Bihar and Mithila J. Albert Rorabacher,2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India's problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co-opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates

Social Class in Applied Linguistics David Block,2013-12-04 In this ground breaking new book David Block proposes a new working definition of social class in applied linguistics Traditionally research on language and identity has focused on aspects such as race ethnicity nationality gender religion and sexuality Political economy and social class as an identity inscription have been undervalued This book argues that increasing socioeconomic inequality which has come with the consolidation of neoliberal policies and practices worldwide requires changes in how we think about identity and proposes that social class should be brought to the fore as a key construct Social Class in Applied Linguistics begins with an in depth theoretical discussion of social class before considering the extent to which social class has been a key construct in three general areas of applied linguistics sociolinguistics bi multilingualism and second language acquisition and learning research Throughout the book Block suggests ways in which social class might be incorporated into future applied linguistics research A critical read for postgraduate students and researchers in the areas of applied linguistics language education and TESOL

A Question of Worth Chris Steed,2016-09-14 We live in a world that has become a resource a world conditioned by the progressive domination of a monetary scale applied across the board Our value and worth are contingent upon what we earn on what we own Amidst the increasing financialisation that characterises much of the globe the prevailing ethos is that the only values we can usefully measure are those that can be quantified and expressed in terms of economics Yet economic value and the value of the human are closely connected erode the economic and you erode the personal In the global economic crash of recent years it has been people who have been under assault not just financial value The vulnerability of a society shaped solely by economic and monetised transactions is exposed when the economy and the monetisation of everything fails When the economic machine seizes up it is people who are devalued and dumped Drawing upon his experience in government education and the Church the author asks Must we be a market society as well as a market economy Can we devise a non economic account of describing human value and worth Christopher Steed argues that the really important issues that frame the contemporary human situation are those that cannot be measured Quality is also vital to human flourishing what after all is wealth for In this timely and important work the author calls for a wider concept of value one that encompasses both economic value and human value and for a society that cultivates the importance of the human
