These respected authors present principles and illustrative examples to help pre-service and in-service teachers plan well-organized social studies instruction that produces positive student outcomes. The Third Edition emphasizes the importance of using developmentally appropriate content and methods when helping students to develop social understanding and civic action, and includes a solid research base that is reflective of the current NCSS standards. Rather than advocating the elimination of the traditional content framework used to organize the

social studies curriculum ('expanding communities framework'), the authors call for retaining the most important topics that have traditionally been emphasized and for teaching these topics in 'more coherent and powerful ways.' Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated) Jan 28 2023 The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an

individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.
