This book shows the impact of globalization on Southeast Asia, which over a few decades has evolved from a loose set of war-torn ex-colonies to being a centre of global manufacturing. Focusing on cities, the authors explain the emergence of modern Southeast Asia and its increasing integration into the world economy by showing how technological change, economic development and politics have transformed the flows of goods, people and information. It has been over a century since "Cooperative System of Education," a work-study programme for higher education, was initiated by Herman Schneider at University of Cincinnati in the United States. Today, it is known as "Cooperative Education" which is commonly included within the umbrella term of "Work-Integrated Learning" and broadly referred to by the World Association of Cooperative Education (WACE) as "Cooperative and Work- Integrated Education (CWIE)". Its development worldwide has been closely related to the socioeconomic background of the region. This book offers the first attempt to focus on the development of CWIE in Asia. To date, the development of CWIE in the Asia region has been slow compared to their counterparts. The analysis follows international comparisons of China, Japan, Korea, Hong Kong, Vietnam, Thailand, Malaysia, and Singapore on their educational history, vocational education, CWIE, and future issues. Although the level of development varies among them, there is no doubt that this region as a whole is experiencing a rapidly growing global demographic and economic prominence. CWIE can, and to some extent already does, play an important, supportive role as part of growth. The book goes on to conclude that in order to enable further successful expansion of CWIE, and improve its best practice, it is imperative to establish national and regional associations for CWIE, as well as establish collaborative research activities across the region with governmental funding support. Southeast Asia has long been seen as a unity, although other terms have been used to describe it: Further India, Little China, the Nanyang. The region has had a protracted maritime history. Confucianism, Buddhism, Islam, Hinduism,

Christianity are all represented. It has seen a quintet of colonial powers - Britain, France, The Netherlands, Spain, the United States. Most recently, it has become one of the fastest growing parts of the world economy. The very term 'Southeast Asia' is clearly more than a geographical expression. The Cambridge History of Southeast Asia is a multi-authored treatment of the whole of mainland and island Southeast Asia from Burma to Indonesia. Unlike other histories of the region, it is not divided on a country-by-country basis and is not structured purely chronologically, but rather takes a thematic and regional approach to Southeast Asia's history. This volume, the second and final in the series, takes us into the nineteenth and twentieth centuries, from the late eighteenth century of the Christian era when most of the region was incorporated into European empires to the complexity and dramatic change of the post-World War II period. It covers the economic and social life as well as the religious and popular culture of the region as they develop over two centuries. The political structures of the region are also closely examined, from the insurgencies and rebellions of early this century to the modern Nationalist movements which challenged the control of the colonial powers and led to the formation of independent states. Under the editorship of Nicholas Tarling, Professor of History at the University of Auckland, New Zealand, each chapter is well integrated into the whole. Professor Tarling has assembled a highly respected team of international scholars who have presented the latest historical research on the region and succeeded in producing a provocative and exciting account of the region's history.

*East Asia and the West: An Entangled History* provides readers with a comprehensive overview of modern East Asian civilizations. The text demonstrates how China, Korea, Japan, and Vietnam developed into modern nations through interactions with Western ideas and military power. Part One of the text provides an overview and historical background of premodern East Asia, highlighting differences and similarities between China, Korea, Japan, and Vietnam, and significant partnerships and innovations from the 1500s to the 1800s. In Part Two, students learn why certain areas adopted an isolationist policy against Western influence, while others welcomed the influence. Part Three focuses on confrontation and Westernization, featuring discussion of the Opium Wars, the Meiji Transformation, and French colonization in Indochina. Part Four covers major events that occurred during World War II, including the communist movements in East Asia during the war. The final part examines the competition and confrontation between the capitalist and communist systems during the Cold War in East Asia. The text features transliteration notes, maps, and an expansive bibliography to provide students with a complete and immersive learning experience. *East Asia and the West* is part of the Cognella History of Asia Series, a collection of books dedicated to helping students explore the exciting, complex, and influential past of Asian countries. Xiaobing Li earned his Ph.D. at Carnegie Mellon University. Dr. Li is a professor of history and the director of the Western Pacific Institute at the University of Central Oklahoma. Yi Sun earned her Ph.D. at Washington State University. Dr. Sun is a professor of history and the director of the Asian Studies Program at the University of San Diego. Wynn Gadkar-Wilcox earned his Ph.D. at Cornell University. He is a professor of history and non-western cultures at Western Connecticut State University. Broadening and deepening of economic and political integration are hallmarks of the EU and ASEAN. Analysing the economic and institutional changes in both Europe and Asia, this book emphasizes on banking, financial market dynamics, ICT, and macroeconomic policies. The legal aspects are combined with historical and economic perspectives. There is no single volume that shines a light on Asia's collective involvement in the First World War, and the impact that war had on its societies. Moreover, no volume in any language explores the

