the ground too many people and assets to protect and no plan in place to deal with these challenges In Firestorm journalist Edward Struzik visits scorched earth from Alaska to Maine and introduces the scientists firefighters and resource managers making the case for a radically different approach to managing wildfire in the 21st century Wildfires can no longer be treated as avoidable events because the risk and dangers are becoming too great and costly Struzik weaves a heart pumping narrative of science economics politics and human determination and points to the ways that we and the wilder inhabitants of the forests around our cities and towns might yet flourish in an age of growing megafires *Planning for Technology* Bruce M.
