Aircraft Surveillance Systems Busyairah Syd Ali,2017-11-06 The Communication Navigation and Surveillance CNS systems provide air traffic controllers with the information necessary to ensure the specified separation between aircraft and efficient management of airspace as well as assistance to flight crew for safe navigation However the radar systems that support air traffic management ATM and in particular air traffic control ATC are at their operational limit This is particularly acute in the provision of the ATC services in low altitude remote and oceanic areas Limitations in the current surveillance systems include unavailability of services in oceanic and remote areas limited services during extreme weather conditions and outdated equipment with limited availability of spare parts to support system operation These limitations have resulted in fatal accidents This book addresses the limitations of radar to support ATC in various operational environments identified and verified by analysing five years of safety data from Avinor the Air Navigation Service Provider ANSP in Norway It derives a set of taxonomy and from this develops a causal model for incident accident due to limitations in the surveillance system The taxonomy provides a new method for ANSPs to categorize incidents while the causal model is useful for incident accident investigations The book also provides theoretical justifications for the use of Automatic Dependent Surveillance Broadcast ADS B to overcome the limitations of radar systems and identify areas of improvements to enable seamless ATC services Written in a style that makes it accessible to non specialists Aircraft Surveillance Systems will be of interest to many in the field of aviation particularly ATM safety and accident incident investigation It will also offer a useful reference on this vital topic for air traffic management courses

Fifty Years of Invasion Ecology David M. Richardson, 2011-01-18 Invasion ecology is the study of the causes and consequences of the introduction of organisms to areas outside their native range Interest in this field has exploded in the past few decades Explaining why and how organisms are moved around the world how and why some become established and invade and how best to manage invasive species in the face of global change are all crucial issues that interest biogeographers ecologists and environmental managers in all parts of the world This book brings together the insights of more than 50 authors to examine the origins foundations current dimensions and potential trajectories of invasion ecology It revisits key tenets of the foundations of invasion ecology including contributions of pioneering naturalists of the 19th century including Charles Darwin and British ecologist Charles Elton whose 1958 monograph on invasive species is widely acknowledged as having focussed scientific attention on biological invasions

Legacy David L. Golemon, 2011-08-16 Fans of Clive Cussler Verne X Files and military tactical thrillers will find much to enjoy in this increasingly clever series Booklist on Leviathan The New York Times bestselling author of Leviathan and Primeval is back at full throttle with an adrenaline pumping addition to the Event Group Thriller Series The United States is ready to make a triumphant return to the moon striking out boldly into the solar system in an attempt to regain the confidence of the heady days of the Apollo program The first of what are to be many missions to the lunar surface was designed to find the frozen water needed to prepare to build a base to launch an assault on Mars But a shocking discovery at Shackleton Crater brings the first Prometheus mission to an abrupt halt Remote robots uncover human skeletal remains and a base that had been destroyed countless millennia ago The information is sent back to earth where forensic analysis at NASA reveals the corpse to be over seven hundred million years old A secret this devastating cannot be kept forever and the news is leaked to the world Soon nations are thrown into a head long collision pitting governments against their own citizens as the flames of fundamentalism start a conflagration that threatens to engulf the world as a race to return the moon is on The Event Group is tasked to unravel the mystery and to offer something that can either explain our ancient visitor or at least keep the world from descending into chaos Colonel Jack Collins once again leads a team of the world s greatest scientists and philosophers on a journey that will take the Event Group to the airless world of space But while a battle rages over the truth of our heritage the Event Group realizes that this may not be humanity s war alone Could something else someone else be coming to finish a war that they started almost a billion years ago
