[20,000 Leagues Under the Sea Annotated](#) Nov 25 2023 *Twenty Thousand Leagues Under the Sea* is a classic science fiction novel by French writer Jules Verne, published in 1870. It is about the fictional Captain Nemo and his submarine, Nautilus, as seen by one of his passengers, Professor Pierre Aronnax.

[20,000 Leagues Under the Seas](#) Dec 27 2023 When an unidentified "monster" threatens international shipping, French oceanographer Pierre Aronnax and his unflappable assistant Conseil join an expedition organized by the US Navy to hunt down and destroy the menace. After months of fruitless searching, they finally grapple with their quarry, but Aronnax, Conseil, and the brash Canadian harpooner Ned Land are thrown overboard in the attack, only to find that the "monster" is actually a futuristic submarine, the Nautilus, commanded by a shadowy, mystical, preternaturally imposing man who calls himself Captain Nemo. Thus begins a journey of 20,000 leagues—nearly 50,000 miles—that will take Captain Nemo, his crew, and these three adventurers on a journey of discovery through undersea forests, coral graveyards, miles-deep trenches, and even the sunken ruins of Atlantis. Jules Verne's novel of undersea exploration has been captivating readers ever since its first publication in 1870, and Frederick Paul Walter's reader-friendly, scientifically meticulous translation of this visionary science fiction classic is complete and unabridged down to the smallest substantive detail.

The novel was originally serialized from March 1869 through June 1870 in Pierre-Jules Hetzel's periodical, the *Magasin d'•ducation et de R•cr•ation*. It tells the story of Professor Aronnax, Ned Land and Conseil as they get taken captive by the fearsome Captain Nemo aboard the *Nautilus*. There, they are taken on an undersea adventure which they really enjoy, but still kind of resent being held virtual prisoners by Nemo. The 20,000 Leagues in the title refers not to the depth but to the distance they travel, even going as far as the South Pole. An enjoyable romp under the oceans. Verne was born to bourgeois parents in the seaport of Nantes, where he was trained to follow in his father's footsteps as a lawyer, but quit the profession early in life to write for magazines and the stage. His collaboration with the publisher Pierre-Jules Hetzel led to the creation of the *Voyages extraordinaires*, a widely popular series of scrupulously researched adventure novels including *Journey to the Center of the Earth* (1864), *Twenty Thousand Leagues Under the Sea* (1870), and *Around the World in Eighty Days* (1873).

20000 Leagues Under the Sea May 20 2023 *Twenty Thousand Leagues Under the Sea: A Tour of the Underwater World* During the year 1866, ships of several nations spot a mysterious sea monster, which some suggest to be a giant narwhal. The United States government assembles an expedition in New York City to find and destroy the monster. Professor Pierre Aronnax, a French marine biologist and narrator of the story, who happens to be in New York at the time, receives a last-minute invitation to join the expedition, which he accepts. Canadian whaler and master harpoonist Ned Land and Aronnax's faithful servant Conseil are also brought aboard. The expedition departs Brooklyn aboard the United States Navy frigate *Abraham Lincoln* and travels south around Cape Horn into the Pacific Ocean. After a long search, the ship finds the monster and then attacks the beast, which damages the ship's rudder. The three protagonists are then hurled into the water and grasp hold of the "hide" of the creature, which they find, to their surprise, to be a submarine very far ahead of its era. They are quickly captured and brought inside the vessel, where they meet its enigmatic creator and commander, Captain Nemo. The rest of the story follows the adventures of the protagonists aboard the creature--the submarine, the *Nautilus*--which was built in secrecy and now roams the seas free from any land-based government. Captain Nemo's motivation is implied to be both a scientific thirst for knowledge and a desire for revenge upon (and self-imposed exile from) civilization. Nemo explains that his submarine is electrically powered and can perform advanced marine biology research; he also tells his new passengers that although he appreciates conversing with such an expert as Aronnax, maintaining the secrecy of his existence requires never letting them leave. Aronnax and Conseil are enthralled by the undersea adventures, but Ned Land can only think of escape. They visit many places under the ocean, some real-world and others fictional. The travelers witness the real corals of the Red Sea, the wrecks of the battle of Vigo Bay, the Antarctic shelves, the Transatlantic telegraph cable and the legendary submerged land of Atlantis. The travelers also use diving suits to hunt sharks and other marine life with air-guns and have an underwater funeral for a crew member who died when an accident occurred under mysterious conditions inside the *Nautilus*. When the *Nautilus* returns to the Atlantic Ocean, a pack of "poules" (usually translated as a giant squid, although in French "poulpe" means "octopus") attacks the vessel and kills a crew member. Throughout the story Captain Nemo is suggested to have exiled himself from the world after an encounter with the forces that occupied his country that had devastating effects on his family. Not long after the incident of the poules, Nemo suddenly changes his behavior toward Aronnax, avoiding him. Aronnax no longer feels the same and begins to sympathize with Ned Land. Near the end of the book, the *Nautilus* is attacked by a warship of some nation that had made Nemo suffer. Filled with hatred and revenge, Nemo ignores Aronnax's pleas for mercy. Nemo--nicknamed "angel of hatred" by Aronnax--destroys the ship, ramming it just below the waterline, and consequently sinking it into the bottom of the sea, much to Aronnax's horror, as he watches the ship plunge into the abyss. Nemo bows before the pictures of his wife

and children and..

20,000 Leagues Under the Sea Aug 23 2023 Jules Verne (1828-1905) is one of the most recognizable names in Western literature, coming to be known as one of the Fathers of Science-Fiction. Although he studied to be a lawyer and held stock trading jobs, he quickly learned that he had a knack for weaving adventurous stories of travels and expeditions. It didn't hurt that one of his teachers may have been inventor Brutus de Villeroi, who created the first submarine for the U.S. Navy. Verne wrote about air travel and space travel 50 years before either was possible. One of his most famous works is 20,000 Leagues Under the Sea, published in 1870. The star of the book, the submarine Nautilus, was developed by Verne after a real sub named Nautilus, and Verne had access to models of the French submarine Plongeur in the late 1860s. The story is about the expedition of the Nautilus, captained by Captain Nemo and told from the perspective of Professor Pierre Aronnax. Like Melville's Moby Dick, the story is ostensibly about an expedition chasing down a large sea creature, but there are metaphors throughout the book that are meant to symbolize society and civilization. 20,000 Leagues Under the Sea continues to be a widely read and globally popular classic.

In Journey to the Center of the Earth, readers were brought face to face with prehistoric creatures deep within the bowels of the Earth. In Around the World in 80 Days, Jules Verne helped make the world seem a little smaller, and accessible to young adventurers, spurring many to attempt a voyage around the world.

20,000 Leagues Under the Seas Sep 23 2023 The classic Jules Verne science fiction story about the adventures of three men who unwillingly become part of the crew of the Nautilus, the incredibly advanced submarine of Captain Nemo. Unlike the Disney movie, this novel contains much more about the oceans and the life under the surface than it does in giant squid fights (although that is in the book as well). Careful readers will note that the title of this edition reflects the original Verne title using the word "Seas." This refers to the many different seas in which they travel. Though portrayed as a sort of megalomaniac, Nemo is actually a tortured man who lost his family and is haunted by their loss. Prof. Aronnax, the key character, both admired and loathes the man for his scientific creations and his cold-hearted attacks on surface ships. This is a fascinating book, and is another example of how far advanced Verne's level of thinking was for his time. Text was taken from an original French edition; illustrations from a later printing.
