Forensic Psychological Assessment in Practice Aug 11 2022 *Forensic Psychological Assessment in Practice: Case Studies* presents a set of forensic criminal cases as examples of a scientist-practitioner model for forensic psychological assessment. The cases involve a number of forensic issues, such as criminal responsibility, violence risk assessment, treatment planning, and referral to long term forensic care. Likewise, different types of offenses are covered, for example, sexual offending, arson, homicide, robbery and domestic violence. The authors address a variety of mental disorders including psychosis, posttraumatic stress disorder, psychopathy and other personality disorders. The book will be useful for novice and experienced forensic psychologists and psychiatrists who are looking for case studies that integrate the most recent empirical evidence with psychological test findings.

Clinical Psychology in Singapore Feb 22 2021 This casebook is a unique resource, offering never before documented insights into the practices and principles of clinical psychologists within local mental health services in Singapore. The 20 fascinating chapters provide comprehensive coverage of the assessment, formulation and treatment for clients across the lifespan. It includes accounts of clients with common mental health problems such as depression and panic disorder as well as more unusual problems like pyromania, exhibitionism and frontal-lobe epilepsy. The authors describe their successes and challenges and share how they grapple with tensions in the therapy room and with cultural and ethical issues. This casebook is an ideal complement to abnormal, counseling or clinical psychology courses. Features: Case studies on real Singaporean clients and families and authored by clinical psychologists and neuropsychologists working in Singapore. In-depth coverage of cultural and contextual factors relating to each case. Comprehensive case formulations and discussions in the context of the DSM-5 classification systems. Discussion questions at the end of each case study for individuals or groups to critically analyse issues relating to the case. Fact boxes outlining interesting or unique information relating to each case. Useful resources section on relevant organisations, websites and support groups for each case.

Evaluating Research Methods in Psychology Sep 11 2022 Using a series of over 40 case studies, this valuable text illustrates the processes and pitfalls involved in evaluating psychological research. Invites students to consider whether the conclusion drawn at the end of each case is correct, or whether the results could have an alternative explanation. Cross-referencing between sections is made easy by page references that link the case studies and explanations. Cases reflect the range of research methods taught at undergraduate level and include qualitative research. Gives students an understanding of methodological problems. Equips students to critically evaluate published research. The author and publishers have made every effort to be fair to the authors of the research described in this book. Like all sciences, psychology is forged in the fire of criticism and refinement, and we hope that the original researchers will understand that any criticism is made with the utmost respect. If you are an author of one of the pieces of research mentioned in the book and would like to respond to the critique presented, please e-mail your comments to Andrew McAleer at Andrew.McAleer@oxon.blackwellpublishing.com.

Sport and Exercise Psychology Nov 13 2022 *SPORT AND EXERCISE PSYCHOLOGICAL* "This book is a joy to read and greatly needed. The overall scholarly quality is very strong, and the chapters are clear, accessible, helpful and interesting - a rare combination. There are few texts that examine sport and exercise from a practitioner's perspective, and fewer that help students and trainees navigate the complex terrain of practice. The editors should be congratulated on pulling together a book that educates, inspires, provokes, and will be of practical use." Professor Brett

Smith, School of Sport, Exercise and Rehabilitation Sciences, University of Birmingham Sport and Exercise Psychology: Practitioner Case Studies is a contemporary text focusing on current issues in the discipline of sport and exercise psychology. Integrating research and practice in order to develop a coherent understanding of existing knowledge, future research directions and applied implications within the field, the text explores issues pertinent to the applied practitioner/supervisor and draws on expert commentary to investigate potential solutions to many key issues. Each chapter uses a case study approach to allow internationally recognized contributors to highlight and evaluate their experience across a broad range of sport and exercise performance areas. Practitioners are provided with a full range of available interventions to address specific types of psychological issue including performing under pressure, working with teams, injury rehabilitation, working with coaches, mental toughness, career transitions, athlete well-being, physical activity promotion, exercise and body image, lifestyle interventions, exercise dependence, and motor learning and control. Sport and Exercise Psychology is supported by a range of online materials designed to help both study and practice. It presents content that is directly applicable to those seeking to enter the profession, and which can also inform the ongoing development of reflective practitioners.

Case Studies in Clinical Psychological Science Jul 02 2024 Case Studies in Clinical Psychological Science demonstrates in detail how the clinical science model can be applied to actual cases. This book's unique structure presents dialogues between leading clinical researchers regarding the treatment of a wide variety of psychological problems.

