

Convertible: jointly

- ▷ Press the switch to the resistance point: All windows open as long as you press the switch.
- ▷ Press the switch beyond the resistance point: All windows open automatically. Press the switch again to stop the opening movement.
- ▷ Pull the switch: All windows close as long as you pull the switch.

After switching off the ignition

When the remote control is removed or the ignition is switched off, you can still operate the windows for approx. 1 minute as long as no door is opened.

For information on convenient operation via the remote control or the door lock, refer to page 29 or 32. For information on closing with convenient access, refer to Locking on page 30.

Pinch protection system

If the closing force exceeds a specific value as a window closes, the closing action is interrupted and the window reopens slightly.

 Despite the pinch protection system check and clear the window's travel path prior to closing it, otherwise the safety system might fail to detect certain kinds of obstructions, such as thin objects, and the window would continue closing.

Do not install any accessories that might interfere with window movement. Otherwise the pinch protection system could be impaired. Convertible: the rear windows are not equipped

with pinch protection. Therefore, watch them closely when closing to avoid personal injury. 

Closing without pinch protection

If there is an external danger, or if ice on the windows, etc., prevents you from closing the windows normally, proceed as follows:

1. Pull the switch past the resistance point and hold it there. Pinch protection is limited and the window reopens slightly if the closing force exceeds a certain value.
2. Pull the switch again past the resistance point within approx. 4 seconds and hold it there. The window closes without pinch protection.

Coupe: glass roof*, electric

 To prevent injuries, watch the glass roof while closing it.

Take the remote control with you when you leave the car, otherwise children could operate the roof and possibly injure themselves. 

Raising

Press the switch.

- ▷ The closed glass roof is raised and the sliding visor opens slightly.
- ▷ The open glass roof automatically travels into the raised position. The sliding visor remains completely open.

Opening, closing

- ▷ Press the switch backwards to the resistance point. The glass roof and the sliding visor open