experiences Asian countries shared as they became embroiled, with divergent results, in the war and its repercussions. *Asia and the Great War* moves beyond the national or even international level by presenting a 'shared' history from non-national and transnational perspectives. Asian involvements make the Great War not only a true 'world' war but also a 'great' war. The war generated forces that would transform Asia both internally and externally. Asian involvement in the First World War is a unique chapter in both Asian and world history, with Asian participation transforming the meaning and implications of the broader conflict. *Asia and the Great War* also takes steps to recover memories of the war and re-evaluate the war in its Asian contexts. Asia's part in the war and the part the war played in the collective development of Asia represent the first steps of the long journey to full national independence and international recognition. This volume aims to bring the Great War more fully into Asian history and the people of Asia into the international history of the war, in the hope that the shared history could lay the groundwork for a shared future.

2016 PROSE Award Honorable Mention for Textbook in the Humanities *A History of Southeast Asia: Critical Crossroads* presents a comprehensive history of Southeast Asia from our earliest knowledge of its civilizations and religious patterns up to the present day. Incorporates environmental, social, economic, and gender issues to tell a multi-dimensional story of Southeast Asian history from earliest times to the present. Argues that while the region remains a highly diverse mix of religions, ethnicities, and political systems, it demands more attention for how it manages such diversity while being receptive to new ideas and technologies. Demonstrates how Southeast Asia can offer alternatives to state-centric models of history more broadly.

Part of The Blackwell History of the World Series. The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past, for every curious person in every part of the world. It will comprise some two dozen volumes, of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time. The volumes are narrative in form, giving balanced attention to social and cultural history (in the broadest sense) as well as to institutional development and political change. Each provides a systematic account of a very large subject, but they are also both imaginative and interpretative. The Series is intended to be accessible to the widest possible readership, and the accessibility of its volumes is matched by the style of presentation and production.

Centering his analysis in the dynamic forces of modern East Asian history, Kuan-Hsing Chen recasts cultural studies as a politically urgent global endeavor. He argues that the intellectual and subjective work of decolonization begun across East Asia after the Second World War was stalled by the cold war. At the same time, the work of deimperialization became impossible to imagine in imperial centers such as Japan and the United States. Chen contends that it is now necessary to resume those tasks, and that decolonization, deimperialization, and an intellectual undoing of the cold war must proceed simultaneously. Combining postcolonial studies, globalization studies, and the emerging field of "Asian studies in Asia," he insists that those on both sides of the imperial divide must assess the conduct, motives, and consequences of imperial histories. Chen is one of the most important intellectuals working in East Asia today; his writing has been influential in Taiwan, South Korea, Hong Kong, Japan, Singapore, and mainland China for the past fifteen years. As a founding member of the Inter-Asia Cultural Studies Society and its journal, he has helped to initiate change in the dynamics and intellectual orientation of the region, building a network that has facilitated inter-Asian connections. *Asia as Method* encapsulates Chen's vision and activities within the increasingly "inter-referencing" East Asian intellectual community and charts necessary new directions for