Case Studies in Abnormal Psychology Apr 30 2024 Case Studies in Abnormal Psychology presents a broad range of cases drawn from the clinical experience of authors Kenneth N. Levy, Kristen M. Kelly, and William J. Ray to take readers beyond theory into real-life situations. The authors take a holistic approach by including multiple perspectives and considerations, apart from those of just the patient. Each chapter follows a consistent format: Presenting Problems and Client Description; Diagnosis and Case Formulation; Course of Treatment; Outcome and Prognosis/Treatment Follow-up; and Discussion Questions. Providing empirically supported treatments and long-term follow-up in many case studies gives students a deeper understanding of each psychopathology and the effects of treatment over time.

Case Studies in Social Psychology Jun 28 2021 In Case Studies in Social Psychology: Critical Thinking and Application, Thomas Heinzen and Wind Goodfriend use brief, entertaining case stories to illustrate the historical context and evolution of major theories within the field of social psychology. By employing a unique mix of contemporary research and hallmark studies, Heinzen and Goodfriend encourage students to explore new, meaningful ways of thinking about and connecting with foundational course concepts. In turn, this approach facilitates engaged conversation and deeper critical thinking both in and out of the classroom.

School-Based Behavioral Intervention Case Studies Jan 04 2022 School-Based Behavioral Intervention Case Studies translates principles of behavior into best practices for school psychologists, teachers, and other educational professionals, both in training and in practice. Using detailed case studies illustrating evidence-based interventions, each chapter describes all the necessary elements of effective behavior intervention plans including rich descriptions of target behaviors, detailed intervention protocols, data collection and analysis methods, and tips for ensuring social acceptability and treatment integrity. Addressing a wide array of common behavior problems, this unique and invaluable resource offers real-world examples of intervention and assessment strategies.

Case Studies in Forensic Psychology May 20 2023 Case Studies in Forensic Psychology offers the reader a unique insight into the often-hidden world of psychological assessment and intervention with people who have committed serious crimes. The book contains a breadth of forensic case studies, and each chapter details the real forensic work that psychologists do in their clinical practice in prison, psychiatric, and community settings. Assessment and therapeutic approaches used in each case study are discussed, as well as the state of the literature in each area (e.g. sexual

violence risk assessment, schema therapy). Each chapter will take the reader through a variety of offender profiles, their personal background, any relevant psychiatric or psychological diagnoses, and assessments and/or treatment completed. Case studies offer valuable insight into the clinical practice and day-to-day role of a forensic psychologist, demonstrating the work undertaken that empirical research does not offer. Uniquely, *Case Studies in Forensic Psychology* brings together treatment models and forensic research, demonstrating how theory translates into practice and considering whether it is effective at an individual level. It is ideal for students of forensic psychology and forensic mental health, as well as practitioners at any stage of their career in this rapidly expanding field.

Case Studies for Interpreting the MMPI-A-RF Feb 14 2023 A collection of illustrative adolescent case studies to aid clinicians in problem identification, diagnosis, and treatment planning—the only casebook for the MMPI-A-RF. The MMPI-A-RF is linked to current models of psychopathology and personality, and features scales relevant for use with adolescents in a variety of clinical, forensic, and school settings. It mirrors the structure of the MMPI-2-RF, resulting in the most up-to-date, empirically based personality assessment for use with adolescents. Written by the authors of the earlier *Case Studies for Interpreting the MMPI-A*, this book continues the goal of serving as an authentic and illustrative guide for clinicians in understanding and using the MMPI-A-RF. Since the publication of the original *Case Studies*, much has changed for clinicians who assess and treat adolescents. The interpretive model described in this book demonstrates how the MMPI-A-RF can assist clinicians in assessing youth today by highlighting sixteen cases that broadly represent adolescents evaluated in clinical and forensic practice. In addition, one of the most common uses for the MMPI-A-RF is in the juvenile court setting—a landscape that has also dramatically changed since the publication of the original MMPI-A. *Case Studies for Interpreting the MMPI-A-RF* focuses on detailed forensic issues, including legal backgrounds, case law, and assessment methods specific to use of the MMPI-A-RF in juvenile court and related settings. *Case Studies for Interpreting the MMPI-A-RF* will assist clinicians in understanding MMPI-A-RF interpretation, while also being a valuable teaching tool for courses in assessment.

