According to recent research, the best way to make new connections in a child's brain is by building on something already known. A child who loves a book will listen to it repeatedly, maintaining interest. Using a selected book in a number of consecutive preschool storytimes, but presenting it differently each time, can help children learn new skill sets. This book presents a new approach to storytime, one that employs repetition with variety to create an experience which helps children connect and engage with the story on a higher level. Diamant-Cohen, recently awarded the 2013 ASCLA Leadership and Professional Achievement Award, and Hetrick offer a year's worth of activities specifically designed to address multiple intelligences through a repetition-based process. Incorporating recent theories on developmental learning, this book includes Scripts for 8 different books, with enough activities to repeat each one for six weeks, along with lists of optional alternative books Planning aids such as outlines of storytime sessions, a fill-in-the-blanks planning sheet, questions for evaluation, and tips for enhanced storytimes using props and crafts Detailed but straightforward explanations of theory and research that will help readers communicate effectively with parents, caregivers, and other stakeholders From setup to execution, here's everything you need to create and implement a successful, elevated storytime. Gilbert and his first-grade classmates are nervous about their performance on the last day of school, curious about the awards they will receive, sad to be leaving their teacher, and excited about summer vacation. This is a vital book for those who care about the environment, society and deploying new technology to check the destructive power of humankind.- Allan Thornton, President, Environmental Investigation Agency, Washington, DC., and recipient of the Albert Schweitzer Medal This book will shake conventional environmental

wisdom to its roots. ... A landmark work that should be read by environmentalists and businesspersons alike.- Patrick Moore, cofounder, Greenpeace; president, GreenspiritIn Our Molecular Future [Mulhall] neatly outlines why our increasing ability to manipulate single atoms and molecules is a concern, and lays out the opportunities and threats this technology presents. And it's surprisingly readable, unlike most of the nanobabble in the science journals. In the end, as Mulhall admits, he poses more questions than he answers. But that's a good place to start.-New ScientistI just finished reading Douglas Mulhall's outstanding new book Our Molecular Future . . . and I highly recommend it. Put this one at the top of your list! . . . In an easy to read format, with very few forays into geek-speak, Mulhall presents his well considered and thoroughly researched theories. Overall, an excellent overview for those who wish to understand how disruptive and enabling technologies may save us from ourselves and from mother nature. And along the way you will learn a lot about how nanoscale technologies may enhance our lives, provide abundance for all, and greatly raise the standard of living for everyone. . . . Rating: five stars out of five.- Rocky Rawstern, Nanotech NowWhat Alvin Toffler's Future Shock was to the 20th century, Our Molecular Future will be to the 21st century.'What will happen to our jobs, health care, and investments when the molecular revolution hits?How might artificial intelligence transform our lives?How can molecular technologies help us cope with climate changes, earthquakes, and other extreme natural threats?Our Molecular Future explores some intriguing possibilities that answer these questions and many others. Douglas Mulhall describes the exponential changes that are about to be wrought by the nanotechnology and robotic revolutions, which promise to reduce the scale of computing to the nanometer—a billionth of a meter—while increasing computing power to almost unimaginable levels.The resulting convergence of genetics, robotics, and artificial intelligence may give us hitherto undreamed-of capacities to transform our environment and ourselves. In the not-so-distant future, our world may include machines that scour our arteries to prevent heart disease, cars and clothes that change color at our whim, exotic products built in our own desktop factories, and enhancements to our personal financial security despite greatly accelerated obsolescence.But while technology is making these fantastic leaps, we may also encounter surprises that throw us into disarray: climate changes, earthquakes, or even a seemingly improbable asteroid collision. These extremes are not the nightmare scenarios of sensationalists, Mulhall stresses, nor are many of them human induced. Instead, they may be part of nature's cycle—recurring more often than we've thought possible.The good news is that this convergence of catastrophe and technological transformation may work to our advantage. If we're smart, according to Mulhall, we can use molecular machines to protect ourselves from nature's worst extremes, and harness their potential benefits to usher in an economic renaissance.This visionary link between future technology and past disasters is a valuable guide for every one

of us who wants to be prepared for the twenty-first century.Further Praise for OUR MOLECULAR FUTURE:A provocative and profoundly convincing message from the future.- Graham Hancock, archaeological journalist and author of Fingerprints of the GodsIn a breezy, journalistic style, Our Molecular Future takes us on a tour through some of the issues that will preoccupy us * Where did Sinbad Sail? * Who Fired the Phoenix? * The Boy Who Cried Werewolf * The Great Rough Beast * Postscript on Prester John * The Secret of Hyperborea * What Gave All Those Mammoths Cold Feet? And many more--fictional? authoritative? fantastic? deadpan?--investigations into the real, the true...and the things that should be true PREFACE BY PETER S. BEAGLE ILLUSTRATED BY GEORGE BARR "Although the wombat is real and the dragon is not, nobody knows what a wombat looks like and everyone knows what a dragon looks like." Not a novel, not a book of short stories, Adventures in Unhistory is a book of the fantastic--a compendium of magisterial examinations of Mermaids, Mandrakes, and Mammoths; Dragons, Werewolves, and Unicorns; the Phoenix and the Roc; about places such as Sicily, Siberia, and the Moon; about heroic, sinister, and legendary persons such as Sindbad, and Aleister Crowley, and Prester John; and--revealed at last--the Secret of Hyperborea. The facts are here, the foundations behind rumors, legends, and the imaginations of generations of tale-spinners. But far from being dry recitals, these meditations, or lectures, or deadpan prose performances are as lively, as crazily inventive, as witty as the best fiction of the author, a writer praised by Gardner Dozois as "one of the great short story writers of our times." Who, on the subject of Dragons, could write coldly, dispassionately, guided only by logic? Certainly not Avram Davidson. Certain facts, these facts, deserve more than recitation; they deserve flourish, verve, gusto, style--the late, great Avram Davidson's unique voice. That prose which, in the words of Peter S. Beagle's Preface to this volume, "cries out to be read aloud." A parenting guide to raising "good" kids to be like the real Jesus, not the "nice" Jesus typically presented to children. Acclaimed singer-songwriter Rhett Miller teams up with Caldecott Medalist and bestselling artist Dan Santat in a riotous collection of irreverent poems for modern families. In the tradition of Shel Silverstein, these poems bring a fresh new twist to the classic dilemmas of childhood as well as a perceptive eye to the foibles of modern family life. Full of clever wordplay and bright visual gags--and toilet humor to spare--these twenty-three rhyming poems make for an ideal read-aloud experience. Taking on the subjects of a bullying baseball coach and annoying little brothers with equally sly humor, renowned lyricist Rhett Miller's clever verses will have the whole family cackling. In late 2017 the #MeToo movement went viral, opening up an explosive conversation about rape culture around the globe. In the US, someone is sexually assaulted every 98 seconds. More than 320,000 Americans over the age of twelve are sexually assaulted each year. One in thirty-three American men will be sexually assaulted or raped in his lifetime. Yet only 3 percent of rapists ever serve time in jail.

Keyser explores the patriarchal constructs that support rape culture. The keys to dismantling them: redefine healthy manhood and sexuality, believe victims, improve social and legal systems and workplace environments, evaluate media with a critical eye, and stand up to speak out. -- adapted from Amazon.com info Binge No More: A 7-day Program to Overcome Emotional Eating" In the vast tapestry of human experiences, our relationship with food stands out as one of the most primal, yet complex.
