Advanced Cardiovascular Life Support (ACLS) Instructor Manual AHA, American Heart Association Staff, 2011-05 Product 90 1011 Distance Education for Teacher Training Hilary Perraton, 2002-03-11 Distance education combining the use of correspondence texts broadcasting and limited opportunities for face to face study has been used in at least a hundred teacher training programmes over the last 25 years Distance Education for Teacher Training is the first comparative review of the use of distance education and open learning for the training and upgrading of teachers The book contains case studies using a broadly common format both to describe and analyse distance teacher training programmes in eleven countries across five continents The case studies describe the methods used to examine how far the craft of teaching can be studied at a distance Using a standardised microeconomic framework they provide unique data on the comparative costs of training teachers by distance and conventional methods The authors then draw general conclusions about the advantages and drawbacks of using distance education or open learning about the conditions for success and about comparative effects and costs Distance Education for Teacher Training will be of value to all concerned with teacher education whether in developing or industrialised countries and to those working in and planning for distance education and open learning Pediatric Advanced Life Support (PALS) Provider Handbook Karl Disque, 2016-11-14 The Save a Life Initiative has just released its newest course Pediatric Advanced Life Support PALS This manual is based on the 2015 2020 Pediatric Advanced Life Support guidelines published by the American Heart Association The Pediatric Advanced Life Support PALS Provider Handbook is a comprehensive resource intended for health care professionals currently enrolled in a Pediatric Advanced Life Support Certification or Recertification Course It serves as the primary training material for PALS Certification and Recertification courses Although it is primarily intended for use during certification courses the handbook was also created to serve as daily reference material for health care professionals Information covered in the handbook includes EKG and electrical therapy review pediatric respiratory failure and more Specific PALS Algorithms and more are also included within the handbook All material included in this handbook is delivered in a manner meant to enhance learning in the most comprehensive and convenient way possible 2020 Handbook of Emergency Cardiovascular Care for Healthcare Providers American Heart Association, 2020-10-21 20 1100 **BLS Reference Card** American Heart Association, 2020-10-21 20 1132 *Pediatric Emergency Assessment, Recognition, and Stabilization* Frank X. Doto, Brenda Drummonds, American Heart Association, 2007 Instructor CD contents include Precourse materials Course materials Evaluation materials Resources *European Paediatric Advanced Life Support* Patrick Van de Voorde, 2015-12-02 **Machine Scoring of Student Essays** Patricia Freitag Ericsson, Richard Haswell, 2006-03-15 The current trend toward machine scoring of student work Ericsson and Haswell argue has created an emerging issue with implications for higher education across the disciplines but

with particular importance for those in English departments and in administration The academic community has been silent on the issue some would say excluded from it while the commercial entities who develop essay scoring software have been very active Machine Scoring of Student Essays is the first volume to seriously consider the educational mechanisms and consequences of this trend and it offers important discussions from some of the leading scholars in writing assessment Reading and evaluating student writing is a time consuming process yet it is a vital part of both student placement and coursework at post secondary institutions In recent years commercial computer evaluation programs have been developed to score student essays in both of these contexts Two year colleges have been especially drawn to these programs but four year institutions are moving to them as well because of the cost savings they promise Unfortunately to a large extent the programs have been written and institutions are installing them without attention to their instructional validity or adequacy Since the education software companies are moving so rapidly into what they perceive as a promising new market a wider discussion of machine scoring is vital if scholars hope to influence development and or implementation of the programs being created What is needed then is a critical resource to help teachers and administrators evaluate programs they might be considering and to more fully envision the instructional consequences of adopting them And this is the resource that Ericsson and Haswell are providing here
