Anthracite Reds, Vol. 2, is a documentary history of Communists in the Pennsylvania hard coal fields during the Great Depression decade, the "heyday of American Communism." During the 20th century about one million Americans passed through the Communist Party of the United States [CPUSA]. In the first half of the century in the Pennsylvania anthracite, hundreds of men and women, mostly Eastern and Southern European immigrants who lived and worked in the region, also joined the CPUSA. Many books have been written about American communism in diverse regional settings; yet, no author has penned a volume that deals with these American radicals in one of 20th century America's major industrial centers, the anthracite fields of northeastern Pennsylvania. Anthracite Reds serves several purposes. It can be read as a reference work that would be useful to libraries, museums, and researchers. It may also, however, be read as a compelling narrative that tells an interesting story for general readers. Part I. The early years. 1. The convulsions of affiliation -- 2. The process of bolshevization -- 3. Stalinism and the

The continuing debate in the United States over policies toward China and Vietnam provides the compelling occasion for reexamining the objectives and capability of Communist China and her relations with major countries in Asia. Economic development in mainland China during the first two decades of Communist control provides a typical example for the difficult task to transform a vast underdeveloped agrarian economy into a modern industrial one. In the first half of this period, a series of massive transformations of social and economic institutions was accompanied by a drafted industrialization program; the result was an impressive speed-up in economic growth. The second decade witnessed an economic crisis (1960-62) and a political upheaval (1966-68). These disruptions marred the economic performance over the period as a whole. Consequently, the long-term growth rate appears to have been only moderate. The Economy of Communist China reviews selected aspects of the economy. After examining the development strategy, it analyzes the quantitative trends and the structural changes. The book goes on to analyze the key factors contributing to the earlier growth and the elements responsible for the later disruption and finally assesses the impact of the Cultural Revolution on the Chinese economy and the prospects of the current Third Five-Year Plan. The text includes a bibliography of selected materials on Chinese economic development. Mao Zedong is regarded as one of the most controversial figures in modern world history. Having conquered the country, he led the People's Republic of China from its establishment as a Communist state in 1949 until the time of his death in 1976. Brilliant and ruthless, his legacy includes guerrilla warfare tactics, violent cultural revolutions, and enduring Communist propaganda. He was named one of the 100 most influential figures of the 20th century by "Time Magazine." The second volume in this special collection contains three important lectures and essays by Chairman Mao. \*Part 1 - On Guerrilla Warfare \*Part 2 - Problems of Strategy in Guerrilla War against Japan \*Part 3 - On Protracted War 100 Things You Should Know About Communism. Forty years ago, Communism was just a plot in the minds of a very few peculiar people. Today, Communism is a world force governing millions of the human

race and threatening to govern all of it. Who are the Communists? How do they work? What do they want? What would they do to you? For the past 10 years your committee has studied these and other questions and now some positive answers can be made. Some answers will shock the citizen who has not examined Communism closely. Most answers will infuriate the Communists. These answers are given in five booklets, as follows: 1. One Hundred Things You Should Know About Communism in the U. S. A. 2. One Hundred Things You Should Know About Communism and Religion. 3. One Hundred Things You Should Know About Communism and Education. 4. One Hundred Things You Should Know About Communism and Labor. 5. One Hundred Things You Should Know About Communism and Government. These booklets are intended to help you know a Communist when you hear him speak and when you see him work. The second volume of The Cambridge History of Communism explores the rise of Communist states and movements after World War II. Leading experts analyze archival sources from formerly Communist states to re-examine the limits to Moscow's control of its satellites; the de-Stalinization of 1956; Communist reform movements; the rise and fall of the Sino-Soviet alliance; the growth of Communism in Asia, Africa and Latin America; and the effects of the Sino-Soviet split on world Communism. Chapters explore the cultures of Communism in the United States, Western Europe and China, and the conflicts engendered by nationalism and the continued need for support from Moscow. With the danger of a new Cold War developing between former and current Communist states and the West, this account of the roots, development and dissolution of the socialist bloc is essential reading. This comprehensive study of China's Cold War experience reveals the crucial role Beijing played in shaping the orientation of the global Cold War and the confrontation between the United States and the Soviet Union. The success of China's Communist revolution En fremstilling i hovedtræk af kommunismens verdensudvikling i det 20. årh. gennem 18 behandlede faser, bl.a. kommunismen i Rusland, Europa, Asien, Mellemøsten, den russiske nazistiske ikke-angrebspagt, kommunistiske modstandsbevægelser under 2. Verdenskrig i Europa og Sydøstasien, Stalinismen i Rusland og Østeuropa, den kinesiske kommunisme og kommunismen efter Stalin. On the centennial of the founding of the Chinese Communist Party, the definitive history of how Mao and his successors overcame incredible odds to gain and keep power. Mao Zedong and the twelve other young men who founded the Chinese Communist Party in 1921 could hardly have imagined that less than thirty years later they would be rulers. On its hundredth anniversary, the party remains in command, leading a nation primed for global dominance. Tony Saich tells the authoritative, comprehensive story of the Chinese Communist