Developmental Psychology: Case Studies Oct 01 2021 Developmental psychology is the scientific study of why and how human beings change and develop throughout their life. It broadly examines change across three categories, namely, physical, cognitive and social-emotional development. This field explains how an individual's thinking, feeling and behavior change over time. It tries to explain the effects of nature and nurture on human development. Some major areas of research in this field are cognitive development, physical development, memory development and social and emotional development. This domain is an umbrella discipline that includes a wide range of fields, such as educational psychology, forensic psychology, child development, cognitive psychology, ecological psychology and cultural psychology. This book attempts to understand the multiple branches that fall under the discipline of developmental psychology and how such concepts have practical ramifications. The case studies included in this book will serve as an excellent guide to develop a comprehensive understanding of this field. Those in search of information to further their knowledge will be greatly assisted by this book.

The Case-study Method in Psychology and Related Disciplines Feb 27 2024 Presents an overview of the case study method and its applications, describing in detail, how to conduct psychological case-studies; how to evaluate them, and how to use diagrams and decision analysis in case-studies.

Single Case Methods in Clinical Psychology Mar 25 2021 *Single-Case Methods in Clinical Psychology: A Practical Guide* provides a concise and easily-accessible introduction to single-case research. This is a timely response to the increasing awareness of the need to look beyond randomised controlled trials for evidence to support best practice in applied psychology. The book covers the issues of design, the reliability and validity of measurement, and provides guidance on how to analyse single-case data using both visual and statistical methods. Single-case designs can be used to investigate an individual's response to psychological intervention, as well as to contribute to

larger scale research projects. This book illuminates the common principles behind these uses. It describes how standardised measures can be used to evaluate change in an individual and how to develop idiographic measures that are tailored to the needs of an individual. The issue of replication and generalising beyond an individual are examined, and the book also includes a section on the meta-analysis of single-case data. The critical evaluation of single-case research is examined, from both the perspective of developing quality standards to evaluate research and maintaining a critical distance in reviewing one's own work. *Single Case Methods in Clinical Psychology* will provide invaluable guidance to postgraduate psychologists training to enter the professions of clinical, health and counselling psychology and is likely to become a core text on many courses. It will also appeal to clinicians seeking to answer questions about the effectiveness of therapy in individual cases and who wish to use the method to further the evidence-base for specific psychological interventions.

Who Is Sylvia? and Other Stories Nov 01 2021 First published in 2002, in this innovative book two leading practitioners tell the stories of the people they have met as clients and how they, as therapists, tried to help them. Through compelling case studies, Peven and Shulman invite the reader into their thoughts and feelings about their clients, their processes and treatment techniques, and their subsequent successes and failures. The authors describe a cognitive, constructivist, interpersonal, dynamic approach based primarily on the principles of Alfred Adler's Individual Psychology. The case studies represent several different DSM-IV diagnostic categories, and the authors offer their own theoretical perspectives and treatment methods for each category. With compassion, insight, and skill, the authors take complicated material and present it in a clearly written and easy to understand fashion.

Case Studies in Multicultural Counseling and Therapy Dec 03 2021 An indispensable collection of real-life clinical cases from practicing experts in the field of multicultural counseling and psychotherapy *Case Studies in Multicultural Counseling and Therapy* is a one-of-a-kind resource presenting actual cases illustrating assessment, diagnostic, and treatment concerns associated with specific populations. The contributors—well-known mental health professionals who specialize in multicultural counseling and psychotherapy—draw on their personal experiences to empower therapists in developing an individually tailored treatment plan that effectively addresses presenting problems in a culturally responsive manner. Providing readers with the opportunity to think critically about multicultural factors and how they impact assessment, diagnosis, and treatment, this unique book: Covers ethical issues and evidence-based practice Integrates therapists' reflections on their own social identity and how this may have influenced their work with their clients Considers the intersectionality of racial/ethnic, class, religious, gender, and sexual identities Contains reflection and discussion questions, an analysis of each case by the author, and recommended resources Includes cases on racial/ethnic minority populations, gender, sexuality, poverty, older adults, immigrants, refugees, and white therapists working with people of color Aligns with the ACA's CACREP accreditation standards, the APA guidelines for multicultural competence, and the AMCD Multicultural Counseling Competencies

Case Studies in Abnormal Psychology Jan 16 2023 The casebook provides 17 additional case histories based on the authors' clinical experiences, each going beyond DSM-IV diagnosis to describe the individual's history and symptoms, a theoretical discussion of treatment, a specific treatment plan, and the actual treatment conducted. The casebook also provides 3 cases without diagnosis or treatment, so students can identify disorders and suggest appropriate therapies.

