Colonial Origins of the American Constitution Donald S. Lutz, 1998 Presents 80 documents selected to reflect Eric Voegelin's theory that in Western civilization basic political symbolizations tend to be variants of the original symbolization of Judeo-Christian religious tradition. These documents demonstrate the continuity of symbols preceding the writing of the Constitution and all contain a number of basic symbols such as a constitution as higher law, popular sovereignty, legislative supremacy, the deliberative process, and a virtuous people. Media Programming Susan Tyler Eastman, Douglas A. Ferguson, 2009 This book is primarily about television and radio and it focuses on entertainment and informational programs coming to viewers as pre-produced units of content. Preface: This book provides students with information on the techniques and strategies used in the programming industry. This text covers all aspects of media programming for broadcast and cable television, radio, and the Internet. The authors explore how programs, units of content, are selected or not selected, how programs are arranged in schedules of various kinds, how programs are evaluated by the industry, and how they are promoted to audiences and advertisers. The book also delves into the limits of media programming arising from technology, regulations, policies, and marketing needs, as well as how things like human attention spans, lifestyle patterns, and economics determine the availability and arrangement of media entertainment content. <http://www.wadsworth.com>
