Bellah,2017-05-08 A New York Times Book Review Editors Choice An ABC Australia Best Book on Religion and Ethics of the Year Distinguished Book Award Sociology of Religion Section of the American Sociological

Association Religion in Human Evolution is a work of extraordinary ambition a wide ranging nuanced probing of our biological past to discover the kinds of lives that human beings have most often imagined were worth living It offers what is frequently seen as a forbidden theory of the origin of religion that goes deep into evolution especially but not exclusively cultural evolution Of Bellah s brilliance there can be no doubt The sheer amount this man knows about religion is otherworldly Bellah stands in the tradition of such stalwarts of the sociological imagination as Emile Durkheim and Max Weber Only one word is appropriate to characterize this book s subject as well as its substance and that is magisterial Alan Wolfe New York Times Book Review Religion in Human Evolution is a magnum opus founded on careful research and immersed in the reflective judgment of one of our best thinkers and writers Richard L Wood Commonweal Shock Waves Stephane Hallegatte, Mook Bangalore, Laura Bonzanigo, Marianne Fay, Tamaro Kane, Ulf Narloch, Julie Rozenberg, David Treguer, Adrien Vogt-Schilb, 2015-11-23 Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development But the two objectives cannot be considered in isolation they need to be jointly tackled through an integrated strategy This report brings together those two objectives and explores how they can more easily be achieved if considered together It examines the potential impact of climate change and climate policies on poverty reduction It also provides guidance on how to create a win win situation so that climate change policies contribute to poverty reduction and poverty reduction policies contribute to climate change mitigation and resilience building The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty but future impacts on poverty are determined by policy choices rapid inclusive and climate informed development can prevent most short term impacts whereas immediate pro poor emissions reduction policies can drastically limit long term ones *Biostatistics* Wayne W. Daniel, Chad L. Cross, 2018-11-13 The ability to analyze and interpret enormous amounts of data has become a prerequisite for success in allied healthcare and the health sciences Now in its 11th edition Biostatistics A Foundation for Analysis in the Health Sciences continues to offer in depth guidance toward biostatistical concepts techniques and practical applications in the modern healthcare setting Comprehensive in scope yet detailed in coverage this text helps students understand and appropriately use probability distributions sampling distributions estimation hypothesis testing variance analysis regression correlation analysis and other statistical tools fundamental to the science and practice of medicine Clearly defined pedagogical tools help students stay up to date on new material and an emphasis on statistical software allows faster more accurate calculation while putting the focus on the underlying concepts rather than the math Students develop highly relevant skills in inferential and differential statistical techniques equipping them with the ability to organize summarize and interpret large bodies of data Suitable for both graduate and advanced undergraduate coursework this text retains the rigor required for use as a professional reference *Distributed Systems* Sunil Kumar, 2017 Focuses on the design principles of distributed computing and communication networks Topics covered include Design Issues and
