**The Early Literacy Skills Builder program incorporates systematic instruction to teach both print and phonemic awareness. ELSB is a multi-year program with seven distinct levels and ongoing assessments so students progress at their own pace. Five years of solid research have been completed through the University of North Carolina at Charlotte, proving ELSB to be a highly effective literacy program and more effective than a sight-word only program. ELSB is based upon the principles of systematic and direct instruction. It incorporates scripted lessons, least-prompt strategies, teachable objectives, built-in lesson repetition, and ongoing assessments. The seven ELSB levels contain five structured lessons each. All students begin at Level 1. If a student struggles here, go back and administer Level A. Instruction is one-on-one or in small groups. Teach scripted lessons daily in two 30-minute sessions. On the completion of each level, formal assessments are given. ELSB includes everything you need to implement a multi-year literacy curriculum. Is e-learning at your organization chronically underfunded? Discover how you can create workplace solutions with minimal budget in e-Learning Solutions on a Shoestring. Author Jane Bozarth, recognized as e-Learning Centre's October 2005 Pick of the Month, provides the nuts-and-bolts information you need to incorporate e-learning solutions at minimal cost. She offers myriad strategies for building from-scratch programs, recycling, reusing, and repurposing resources; negotiating reasonable expenses for "store bought" e-learning products; and incorporating real-world ideas for assembling tools, techniques, and strategies into workplace solutions. Meeting the individual learning needs of every learner, every hour, of every day although espoused by educators, has only been a dream.....an impossible dream for educators facing student-teacher ratios of 25 to 1. But, alas, it is now a reality....a reality that is hiding in plain sight. Inevitable: Mass Customizing Learning (MCL) describes a detailed vision of how schools can change from the present outdated Industrial Age, assembly line structure to a mass customized learning structure with the capacity to meet the individual learning needs of every learner.....that's every learner, not some, not most, but every learner. iTunes, Amazon.com, Verizon, Wikipedia, and Google (to name a few) are doing it right now. They prove to us daily that mass customization is effective and efficient and...well...doable. Let's marry those powerful, customizing technologies with the power mission of educators to personalize learning. Everyone wins. The learner wins. And when the learner wins, so do educators, parents, society, and the economy. Inevitable provides a solid rationale for the structural change, identifies the proven technologies of today that make the vision doable, details the potential MCL has to motivate learners to high achievement, describes teacher roles that are highly professional, and outlines and concretely describes what school systems must do to make MCL a reality. The authors of Inevitable use a "weight bearing wall" metaphor to identify the Industrial Age walls (practices) that prevent us from meeting individual learner needs. Leaders are then shown how new customizing technology walls can replace those Industrial Age walls . . . and the roof will not fall in! Yes, leaders can operate a MCL system and still remain in control! The transformational change of MCL becomes clear, logical, and believable. Mass Customizing Learning is necessary and ..... well.... Inevitable . . . and this book describes how to do it.
