Beaverbrook, 1917 **The Education of Diverse Student Populations** Guofang Wan, 2008-06-19 This book takes up the
challenge of examining the thorniest educational issue from a global perspective It contributes to the evidence based
conversation among policy makers educators and researchers around the world about what works to improve the education
outcomes and what can make a bigger difference for the education of diverse students The eleven countries included the
United Kingdom Austria Canada the United States South Africa Ghana China Singapore Malaysia Australia and New Zealand
are unique and yet overlap in the sense that they all face similar challenges of teaching diverse students The authors being
education and cultural insiders discuss country specific policies efforts and best practices in the education of diverse
students share stories of success and failure and explore current best practices from global social political and economic
perspectives Built on previous theories and research it describes diverse students experiences in the global and information
age and searches for effective policies and practices that help these students to perform better in school and in life Readers
are forced to step outside of their own experiences and commonly held beliefs about education Conscious recognition that
there are other ways of doing things may result in new approaches that we have not explored before We hope the insights
lessons and conclusions drawn from examining this pressing education issue from a global perspective will help nations to
better understand and deal with it in their own educational system *Mini Down Under* Donn Anderson, 2009-03-02 Mini