Case Studies in Abnormal Psychology Jul 22 2023 This in-depth casebook takes mental disorders from the realm of theory into the complex reality of human lives. Covering the full range of psychopathologies and types of patients, these cases focus on symptoms, the client's history, treatment, and outcome to provide detailed descriptions of a wide range of clinical problems Offers strong coverage of cultural, ethnic, and women's issues Includes a number of transcripts of therapy sessions, giving readers a realistic view of psychotherapy Excellent balance of various perspectives and treatments Presents case failures as well as successes, and points to gaps in current knowledge

Case Studies in Educational Psychology Sep 23 2023 Case Studies in Educational Psychology is comprised of 55 diverse and realistic case studies that will shape and compliment any Educational Psychology curriculum. The essays are grouped into 10 well-organized units that address issues ranging from Classroom Management to Moral Development, Children from Broken Homes, and Homelessness. Each study concludes with thought-provoking discussions questions that both stimulate discourse around the important issues in Educational Psychology and bring to light the practical implications/applications of each study. Case Studies in Educational Psychology is a challenging yet highly accessible volume - an ideal text for students and teachers of Education Psychology.

Classic Case Studies in Psychology Mar 06 2022 The human mind is both extraordinary and compelling. But this is more than a collection of case studies; it is a selection of stories that illustrate some of the most extreme forms of human behaviour. From the leader who convinced his followers to kill themselves to the man who lost his memory; from the boy who was brought up as a girl to the woman with several personalities, Geoff Rolls illustrates some of the most fundamental tenets of psychology. Each case study has provided invaluable insights for scholars and researchers, and amazed the public at large. Several have been the inspiration for works of fiction, for example the story of Kim Peek, the real Rain Man. This new edition features three new case studies, including the story of Charles Decker, who was tried for the attempted murder of two people but acquitted on the basis of a neurological condition, and Dorothy Martin, whose persisting belief in an impending alien invasion is an illuminating example of cognitive dissonance. In addition, each case study is contextualized with more typical behaviour, while the latest thinking in each sub-field is also discussed. *Classic Case Studies in Psychology* is accessibly written and requires no prior knowledge of psychology, just an interest in the human condition. It is a book that will amaze, sometimes disturb, but above all enlighten its readers.

Case Studies Oct 13 2022 Contains forty-eight cases to understand educational psychology, based upon real-life experiences, with scenarios that illustrate development, learning, motivation, diversity, and classroom practice; and encourages the reader to analyze the student and teacher from a psychological perspective.

Classic Case Studies in Psychology Jun 01 2024 Have you heard about the man who lived with a hole in his head? Or the boy raised by his parents as a girl? From the woman with multiple personalities, to the man with no brain, this collection of case studies provides a compelling insight into the human mind. This is a fascinating collection of human stories. Some are well-known case studies that have informed clinical practice, others are relatively unknown. For this edition, Rolls has added recent research findings on each case study plus four brand new cases: the story of Washoe, the ape who could communicate; the much debated case of Holly Ramona and repressed memory; and Kim Peek, the real 'Rainman'. *Classic Case Studies in Psychology* is for everyone who has ever wondered about the stranger side of life. No prior knowledge of psychology is required, just an open mind. For those who wish to use this book as part of their studies, or who are just keen to learn more, fun multiple choice questions, fascinating further reading, helpful web links, and self-assessment questions are all available free on our website, www.routledge.com/cw/rolls. Prepare to be amazed ...

Adult Psychopathology Case Studies Mar 30 2024 A unique case study book, *Adult Psychopathology Case Studies* presents adult client case studies that describe the ways in which people with psychological disorders are likely to think, feel, and act. Written by experienced clinicians and well-known authorities in their respective specialties, it brings together the work of an international group of contributors who address the nature, origin, development, manifestations, course, and prognosis of a diverse range of adult psychopathological conditions. Close examination is given to the clinical, personal, contextual, theoretical, ethical, and legal dimensions of case studies, along with insightful, real-world focus on overlapping themes, such as culture, substance abuse, domestic violence, and sexual abuse. Authors illustrate rational case formulation, but stop short of exhaustive or doctrinaire analyses that would discourage alternative opinions on how and why a disturbance occurred or its likely outcome-giving students an opportunity to apply their own knowledge to each

