Practicing Management Alan S. Gutterman, 2019-03-27 A wide range of conceptualizations of management have been offered, and it is often difficult for managers to fully understand their roles within the organization. However, managers striving for effectiveness would do well to invest effort into understanding the functions, roles, and skills associated with managerial positions. In order to be adroit practitioners of their craft, managers must understand these basic concepts as well as the different levels of managerial effectiveness, how they are measured, the styles available to managers, and the factors that determine which style might be preferred in a particular instance. This book addresses a wide array of topics relating to the practice of management, including the roles and activities expected from an effective manager, specific managerial skills, styles of management, management systems, and managing in developing countries.

Comparative Management Studies Alan S. Gutterman, 2019-04-04 All managers, regardless of where they work, must understand certain basic concepts such as the functions, roles, and skills associated with the managerial position and the styles available to managers for use in any given situation. However, context matters, and it is essential that managers understand the role that culture plays in being effective in their positions. This book begins with a brief description of the history and evolution of management studies, continues with an overview of the scope and practice of comparative management studies, and provides examples of the research that has been done on cross-cultural transfer of management theories. In addition, the book includes materials on the search for and analysis of dimensions of management styles that can be used as a basis for creating models that can be used for comparison purposes.

The book begins by discussing the conclusion that future challenges require leaders to operate in increasingly complex and rapidly changing environments while providing a clear strategic vision. Shared are the results prompted by five postulated future economic and social megatrends; the interviewed experts each provided unique insights and views on future work environments and leadership issues.