Party's rise to power against incredible odds, its struggle to consolidate rule and overcome self-inflicted disasters, and its thriving amid other Communist parties' collapse. Saich argues that the brutal Japanese invasion in the 1930s actually helped the party. As the Communists retreated into the countryside, they established themselves as the populist, grassroots alternative to the Nationalists, gaining the support they would need to triumph in the civil war. Once in power, however, the Communists faced the difficult task of learning how to rule. Saich examines the devastating economic consequences of Mao's Great Leap Forward and the political chaos of the Cultural Revolution, as well as the party's rebound under Deng Xiaoping's reforms. Leninist systems are thought to be rigid, yet the Chinese Communist Party has proved adaptable. From Rebel to Ruler shows that the party owes its endurance to its flexibility. But is it nimble enough to realize Xi Jinping's "China Dream"? Challenges are multiplying, as the growing middle class makes new demands on the state and the ideological retreat from communism draws the party further from its revolutionary roots. The legacy of the party may be secure, but its future is anything but guaranteed. Afterlives of Chinese Communism comprises essays from over fifty world-renowned scholars in the China field, from various disciplines and continents. It provides an indispensable guide for understanding how the Mao era continues to shape Chinese politics today. Each chapter discusses a concept or practice from the Mao period, what it attempted to do, and what has become of it since. The authors respond to the legacy of Maoism from numerous perspectives to consider what lessons Chinese communism can offer today, and whether there is a future for the egalitarian politics that it once promised. This is the second of three volumes containing The Epoch Times' special publication How the Specter of Communism Is Ruling Our World, by the Editorial Board of the 2004 editorial series Nine Commentaries on the Communist Party. Volume Two reveals the machinations of the communist specter within the education system to corrupt the minds of each generation; the judicial system in its attempt to pervert the law; and the arts, media, and popular culture, which are being subverted and used as tools to hasten humanity's demise. A mosaic of lives and voices illustrating the history of the Chinese Communist Party over the last hundred years. In the two-decade period from 1928 to 1948, the proletarian themes and issues underlying the Chinese Communist Party's ideological utterances were shrouded in rhetoric designed, perhaps, as much to disguise as to chart actual class strategies. Rhetoric notwithstanding, a careful analysis of such pronouncements is vitally important in following and evaluating the party's changing lines during this key revolutionary period. The function of the "proletariat" in the complex of policy issues and leadership struggles which developed under the precarious circumstances of those years had an importance out of all proportion to labor's relatively minor role in the post-1927 Communist led revolution. [1, 2] Selected Works of Mao Tse-Tung, Volume II focuses on the thoughts of Mao Tse-Tung on revolution, communism, war tactics, national unity, and

patriotism. The volume first discusses the policies, measures, and perspectives for resisting the invasion of Japan; mobilization of China's forces for victory in the war of resistance; and tasks following the establishment of Kuomintang-communist cooperation. The publication also takes a look at the situation and tasks in the anti-Japanese war following the fall of Shanghai and Taiyuan, including the opposition to class capitulationism and the relation between class and national capitulationism. The book examines the problems of strategy in the guerilla war against Japan and the establishment of base areas. Considerations include types and conditions for establishing base areas and expansion of base areas. The text also ponders on the role of the Chinese Communist Party in the national war, as well as patriotism and internationalism, party discipline and democracy, and expansion of the communist party and prevention of infiltration by enemy agents. The volume is a dependable source of data for readers interested in the philosophy of Mao Tse-Tung on communism, war, revolution, and patriotism. What is Communist Terrorism Communist terrorism is terrorism perpetrated by individuals or groups which adhere to communism and ideologies related to it, such as Marxism-Leninism, Maoism, and Trotskyism. Historically, communist terrorism has sometimes taken the form of state-sponsored terrorism, supported by communist nations such as the Soviet Union, China, North Korea and Kampuchea. In addition, non-state actors such as the Red Brigades, the Front Line and the Red Army Faction have also engaged in communist terrorism. These groups hope to inspire the masses to rise up and start a revolution to overthrow existing political and economic systems. This form of terrorism can sometimes be called red terrorism or left-wing terrorism. We have once again decided to publish in our series a source-text for the study of Communist ideology. This synopsis of Principles of Marxism Leninism 1 (published at the end of 1959 and widely distributed in the Soviet Union) appears as a sequel to that of the Principles of Marxist Philosophy which I published in 1959 as The Dogmatic Principles of Soviet Philosophy. This book is a corporate work, done by some forty Soviet philosophers, sociologists, economists, Party-theoreticians and propagandaists, under the direction of O. V. Kuusinen (member of the Praesidium of the Communist Party of the Soviet Union). Except for a few clarifications, we have restricted ourselves to presenting the most important parts of the original text in an original

