

BULLYING.

By: Kristine Laurio & Hermina Palacios

6th Period

Bullying isn't just punching someone in the face or someone calling you names. Bullying is a lot more than that. There are different types of bullying. Here are some examples, physical, verbal, indirect, social alienation, and cyber bullying. Did you know that an estimated 200 million children and youth around the world are being bullied? It's true that much people are being bullied.

Physical bullying is any kind of physical contact that could hurt someone. Like punching, pushing, kicking, hitting, and more. For example, if someone came up to you and shoved you to the ground that would be physical bullying. If someone just punched you in the face it would be physical bullying. Even if someone's poking you and you don't like it that's physical bullying.

Verbal bullying is name calling, making offensive remarks, or joking about someone's race, religion, social status, gender, or the way that they look. 46.5% of bullying in schools is verbal bullying. If someone made fun of the way you look that's verbal bullying. If someone called you stupid that's verbal bullying. Verbal aggression is when a bully teases someone. It is also making verbal threats of violence or aggression against someone's personal property.

Indirect bullying is spreading rumors about someone, gossiping about it, and excluding others from groups. Indirect bullying is 18.5% of all bullying. If you spread a rumor about a girl in class just because you thought it was funny or if it was because you didn't like her that would be indirect bullying.

Social alienation is when a bully excludes someone from a group on purpose. It also includes spreading rumors, or pointing out someone else's differences. For example if a group of people didn't want to hang out with this girl from their class because they thought she was weird, that would be social alienation.

Intimidation is when a bully threatens or intimidates someone else enough to get the person to do what they want. For example if you told a person to give you money or

Cyberbullying through the New Media Peter K. Smith,Georges Steffgen,2013-12-04 Cyberbullying is one of the darker and more troubling aspects to the growing accessibility of new media technologies Children in developed countries engage with cyberspace at younger and younger ages and the use of the internet as a means to bully and harass has been greeted with alarm by educationalists parents the media and governments This important new book is the result of a four year international collaboration funded by the EU to better understand how we can cope and confront cyberbullying and how new media technologies can be used to actually support the victims of such abuse The articles initially define the historical and theoretical context to cyberbullying before examining key issues involved in managing this pervasive phenomenon Coverage includes The definition and measurement of cyberbullying The legal challenges in tackling cyberbullying across a number of international contexts The role of mobile phone companies and Internet service providers

in monitoring and prevention How the media frame and present the issue and how that influences our understanding How victims can cope with the effects of cyberbullying and the guidelines and advice provided in different countries How cyber bullying can continue from school into further education and the strategies that can be used to prevent it The ways in which accessing youth voice or maximising the contribution of young people themselves to the research process can enhance our understanding The book concludes with practical guidance to help confront the trauma that cyberbullying can cause It will be a valuable resource for researchers students policy makers and administrators with an interest in how children and young people are rendered vulnerable to bullying and harassment through a variety of online channels

Cyberbullying Trijntje Völlink, Francine Dehue, Conor Mc Guckin, 2015-10-23 The study of cyberbullying has exploded since its first appearance in a peer reviewed journal article in 2005 Cyberbullying From theory to intervention aims to make clear and practical sense of this proliferation of coverage by defining the problem of cyberbullying and examining its unique features The volume provides a thorough overview of state of the art research into the phenomenon and discusses the development and evaluation of interventions to prevent and combat it Whereas most research papers offer limited space to describe actual intervention methods this book provides tremendous insight into the different theoretical methods and practical strategies available to combat cyberbullying Part One provides readers with a critical review of the existing research literature and collects insights from international researchers involved in bullying and cyberbullying research tackling key questions such as how is cyberbullying defined what is the overlap with traditional bullying and what are the negative consequences of cyberbullying Part Two gives an overview of the development and content of evidence based ICT interventions aimed at preventing and combating bullying and cyberbullying In addition some of the important outcomes of the effect evaluations will be described The book s final chapter integrates the information from Part One with advice regarding practical applications from Part Two

Cyberbullying From theory to intervention is essential reading for academics and researchers concerned with both cyberbullying and traditional bullying It can be used in graduate seminars or advanced undergraduate courses in cyberbullying and will also be of interest to teachers field experts and organisations involved and disseminating cyberbullying solutions