case and providing instructors with material that will spark lively classroom discussion and debate. The contributors also bring a broad range of theoretical perspectives to the diverse array of case studies, including psychoanalytic, psychodynamic-interpersonal, cognitive, and cognitive-behavioral conceptualizations of psychopathology and psychotherapeutic methods. *Adult Psychopathology Case Studies* includes thirteen full-length case studies in the following categories: * Personality disorders * Anxiety and somatoform disorders * Identity disorders * Habit disorders * Serious or psychotic disorders Also included are six brief case studies covering: * Adjustment disorder * Dependent personality disorder * Schizotypal personality disorder * Generalized anxiety disorder * Polysubstance dependence * Depressive disorder *Adult Psychopathology Case Studies* offers an engaging and perceptive look into the real world of adult psychopathology and provides students with an enriching "hands-on" learning experience as they apply their knowledge and techniques to each of the unique case studies provided in this book.

Case Studies in Mental Health Treatment Jul 10 2022 The key aims of this text are to illustrate the use of various types of mental health treatments and to provide in-depth examples of common psychological disorders supported by case studies. The 34 journal articles in this book— authored by practicing psychotherapists, psychiatrists, psychoanalysts, and counselors— describe the treatment of individual clients. In most cases, the authors discuss a client's psychological problem , the treatment used with the client, and the outcome. This book is designed for use in courses in clinical, counseling, and abnormal psychology, each article is followed by (1) a list of psychological terms for classroom discussion and (2) questions that call for students' opinions on various aspects of the case. **Case Studies in Abnormal Psychology** Jan 28 2024 'Case Studies in Abnormal Psychology' takes mental disorders from the realm of theory into the complex reality of human lives.

Introduction to Psychology Case Studies Dec 27 2023

Case Study Research in Counselling and Psychotherapy Jun 20 2023 Case-based knowledge forms an essential element of the evidence base for counselling and psychotherapy practice. This book provides the reader with a unique introduction to the conceptual and practical tools required to conduct high quality case study research that is grounded in their own therapy practice or training. Drawing on real-life cases at the heart of counselling and psychotherapy practice, John McLeod makes complex debates and concepts engaging and accessible for the trainees and practitioners at all levels, and from all theoretical orientations. Key topics covered in the book include: - the role of case studies in the development of theory, practice and policy in counselling and psychotherapy - strategies for responding to moral and ethical issues in therapy case study research - practical tools for collecting case data - 'how-to-do-it' guides for carrying out different types of case study - team-based case study research for practitioners and students - questions, issues and challenges that may have been raised for readers through their study. Concrete examples, points for reflection and discussion, and recommendations for further reading will enable readers to use the book as a basis for carrying out their own case investigation. All trainees in counselling, psychotherapy and clinical psychology are required to complete case reports, and this is the only textbook to cover the topic in real depth. The book will also be valuable to people who intend to use existing case studies to inform their practice, and it will help experienced practitioners to generate publishable case reports.

Case Analyses for Abnormal Psychology May 27 2021 This casebook provides rich, detailed examples of the major mental illnesses. In addition, it also includes up-to-date information about the biological nature of these disorders, comprehensive approaches to treatment, and critical thinking and questioning pauses. As an added feature, this text incorporates multiple treatment providers including psychiatrists, psychologists, social workers, and psychiatric nurse practitioners. Before delving into the detailed cases, the text provides introductory chapters on: perspectives in abnormal psychology, diagnostic and therapeutic interviewing, classification and diagnosis, assessment procedures, introductory comments about each case, and therapeutic strategies. Readers learn about the personal history of each consumer both before and during the development of each case.

Most cases also include in-depth interviews with individuals close to the consumer. Every case ends with a section on that particular disorder as viewed from a biological perspective. Treatment approaches are applied as appropriate as well as discussions centring on why other treatment techniques have been ruled out as viable options.

Case Studies in Social Psychology Aug 23 2023 Employing a mix of unique, contemporary research and hallmark studies to illustrate classic concepts, this book encourages students to think about foundational course concepts in new ways, encouraging discussion and deeper critical thinking.