translation which provides the material, in an authentic and handy 2 form, for our Institute's courses in Sovietology. In comparison to the other parts, the philosophical portions (Sections 1 and 2) have been held to a minimum since they repeat, for the most part, material which is already available in the synopsis of the Principles of Marxist Philosophy. I wish to thank the Rockefeller Foundation for their support which has made possible the research of our Institute as well as the preparation of the present work. J. M. BOCHENSKI 1 The original Russian title is: Osnovy marksizma-leninizma. Uebnoe posobie (Text book), Gosudarstvennoe izdatel'stvo politiceskoj literatury (State Publishing House for Political Literature), Moskva, 1959, 774 pages, 300 000 copies. This international bestseller plumbs recently opened archives in the former Soviet bloc to reveal the accomplishments of communism around the world. The book is the first attempt to catalogue and analyse the crimes of communism over 70 years. As a nurse I have been in situations where patients learned very bad news about the state of their health, news that was not received well by them, their families, or even their medical team. When preparing this book, my feelings were much the same as when I was in those situations. The bad news about the health of our nation is, like cancer in a patient's body, communism (also known as Marxism) has grown in the United States. Like cancer, it started with an unnoticed seed and grew insidiously with little sign or symptom. Now like cancer, communism is on the brink of overwhelming us. Because I know that knowledge of their cancer is essential to my patients' first step towards survival, I believe that knowledge of our communism is essential to the United States of America's first step towards survival. So within this book, I describe: how I learned about the symptoms (The Real Communist Threat Witnessed); the disease (the Introduction and Sections 1, 2, 3 and 4 of the Communist Manifesto); the signs and symptoms (President Obama's Communist Agenda); and the treatment and cure (Constitution versus Communist Manifesto: The War within America). Extremist Socialists, also known as Communists, like Extremist/Radical Islamists believe their ends justify their means (that is: lying, cheating, stealing, and killing). This set of four volumes is an indispensable reference work for the study of modern Russia in general and Soviet Communism in particular. Ever since its foundation on the eve of the twentieth century, the organization now called the Communist Party of the Soviet Union has been embodying its major policies in documents called 'resolutions and decisions.' These form a much more continuous and extensive record of the evolution of Soviet Communism than the writings of any single leader, and the standard Soviet anthology of these materials has gone through eight editions over a fifty-year period. Yet most of this essential material has been available only in Russian, and even in that language the standard editions have been marred by selectivity and editorial comment that is often politically motivated. At last students of modern Russian studies have access to a multi-volume work that not only presents the most important Communist Party resolutions and decisions in English, but also amplifies the standard Soviet anthology in

important respects and provides editorial explanation that is independent of Kremlin politics. The rich store of materials in these four volumes ranges from the formation of the party to the fall of Khrushchev, and it deals with a wide range of issues. The clearly organized volumes each contain a major introductory essay as well as shorter background essays on each party congress, conference or Central Committee plenum. The documents approved by these meetings are often fundamental in importance, but the centralist operation of the party in power has been such that many of the most vital decisions have been issued in the name of the Central Committee when there was no meeting of that body at all. It is one of the signal achievements of these volumes that the selection of materials included was based on a list of all known part decisions, whether or not they have been included in the main Soviet reference work. The four volumes in this series are edited as an integral set. Each contains a subject index in which Russian abbreviations and acronymic names are translated. Tables summarizing the personnel of the main party executive bodies since 1917 are also provided. At the same time each of the volumes is built around a coherent period in the development of Russian Communism, and each reflects the special features of its time. Volume 2 deals with the period from the October Revolution to the establishment of Stalin's regime. Documents from this period emphasize the transformation of the party into a new kind of bureaucratized authority, controlling such areas as the press, trade unions, armed forces, and youth organization. Factionalism within the party and its suppression are a major theme. The volume opens with the documents (previously unavailable in English) concerning Lenin's crisis of control within the Central Committee shortly after the seizure of power, and it goes on to provide extensive material on both Lenin's and Stalin's suppression of critical groups within the party. What does a Dutchman have to do with the rise of the Chinese Communist Party? Finding Allies and Making Revolution by Tony Saich reveals how Henk Sneevliet (alias Maring), arriving as Lenin's choice for China work, provided the communists with two of their most enduring legacies: the idea of a Leninist party and the tactic of the united front. Sneevliet strived to instill discipline and structure for the left-leaning intellectuals searching for a solution to China's humiliation. He was not an easy man and clashed with the Chinese comrades and his masters in Moscow. This new analysis is based on Sneevliet's diaries and reports, together with contemporary materials from key Chinese figures, and important documents held in the Comintern's China archive. Analysis of recent political problems in China - comprises an appraisal of the cultural revolution from 3 points of view, (1) as an episode in the long history of china, (2) as a stage in the development of communist ideas and methods, and (3) as an attempt to solve certain fundamental problems shared by all developing countries, and covers historical and cultural factors, the struggle for political leadership, the role of intellectuals and of the political party, etc. Bibliography pp. 251 to 264.
