The Production of Space Henri Lefebvre, 1992-04-08 Henri Lefebvre has considerable claims to be the greatest living philosopher His work spans some sixty years and includes original work on a diverse range of subjects from dialectical materialism to architecture urbanism and the experience of everyday life *The Production of Space* is his major philosophical work and its translation has been long awaited by scholars in many different fields The book is a search for a reconciliation between mental space the space of the philosophers and real space the physical and social spheres in which we all live In the course of his exploration Henri Lefebvre moves from metaphysical and ideological considerations of the meaning of space to its experience in the everyday life of home and city He seeks in other words to bridge the gap between the realms of theory and practice between the mental and the social and between philosophy and reality In doing so he ranges through art literature architecture and economics and further provides a powerful antidote to the sterile and obfuscatory methods and theories characteristic of much recent continental philosophy This is a work of great vision and incisiveness It is also characterized by its author's wit and by anecdote as well as by a deftness of style which Donald Nicholson Smith's sensitive translation precisely captures

The Art of Negotiation Michael Wheeler, 2013-10-08 A member of the world renowned Program on Negotiation at Harvard Law School introduces the powerful next generation approach to negotiation For many years two approaches to negotiation have prevailed the win win method exemplified in *Getting to Yes* by Roger Fisher William Ury and Bruce Patton and the hard bargaining style of Herb Cohen's *You Can Negotiate Anything* Now award winning Harvard Business School professor Michael Wheeler provides a dynamic alternative to one size fits all strategies that don't match real world realities *The Art of Negotiation* shows how master negotiators thrive in the face of chaos and uncertainty They don't trap themselves with rigid plans Instead they understand negotiation as a process of exploration that demands ongoing learning adapting and influencing Their agility enables them to reach agreement when others would be stalemated Michael Wheeler illuminates the improvisational nature of negotiation drawing on his own research and his work with Program on Negotiation colleagues He explains how the best practices of diplomats such as George J Mitchell dealmaker Bruce Wasserstein and Hollywood producer Jerry Weintraub apply to everyday transactions like selling a house buying a car or landing a new contract Wheeler also draws lessons on agility and creativity from fields like jazz sports theater and even military science

Dogen's Manuals of Zen Meditation Carl Bielefeldt, 1990-08-16 Zen Buddhism is perhaps best known for its emphasis on meditation and probably no figure in the history of Zen is more closely associated with meditation practice than the thirteenth century Japanese master Dogen founder of the Soto school This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization The Soto version of Zen meditation is known as just sitting a practice in which through the cultivation of the subtle state of nonthinking the meditator is said to be brought into perfect accord with the higher consciousness of the Buddha mind inherent in all beings This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization

Network Troubleshooting Tools Joseph D Sloan,2001-08-09 Over the years thousands of tools have been developed for debugging TCP IP networks They range from very specialized tools that do one particular task to generalized suites that do just about everything except replace bad Ethernet cables Even better many of them are absolutely free There s only one problem who has time to track them all down sort through them for the best ones for a particular purpose or figure out how to use them Network Troubleshooting Tools does the work for you by describing the best of the freely available tools for debugging and troubleshooting You can start with a lesser known version of ping that diagnoses connectivity problems or take on a much more comprehensive program like MRTG for graphing traffic through network interfaces There s tkined for mapping and automatically monitoring networks and Ethereal for capturing packets and debugging low level problems This book isn t just about the tools available for troubleshooting common network problems It also outlines a systematic approach to network troubleshooting how to document your network so you know how it behaves under normal conditions and how to think about problems when they arise so you can solve them more effectively The topics covered in this book include Understanding your network Connectivity testing Evaluating the path between two network nodes Tools for capturing packets Tools for network discovery and mapping Tools for working with SNMP Performance monitoring Testing application layer protocols Software sources If you re involved with network operations this book will save you time money and needless experimentation

Nudge Richard H. Thaler,Cass R. Sunstein,2009-02-24 Now available Nudge The Final Edition The original edition of the multimillion copy New York Times bestseller by the winner of the Nobel Prize in Economics Richard H Thaler and Cass R Sunstein a revelatory look at how we make decisions for fans of Malcolm Gladwell s Blink Charles Duhigg s The Power of Habit James Clear s Atomic Habits and Daniel Kahneman s Thinking Fast and Slow Named a Best Book of the Year by The Economist and the Financial Times Every day we make choices about what to buy or eat about financial investments or our children s health and education even about the causes we champion or the planet itself Unfortunately we often choose poorly Nudge is about how we make these choices and how we can make better ones Using dozens of eye opening examples and drawing on decades of behavioral science research Nobel Prize winner Richard H Thaler and Harvard Law School professor Cass R Sunstein show that no choice is ever presented to us in a neutral way and that we are all susceptible to biases that can lead us to make bad decisions But by knowing how people think we can use sensible choice architecture to nudge people toward the best decisions for ourselves our families and our society without restricting our freedom of choice

Lemon-Aid New Cars 2001 Louis-Philippe Edmonston,2000-10-01

Byways of Belief Conrad Noel, 2007-10 PREFACE THE Author of this very practical treatise on Scotch Loch Fishing desires clearly that it may be of use to all who had it He does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible Everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible The writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general This section is interleaved with blank sheets for the readers notes The Author need hardly say that any suggestions addressed to the case of the publishers will meet with consideration in a future edition We do not pretend to write or enlarge upon a new subject Much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is dependent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing

Tea in Health and Disease Prevention Victor R Preedy, Vinood Patel, 2024-09-14 While there is a nearly universal agreement that drinking tea can benefit health information on the benefits or adverse effects of drinking tea is scattered leaving definitive answers difficult to ascertain *Tea in Health and Disease Prevention* Second Edition once again addresses this problem bringing together all the latest and most relevant information on tea and its health effects into one comprehensive resource This book covers compounds in black green and white teas and explores their health implications first more generally then in terms of specific organ systems and diseases With over 75% brand new content this fully reorganized updated edition covers a wider range of tea varieties and beneficial compounds found in tea such as epigallocatechin gallate and antioxidants *Tea in Health and Disease Prevention* Second Edition is an organized efficient resource that will help readers find quick answers to questions and will help inspire further studies for those interested in tea research This is a must have reference for researchers in food science and nutrition as well as nutritionists and dieticians Covers and compares features benefits and potential negative effects of the most important types of tea including green black and white Identifies therapeutic benefits of teas for new product development Offers a one stop shop for research in this area compiling both foundational and cutting edge topics into one resource Includes a dictionary of key terms other health effects of tea or extracts and a summary point section within each chapter for a quick reference

Agrobacterium: From Biology to Biotechnology Tzvi Tzfira, Vitaly Citovsky, 2007-12-25 *Agrobacterium* is a plant pathogen which causes the crown gall disease a neoplastic growth that results from the transfer of a well defined DNA segment transferred DNA or T DNA from the bacterial Ti tumor inducing plasmid to the host cell its integration into the host genome and the expression of oncogenes contained on the T DNA The molecular machinery needed for T DNA generation and transport into the host cell and encoded by a series of chromosomal *chv* and Ti plasmid virulence *vir* genes has been the subject of numerous studies over the past several decades Today *Agrobacterium* is the tool of choice for plant genetic engineering with an ever expanding host range that includes many commercially important crops flowers and tree species Furthermore its recent application for the genetic transformation of non plant species from yeast to cultivated mushrooms and even to human cells promises this bacterium a unique place in the future of biotechnological applications The book is a comprehensive volume describing *Agrobacterium* s biology interactions with host species and uses for genetic engineering
