The Process of Economic Development James M. Cypher, 2020-12-31 The fifth edition of *The Process of Economic Development* offers a thorough and up to date treatment of development economics. It has been extensively revised throughout reflecting the most recent developments in research and incorporating the latest empirical data as well as key theoretical advances and many new topics. The world has seen vast economic growth in China, economic transformation in India, challenges in Latin America, rapid economic progress in Southeast Asia and the deepening impact of environmental issues such as climate change. This new edition addresses all these critical issues as well as the pivotal role of the state where China's capacity is contrasted with that of the African states. Transnational corporations' reliance on low wage manufacturing and labour arbitrage is featured. Agricultural policy extensively explored remains crucial as does the promotion of industrialization. This fifth edition offers a state of the art analysis of these essential themes and many others. Numerous case studies and issue focuses have been integrated with sundry central topics. Neoclassical theories and applications including a timely exploration of behavioral economics are accessibly explicated. Cypher's comprehensive account remains the development economics text par excellence as it takes a much more practical hands on view of the issues facing developing countries than other overly mathematical texts. This book is unique in its scope and in the detailed attention it gives to a vast range of ideas including pioneering developmentalist and heterodox formulations. Distinct institutional structures are examined within their historical contexts.
