The Hidden Wealth of Cities Jon Kher

Kaw, Hyunji Lee, Sameh Wahba, 2020-02-13 In every city the urban spaces that form the public realm ranging from city streets neighborhood squares and parks to public facilities such as libraries and markets account for about one third of the city's total land area on average Despite this significance the potential for these public space assets typically owned and managed

by local governments to transform urban life and city functioning is often overlooked for many reasons other pressing city priorities arising from rapid urbanization poor urban planning and financial constraints The resulting degradation of public spaces into congested vehicle centric and polluted places often becomes a liability creating a downward spiral that leads to a continuous drain on public resources and exacerbating various city problems In contrast the cities that invest in the creation of human centered environmentally sustainable economically vibrant and socially inclusive places in partnership with government entities communities and other private stakeholders perform better They implement smart and sustainable strategies across their public space asset life cycles to yield returns on investment far exceeding monetary costs ultimately enhancing city livability resilience and competitiveness The Hidden Wealth of Cities Creating Financing and Managing Public Spaces discusses the complexities that surround the creation and management of successful public spaces and draws on the analyses and experiences from city case studies from around the globe This book identifies through the lens of asset management a rich palette of creative and innovative strategies that every city can undertake to plan finance and manage both government owned and privately owned public spaces