cultural studies. This title provides a narrative interpretation of key themes that emerge in the history of Asian migrations to North America, highlighting how Asian immigration has shaped the evolution of ideological and legal interpretations of America as a 'nation of immigrants'. The second edition of Charles Holcombe's acclaimed introduction to East Asian history from the dawn of history to the twenty-first century. Asian regional integration, which has shown remarkable progress since the end of the 1990s, is at a major crossroads. It faces confusion of and debate over the direction and effectiveness of integration as well as friction brought about by the rise of China. Meanwhile, the changing balance of power among nations, the rise of nonstate actors, the internationalization of internal problems, and the internalization of international problems are rendering the cross-national structure of Asia increasingly complex and multilayered. Signs of instability of the global economy are growing, and environmental and resource challenges are deepening. East Asia needs new approaches to understanding the state of regional integration and mechanisms to address the challenges. Regional Integration in East Asia is the culmination of five years of intensive research on Asian regional integration by Waseda University. It reexamines theoretical approaches to comprehending the actual state of integration in the region and presents the most compelling ones. It also examines the state of cooperation in Asia in areas ranging from the economy to energy and the environment, security, and education. In addition, the book offers long-term historical perspectives, including those of Japan, ASEAN, and China on Asian regional integration. Thus, it sheds light on diverse aspects, levels of analysis, and time spans and offers a comprehensive portrayal of the actual condition of Asia and the state of attempts to build regional cooperation and institutions. This volume will open a new research frontier in Asian regional integration research. This ambitious work has two novel goals: to overcome the extreme fragmentation of early Southeast Asian historiography, and to connect Southeast Asian to world history. Combining careful local research with wide-ranging theory Lieberman argues that over a thousand years, each of mainland Southeast Asia's great lowland corridors experienced a pattern of accelerating integration punctuated by recurrent collapse. These trajectories were synchronized not only between corridors, but most curiously, between the mainland as a whole, much of Europe, and other sectors of Eurasia. He describes in detail the nature of mainland consolidation - which was simultaneously territorial, religious, ethnic, and commercial - and dissects the mix of endogenous and external factors responsible. Here, then, is a fundamentally original analysis not only of Southeast Asia, but of the pre-modern world. A fascinating insight into how regional organizations in Europe and East Asia are currently grappling with a striking number of essentially similar challenges. This issue-based overview of political integration focuses on the differences and similarities in regional integration levels and processes in the two regions, to examine how the long-term future, role and impact of organizations such as the EU and ASEAN may depend heavily on how well they deal with complex and conflict-laden issues in the next few years. This volume analyzes the historical development, current state and prospective future evolution of political integration in the two regions. These leading authors identify key variables that account for the contrasting political integration levels, clearly demonstrating and explaining why the rhythm of integration in both regions varies. With contributions from both Asian and European scholars on each topic, this book delivers: comparative rather than a single region focus breakdowns of regional integration into key issue areas analysis of monetary cooperation and integration incisive assessments of institutional reform key topics of enlargement, including: identity, distributional equity, the distribution of power and effectiveness or decision-making efficiency discussion of regional and

