Jones, 2001-01-01 The special education area of deafblind severe disabilities is a highly specialized area involving a close working relationship among medical and educational professionals In this book author Jones presents a very complete package of information for the educator of children with severe disabilities The book includes detailed diagnostic information so that the teacher will understand the physical mental social and educational status of the student The materials allow the teacher to plan for skill

development based on the specific deficits of the child in relation to the skills needed. The main features of this new Second Edition remain to provide a teacher training text and resource volume for teachers and other professionals serving not only students with deafblindness and severe disabilities but also children of any disability functioning within the sensorimotor stage of development. The new edition also provides under one cover theoretical background information, medical information, diagnostic information, and specific instructional information for classroom teachers and related service professionals to use in determining functional abilities for program planning and writing IEPs, collecting data to monitor IEPs, and ideas for hands-on materials that teachers can create and use for instruction in their classrooms. Each chapter begins with a brief outline, discusses background medical information and theory, discusses evaluation, diagnosis, programming, and IEP monitoring, and ends with a summary. Also included are the new research and developments in the field and an expanded view of motor skills. Tables have been reformatted at the back of each chapter. A major addition to this text is the focus on Snoezelen, which includes developing a Snoezelen resource room, designing the room with placement of the special materials, and specific ways of using the Snoezelen room and the sensory stimulation materials for relaxation, leisure, and enjoyment.

Understanding, Developing, and Writing Effective IEPs Roger Pierangelo, George Giuliani, 2007-04-06. The authors tackle an often complex process in an understandable, sequential manner. Mary L. Jackson, Resource Teacher, Roosevelt Elementary, Kingsport, TN. Clear, helpful answers for educators involved in developing Individualized Education Programs. Creating and evaluating Individualized Education Programs (IEPs) for students with disabilities is a major responsibility for teachers and school leaders, yet the process involves legal components not always understood by educators. In *Understanding, Developing, and Writing Effective IEPs*, legal and special education experts Roger Pierangelo and George Giuliani provide K-12 educators with a clear, step-by-step plan for IEP development that helps guarantee a Free and Appropriate Public Education (FAPE) in the Least Restrictive Environment (LRE) for students with disabilities. Frequently Asked Questions and a glossary of easy-to-understand special education terminology enable every member of the IEP team to develop a meaningful functional program that meets a student's unique needs. Aligned with the latest reauthorization of IDEA 2004, this practical resource also includes descriptions of the IEP process, sample materials from authentic IEPs, checklists, forms, and reproducibles for planning an effective IEP meeting, guidelines that encourage positive collaboration between educators and families. Ideal for teachers and administrators, this jargon-free text provides techniques, suggestions, and information for all aspects of the IEP process.