Case Studies in Educational Psychology Jun 08 2022 This case study book serves as a valuable tool for professors and instructors of educational psychology. It contains 18 cases that represent current areas of interest in Educational Psychology embedded within current challenges that teachers face in today's elementary grade classrooms. The cases are organized into six major parts: Human Development, Individual Differences and Diversity, Learning Theories, Motivation, Classroom Management, Instructional Approaches, and Assessment and Evaluation. Each case describes a detailed teaching scenario written from either the student or the teachers' perspective. To engage students in critical thinking, perspective-taking, analysis, problem solving and decision-making, the cases have been intentionally written without a conclusion. Because the cases are open-ended, it allows the professor or instructor more flexibility and autonomy in how they use the cases. Each case is followed by thought-provoking questions, highlighting the significant issues in the case, from which to analyze the case and apply various theoretical viewpoints. While the cases do not replace actual classroom experience, they present a way to immerse students in the classroom's culture by providing them with real-life teaching examples.

Classic Case Studies in Psychology Nov 25 2023 The human mind is both extraordinary and compelling. But this is more than a collection of case studies; it is a selection of stories that illustrate some of the most extreme forms of human behaviour. From the leader who convinced his followers to kill themselves to the man who lost his memory; from the boy who was brought up as a girl to the woman with several personalities, Geoff Rolls illustrates some of the most fundamental tenets of psychology. Each case study has provided invaluable insights for scholars and researchers, and amazed the public at large. Several have been the inspiration for works of fiction, for example the story of Kim Peek, the real Rain Man. This new edition features three new case studies, including the story of Charles Decker, who was tried for the attempted murder of two people but acquitted on the basis of a neurological condition, and Dorothy Martin, whose persisting belief in an impending alien invasion is an illuminating example of cognitive dissonance. In addition, each case study is contextualized with more typical behaviour, while the latest thinking in each sub-field is also discussed. *Classic Case Studies in Psychology* is accessibly written and requires no prior knowledge of psychology, just an interest in the human condition. It is a book that will amaze, sometimes disturb, but above all enlighten its readers.

Case Studies in School Psychology Dec 15 2022 *Case Studies in School Psychology* is the first textbook to comprehensively introduce the NASP Practice Model through active discussion of real-life, school-based examples of issues facing school psychologists. Incorporating all 10 domains of practice, these true-to-life scenarios span individual child, class-wide, school-wide, and district/community-wide organizational levels across multiple age and developmental ranges. Graduate students will better understand their expansive roles and potential avenues to make positive impacts as school psychologists in children's academic, social, emotional, and behavioral development.

Creative Concepts in Psychology: Case Studies and Activities Aug 30 2021 Psychology does not need to be overwhelming or scary. For many students the idea of studying psychology can be a little...nerve-wrecking. The functions of the brain, psychological theory, and core concepts of study can seem like a vast undertaking. *Creative Concepts in Psychology: An Activity and Case-based Approach* proves that this material is manageable, fascinating, and totally engaging for students. *Creative Concepts in Psychology: An Activity and Case-based Approach* looks at the study of

psychology in a different way than more traditional Psychology text. Rather than place the bulk of the emphasis on concepts with only a few end-of-chapter activities, *Creative Concepts in Psychology* balances theory with application in a meaningful way. Every chapter provides the core pedagogy, but also devotes substantial time and energy to case studies and student activities. By merging these concepts so seamlessly, the ability to both learn and apply is mastered in every chapter. A successful psychology text not only teaches students, but also empowers them to use those concepts beyond the classroom. *Creative Concepts in Psychology: An Activity and Case-based Approach* strives to reach past basic understanding to full synthesis by giving students both a thorough understanding of ideas and the chance to see those ideas played out in scenarios that resemble the sorts of things a student may encounter in his or her own life. With titles like "Why am I so Tired?," "Wild Days," and "Exhaustion Hurts" the case studies in this text are going to have an impact because they reflect the daily struggles many students encounter. Instructor's resources including instructor's manual and PowerPoints located on the OLC.

Case Study Method Apr 18 2023 This is the most comprehensive guide to the current uses and importance of case study methods in social research. The editors bring together key contributions from the field which reflect different interpretations of the purpose and capacity of case study research. The address issues such as: the problem of generalizing from study of a small number of cases; and the role of case study in developing and testing theories. The editors offer in-depth assessments of the main arguments. An annotated bibliography of the literature dealing with case study research makes this an exhaustive and indispensable guide.

