exhilarating *Things to Make and Do in the Fourth Dimension* Parker sets out to convince his readers to revisit the very math that put them off the subject as fourteen year olds Starting with the foundations of math familiar from school numbers geometry and algebra he reveals how it is possible to climb all the way up to the topology and to four dimensional shapes and from there to infinity and slightly beyond Both playful and sophisticated *Things to Make and Do in the Fourth Dimension* is filled with captivating games and puzzles a buffet of optional hands on activities that entices us to take pleasure in math that is normally only available to those studying at a university level *Things to Make and Do in the Fourth Dimension* invites us to re learn much of what we missed in school and this time to be utterly enthralled by it [Zen Architecture](#) Paul Discoe,Alexandra Quinn,2008-09-10 Focuses on wood based Zen Buddhism architectural structures and renovations in the United States and Europe This book identifies the elements of Buddhism that are represented in his buildings and describes the trials and triumphs of blending building methods and codes with ancient Japanese joinery techniques *The Unfinished Global Revolution* Mark Malloch Brown,Mark Malloch-Brown,2011 *The Unfinished Global Revolution* is a front line view of the challenges of leadership and the importance of creating greater global cooperation The former United Nations Deputy Secretary General Mark Malloch Brown diagnoses the central global predicament of the 21st century As we have become more integrated we have also become less governed National governments are no longer equipped to address complex global issues From climate change to poverty international organizations have not yet been empowered to step into the breach *The Unfinished Global Revolution* chronicles how over the past few decades domestic problems from unemployment to environmental distress have international roots Increasingly ad hoc arrangements between NGOs civil society and the private sector are filling in the gap created by the failures of individual governments Malloch Brown urges us to embrace these evermore powerful international institutions and the values needed to underpin a truly globalist agenda the rule of law human rights and greater opportunity for all Now is the moment for creative statesmanship to form a new approach to global politics one that will produce stronger international institutions that revive rather than replace national governments Malloch Brown has been at the centre of recent world events Drawing on his experiences at the frontlines of international development from Cambodia to Darfur Washington to UN headquarters Malloch Brown provides a personal on the ground view of seemingly abstract challenges and forecasts the way forward in global politics This book should be required reading for all policy makers politicians and concerned citizens of the world
