German and Song 1740 - 1900 John Smeed,2020-01-30 Originally published in 1987 this volume charts the development of German song across a century and a half relating it both to poetry and to the cultural scene in Germany By emphasising genre rather than individual composers and while paying heed to

acknowledged masterpieces by quoting extensively from forgotten composers the book avoids historical over simplification and arrives at a fuller picture of this rich tradition In so doing it uncovers much neglected material The book investigates the relationship between German poets and composers and their native folk tradition It further explores the interaction between convention and innovation and demonstrates how one poem can be interpreted quite differently by different composers The book is accessible both to students of literature and music