Classic Case Studies in Psychology Mar 18 2023 This new edition of *Classic Case Studies* is the essential selection of case studies and stories that illustrate not only many of the most fundamental tenets of psychology, but also some of the most extreme forms of human behavior. The human mind is both extraordinary and compelling. From the leader who convinced his followers to kill themselves to the man who lost his memory, these famous accounts have provided invaluable insights for scholars and researchers, and amazed the public at large. Brought to life by Rolls, each case is contextualized with more typical behaviour, while the latest thinking in each sub-field is also discussed. Revised and updated, the new edition features two new case studies, including the 'Jim Twins' by Thomas Bouchard, an amazing case of twins separated at birth and adopted by different parents, yet when reunited 30 years later shared so many behavioural characteristics. Also featuring a new chapter on approaches, issues and debates, accessibly written and requiring no prior knowledge of Psychology, this book is essential reading for A-Level students and Undergraduates alike. Geoff Rollis Head of Psychology at Peter Symonds College in Winchester and formerly a Research Fellow at Southampton University, UK.

Case Studies in Abnormal Psychology Oct 25 2023 *Case Studies in Abnormal Psychology* presents actual clinical cases, providing developmental histories essential to appropriate diagnosis and treatment of mental disorders. This text presents 23 distinct case studies, applying abstract theoretical research to real-world situations. Each study describes the clinical problem, demonstrates the formulation and implementation of a treatment plan, and discusses evidence of potential causes and prevalence. This comprehensive examination includes cases ranging from psychotic and personality disorders including schizophrenia and bipolar disorder to those concerning child development and aging such as attention-deficit and hyperactivity disorder. Coverage of sometimes controversial subjects including dissociative identity disorder, gender dysphoria, autism spectrum disorder, and posttraumatic stress disorder ensures contemporary relevance. Suitable for undergraduate and graduate study of abnormal psychology, this book presents an honest and unbiased view of the limitations and benefits of various treatment plans. Discussions of alternative methods including medication, electroconvulsive therapy, and psychosurgery, augment primary cognitive-behavioral approaches, allowing students a solid foundational knowledge of the subject.

Mental Lives Apr 06 2022 Case Studies are familiar as problem-solving devices in business and in education, as well as having a traditional role in the teaching of medicine and as the psychoanalytic

research. In experimental psychology, however, case studies have only recently resurfaced as a useful way of asking questions about the structure of the mind. Each of the chapters in this book describes a particular real person whom the investigator believes can tell us something important about the way the human mind develops and performs. Each chapter is written by an internationally known academic researcher in their chosen field in psychology. The cases range widely over developmental subjects, such as the girl born blind and the autistic child, to elderly patients who have had strokes or other brain damage that has oddly curtailed some previously intact cognitive skills such as drawing, writing or remembering. The aim of this book is to bring these real life cases to life in a clear and relatively jargon-free way and so to illuminate how psychologists now use case-study evidence to approach central questions in cognition, such as the relation between brain structures and mental processes, and development of cognition. Together, the studies suggest the exciting flavour of current active research and offer new perspectives. Mental Lives is intended for use in the early stages of an undergraduate cognitive psychology course, and will also be of some use to students of developmental psychology and of neuropsychology.

The Psychology of Extreme Violence Feb 02 2022 Featuring a unique overview of the different forms of extreme violence, this book considers the psychology of extreme violence alongside a variety of contributing factors, such as brain abnormalities in homicide offenders. Featuring several contemporary real-world case studies, this book offers insight into the psychology of serial homicide offenders, mass shooters, school shooters and lone-actor terrorists. The main purpose of this book is not to glorify or condemn the actions of these individuals, but to attempt to explain the motivations and circumstances that inspire such acts of extreme violence. By adopting a detailed case study approach, it aims to increase our understanding of the specific motivations and psychological factors underlying extreme violence. Using nontechnical language, this book is the ideal companion for students, researchers, and forensic practitioners interested in the multidisciplinary nature of extreme violence. This book will also be of interest to students taking courses on homicide, mass shooting, school shooting, terrorism, forensic psychology and criminology and criminal justice.

Case Analyses for Abnormal Psychology Jul 30 2021 Case Analyses for Abnormal Psychology, Second Edition uses case studies to explore the etiology, biology, and dynamics of psychiatric disorders in the DSM-5. Readers will learn about the new classifications and treatments for disorders while simultaneously reading the personal history of each consumer both before and during the development of each case. Every case ends with a section on the particular disorder presented, as viewed from a biological perspective. This updated edition bridges advances in abnormal psychology and neuroscience in understanding mental illness.
