***Boating Skills and Seamanship, 14th Edition* Mar 18 2024**

Learn the essentials of seamanship from one of the world's premier boating organizations Developed and refined through 40 years of Coast Guard Auxiliary training courses, *Boating Skills and Seamanship* is your perfect introduction to recreational boating's fundamentals. Great for beginning and intermediate powerboaters alike, it offers you the basics of choosing, equipping, and handling a small to midsize

powerboat. This updated edition of the Coast Guard Auxiliary's classic boating skills manual will answer all your questions on: Selecting the right boat--whether a 10-foot skiff or a 35-foot cruiser Essential equipment, both required and recommended The latest electronic navigation Personal Locator Beacons (PLBs) and private communication services, e.g., SPOT devices and others Stability and safe loading Boat handling and seamanship on coastal and inland waters Trailering a boat Navigation and the rules of the nautical road And much more! Approved by the National Association of State Boating Law Administrators (NASBLA), with chapter review questions and answers, Boating Skills and Seamanship is the ideal study and reference guide for anyone taking a state boating license exam or seeking better boating skills and knowledge.

***Water Wise* Aug 19 2021 The U.S. boating public can improve their safety preparedness and prevention with this new all-in-one boating safety book. The book is geared to operators of large and small recreational boats, in all waterways nationwide. Water Wise presents the information skippers need in a very readable, direct way. Chapters cover safe practices, weather, PFDs and survival rafts, signals, survival, first aid, fire fighting, and more. It is well illustrated with line drawings and photographs.**

***Safe Skipper* Oct 13 2023 Whether out for an afternoon's sail or embarking on a long offshore passage, there is always an element of chance and uncertainty about being at sea. To be responsible for the wellbeing of both crew and vessel, a good skipper needs to know their limitations and ensure they are operating well within the margins of safety. Safe Skipper is a practical and thought provoking guide for yacht skippers of all levels of experience, full of invaluable advice and tips on how to reduce to the minimum the risks of mishaps and equipment failure at sea. There's a wide range of information on seamanship, preparation, seaworthiness, gear, boat handling, leadership, teamwork, watch keeping, communications, navigation, weather and emergency procedures, all delivered in a highly practical, lively, non-preachy fashion. Included throughout are useful checklists, box-outs and case studies of accidents and their causes, with survivors' testimonials and**

explanations of how disasters were avoided, or could have been, all of which provides valuable lessons for everyone who goes to sea.

Basic Boating Safety Feb 17 2024 We're all familiar with the admonition "You're In Command" and it has special meaning when it comes to boating safety. As the operator of your vessel your #1 job is not to give your guests a good time or reel in the trophy fish. Your #1 job is assuring a safe boating experience. Your basic boating safety responsibilities focus on three areas: equipment, environment and operator.

Pleasure Boat Loading Related Accident Education Apr 07 2023 The Coast Guard has undertaken research to identify educational alternatives in its long term efforts to improve the safety of recreational boating. Other organizations involved in boating safety education may find the illustrative approaches valuable in designing their boating safety education efforts. This project deals with educational solutions to loading related pleasure boat accidents. It was conducted in conjunction with two other projects to offer an illustrative overall educational program for loading related and collision pleasure boat accidents. The intent of this project is to establish educational content and methods that address the more serious loading related accident causes and will offer potential for reducing accidents and fatalities. The major loading related accident causes have been identified, and demographic characteristics were determined for operators of boats involved in the more frequently occurring accidents. A survey to determine boaters' attitudinal response to certain boating safety issues has been conducted. The results of the survey are suggested attitudinal resources for planning an educational program. Four personality inventories were also administered to boaters, but the results of the study were not conclusive. Educational program objectives, program message content, delivery systems and considerations for execution of the program are being recommended. If the recommended plan is undertaken, a small scale mass media effort would be required. Other recommended educational materials would be made available from the Coast Guard at the request of local or state agencies and private organizations that offer formal boating courses. (Author).
