Omega Camille Flammarion, 2018-09-10T20:12:50Z Born in 1842 Camille Flammarion was a French astronomer who wrote many popular books about science and astronomy together with a number of novels which we would now consider to be science fiction He was a contemporary of H G Wells and Jules Verne though his works never achieved their level of popularity Omega The Last Days of the World is an English translation of Flammarion's novel *La Fin du Monde* published in 1893 The book's fictional premise is the discovery of a comet on a collision course with the Earth in the 25th century However this is mostly a pretext on which Flammarion can hang his interesting scientific speculations about how the world will end together with philosophical thoughts about war and religion Much of the scientific description he uses in the book while accurately representing the knowledge and thinking of his time has today been superseded by modern discoveries For example we now know the source of the Sun's energy to be nuclear fusion rather than being due to gravitational contraction and the constant infall of meteorites When talking about the ills of society however Flammarion could well be talking about today's world For example he excoriates the vast waste of society's resources on war and demonstrates how much more productive each nation's economy would be without it He also depicts the media of his future world as having been entirely taken over by commercial interests publishing only what will excite the greatest number of readers rather than serving the public interest Omega ranges over a vast period of time from prehistory through to millions of years in the future when mankind has been reduced to the last two doomed individuals Nevertheless the book ends on a hopeful and inspiring note This book is part of the Standard Ebooks project which produces free public domain ebooks

As China Goes, So Goes the World Karl Gerth, 2010-11-09 In this revelatory examination of the most overlooked force that is changing the face of China the Oxford historian and scholar of modern Asia Karl Gerth shows that as the Chinese consumer goes so goes the world While Americans and Europeans have become increasingly worried about China's competition for manufacturing jobs

and energy resources they have overlooked an even bigger story China's rapid development of an American style consumer culture which is revolutionizing the lives of hundreds of millions of Chinese and has the potential to reshape the world This change is already well under way China has become the world's largest consumer of everything from automobiles to beer and has begun to adopt such consumer habits as living in large single occupancy homes shopping in gigantic malls and eating meat based diets served in fast food outlets Even rural Chinese long the laggards of consumerism have been buying refrigerators televisions mobile phones and larger houses in unprecedented numbers As China Goes So Goes the World reveals why we should all care about the everyday choices made by ordinary Chinese Taken together these seemingly small changes are deeper and more profound than the headline grabbing stories on military budgets carbon emissions or trade disputes

Energy, Complexity and Wealth Maximization Robert Ayres, 2016-07-14 This book is about the mechanisms of wealth creation or what we like to think of as evolutionary progress The massive circular flow of goods and services between producers and consumers is not a perpetual motion machine it has been dependent for the past 150 years on energy inputs from a finite storage of fossil fuels In this book you will learn about the three key requirements for wealth creation and how this process acts according to physical laws and usually after some part of the natural wealth of the planet has been exploited in an episode of creative destruction Knowledge and natural capital particularly energy will interact to power the human wealth engine in the future as it has in the past Will it sputter or continue along the path of evolutionary progress that we have come to expect Can the

new immaterial wealth of information and ideas which makes up the so called knowledge economy replace depleted natural wealth These questions have no simple answers but this masterful book will help you to understand the grand challenge of our time Praise for Energy Complexity and Wealth Maximization people who run the modern world politicians economists and lawyers have a very poor grasp of how it really works because they do not understand the fundamentals of energy exergy and entropy those decision makers would greatly benefit from reading this book Vaclav Smil Distinguished Professor Emeritus University of Manitoba A grandiose design impressive worth reading and reflecting Prof Dr Ernst Ulrich von Weizacker Founder of Wuppertal Institute Co President of the Club of Rome Former Member of the German Bundestag co chair of the UN s Resource Panel The book is a must read for concerned citizens and decision makers across the globe RK Pachauri Founder and Executive Vice Chairman The Energy and Resources Institute TERI and ex chair International Panel on Climate Change IPCC

Philosophy of Liberation Enrique Dussel, 2003-12-02 Argentinean philosopher theologian and historian Enrique Dussel understands the present international order as divided into the culture of the center by which he means the ruling elite of Europe North America and Russia and the peoples of the periphery by which he means the populations of Latin America Africa and part of Asia and the oppressed

classes including women and children throughout the world In Philosophy of Liberation he presents a profound analysis of the alienation of peripheral peoples resulting from the imperialism of the center for more than five centuries Dussel s aim is to demonstrate that the center s historic cultural military and economic domination of poor countries is philosophically founded on North Atlantic ontology By expressing supposedly universal knowledge European philosophies argues Dussel have served to equate the cultural standards modes of behavior and rationalistic orientation of the West with human nature and to condemn the unique characteristics of peripheral peoples as nonbeing nothing chaos irrationality Hence Western philosophies have historically legitimated and hidden the domination that oppressed cultures have suffered at the hands of the center Dussel probes multinational corporations the communications media and the armies of the center with their counterparts among the Third World elite The creation of a just world order in the future according to Dussel hinges on the liberation of the periphery based on a philosophy that is able to think the world from the perspective of the poor and to reclaim the Third World s distinct cultural inheritance which is imbedded in the popular cultures of the poor Apart from the liberation of the periphery there will be no future the center will feed itself on the sameness it has ingrained within itself The death of the child of the poor will be its own death This is a disquieting but stimulating book for scholars and advanced students of philosophy ethics liberation theology and global politics