international security crises expert scholarship from both European and Asian perspectives. This volume will be of great interest to students and scholars of IPE, international relations, political science, contemporary history and European studies and Asian studies. *Nuclear Logics* examines why some states seek nuclear weapons while others renounce them. Looking closely at nine cases in East Asia and the Middle East, Etel Solingen finds two distinct regional patterns. In East Asia, the norm since the late 1960s has been to forswear nuclear weapons, and North Korea, which makes no secret of its nuclear ambitions, is the anomaly. In the Middle East the opposite is the case, with Iran, Iraq, Israel, and Libya suspected of pursuing nuclear-weapons capabilities, with Egypt as the anomaly in recent decades. Identifying the domestic conditions underlying these divergent paths, Solingen argues that there are clear differences between states whose leaders advocate integration in the global economy and those that reject it. Among the former are countries like South Korea, Taiwan, and Japan, whose leaders have had stronger incentives to avoid the political, economic, and other costs of acquiring nuclear weapons. The latter, as in most cases in the Middle East, have had stronger incentives to exploit nuclear weapons as tools in nationalist platforms geared to helping their leaders survive in power. Solingen complements her bold argument with other logics explaining nuclear behavior, including security dilemmas, international norms and institutions, and the role of democracy and authoritarianism. Her account charts the most important frontier in understanding nuclear proliferation: grasping the relationship between internal and external political survival. *Nuclear Logics* is a pioneering book that is certain to provide an invaluable resource for researchers, teachers, and practitioners while reframing the policy debate surrounding nonproliferation. Written by two experienced teachers with a long history of research, this textbook provides students with a detailed overview of developments in early modern Southeast Asia, when the region became tightly integrated into the world economy because of international demand for its unique forest and sea products. Proceeding chronologically, each chapter covers a specific time frame in which Southeast Asia is located in a global context. A discussion of general features that distinguish the period under discussion is followed by a detailed account of the various sub-regions. Students will be shown the ways in which local societies adapted to new religious and political ideas and responded to far-reaching economic changes. Particular attention is given to lesser-known societies that inhabited the seas, the forests, and the uplands, and to the role of the geographical environment in shaping the region's history. The authoritative yet accessible narrative features maps, illustrations, and timelines to support student learning. A major contribution to the field, this text is essential reading for students and specialists in Asian studies and early modern world history. With an engaging and lively style, Rhoads Murphy - a leading scholar in the field - takes readers on a comprehensive and balanced exploration of the 5000 year sweep of Asian history. *Modern East Asia: A History* explores the history of China, Japan, Korea, and Vietnam from the late eighteenth century to the present. The text presents information on each country individually and also demonstrates how historical trends within each nation are linked. The book begins with an introduction to cultural foundations and a brief history of East Asia in the seventeenth century. The volume progresses chronologically, beginning in 1830 with a discussion of the major crises that swept East Asia, including covering both domestic and international challenges. In proceeding chapters, readers learn about key events, ideas, conflicts, and negotiations that have shaped East Asia throughout history. They read about the termination of the feudal structure in Japan, French colonial conquest in Vietnam, the birth of modern nationalism in China, the events that led to Korea splitting into two separate nations,

and more. Comprehensive and complete, *Modern East Asia* provides readers with a thorough exploration of the progression of China, Japan, Korea, and Vietnam throughout the modern period. The text is ideal for world history courses, especially those that focus on East Asia. Mary L. Hanneman is an associate professor of Asian studies and history at the University of Washington, Tacoma. She holds a doctoral degree in history from the University of Washington. Wayne Patterson is a professor of history at St. Norbert College. He holds a doctoral degree in international relations from the University of Pennsylvania. Yi Li is a history instructor at Tacoma Community College. He holds a doctoral degree in history from the University of Washington. James A. Anderson is an associate professor and the department head of the History Department at the University of North Carolina at Greensboro. He holds a doctoral degree in history from the University of Washington. *Gender in Modern East Asia* explores the history of women and gender in China, Korea, and Japan from the seventeenth century to the present. This unique volume treats the three countries separately within each time period while also placing them in global and regional contexts. Its transnational and integrated approach connects the cultural, economic, and social developments in East Asia to what is happening across the wider world. The text focuses specifically on the dynamic histories of sexuality; gender ideology, discourse, and legal construction; marriage and the family; and the gendering of work, society, culture, and power. Important themes and topics woven through the text include Confucianism, writing and language, the role of the state in gender construction, nationalism, sexuality and prostitution, *New Women and Modern Girls*, feminisms, "comfort" women, and imperialism. Accessibly written and comprehensive, *Gender in Modern East Asia* is a much-needed contribution to the study of the region. A new, comprehensive, one volume history of Southeast Asia that spans prehistory to the present. Ricklefs brings together colleagues at the National University of Singapore whose expertise covers the entire region, encompassing political, social, economic, religious and cultural history. Opening with an account of the ethnic groups and initial cultural and social structures of Southeast Asia, the book moves through the early 'classical' states, the arrival of new global religions and the impact of non-indigenous actors. The history of early modern states and their colonial successors is followed by analysis of World War II across the region, Offering a definitive account of decolonisation and early post-colonial nation-building, the text then transports us to modern-day Southeast Asia, exploring its place in a world recovering from the financial crisis. The distinguished author team provide an authoritative and accessible narrative, drawing upon the latest research and offering detailed guidance on further reading. A landmark contribution to the field, this is an essential text for scholars, students and anyone interested in Southeast Asia. **ALERT:** Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Check with the seller prior to purchase. -- The recent conflict between

indigenous Uyghurs and Han Chinese demonstrates that Xinjiang is a major trouble spot for China, with Uyghur demands for increased autonomy, and where Beijing's policy is to more firmly integrate the province within China. This book provides an account of how China's evolving integrationist policies in Xinjiang have influenced its foreign policy in Central Asia since the establishment of the People's Republic in 1949, and how the policy of integration is related to China's concern for security and its pursuit of increased power and influence in Central Asia. The book traces the development of Xinjiang - from the collapse of the Qing empire in the early twentieth century to the present - and argues that there is a largely complementary relationship between China's Xinjiang, Central Asia and grand strategy-derived interests. This pattern of interests informs and shapes China's diplomacy in Central Asia and its approach to the governance of Xinjiang. Michael E. Clarke shows how China's concerns and policies, although pursued with vigour in recent decades, are of long-standing, and how domestic problems and policies in Xinjiang have for a long time been closely bound up with wider international relations issues. Asia was the principle focus of empire-builders from Alexander and Akbar to Chinggis Khan and Qianlong and yet, until now, there has been no attempt to provide a comprehensive history of empire in the region. *Empire in Asia* addresses the need for a thorough survey of the topic. This volume covers the long 19th century, commonly seen in terms of 'high imperialism' and the global projection of Western power. This volume explores the dynamic, volatile and often contested processes by which, by the early years of the 20th century, Asian states, space and peoples became deeply integrated into the wider dynamics of global reordering. Drawing on case studies from across Asia, the contributors discuss key themes including ideology, concepts of identity, religion and politics, state building and state formation, the relationships between space, people, and sovereignty, the movements of goods, money, people and ideas, and the influence and impact of conflict and military power. The two volumes of *Empire in Asia* offer a significant contribution to the theory and practice of empire when considered globally and comparatively and are essential reading for all students and scholars of global, imperial and Asian history. Contributors to this volume explore the changing concepts of the social and the economic during a period of fundamental change across Asia. They challenge accepted explanations of how Western knowledge spread through Asia and show how versatile Asian intellectuals were in introducing European concepts and in blending them with local traditions. *Modern East Asia* details the history of the region while recognizing the intellectual, religious, artistic, economic and scientific contributions East Asians have made to the contemporary world. The three national narratives of China, Japan and Korea are told separately within each chapter, and the text emphasizes connections among them as well as the unique evolution of each society, allowing readers to experience the individual countries' histories as well as the region's history as a whole. The text takes into consideration the radical changes in the field of history in the past 40 years, as the authors have incorporated scholarship in areas such as gender studies, social history and minority histories. While reading social, economic and personal histories, students will uncover the evolution of family structures, peripheral and outcast communities, the sociopolitical power of language and literature, the rise of nationalism and regional trading networks. Attention is also paid to environmental and diplomatic themes. A Brookings Institution Press and the Research Institute of Economy, Trade, and Industry (Japan) publication *East Asian economic integration* is on the rise. In the past decade, all of the region's powers have begun negotiating free trade agreements with their neighbors. They are also exploring broader regional options, such as the creation of an East Asian summit or free trade area. These developments have not

always been welcomed by observers in other parts of the world. Some fear that they mark a turn away from integration into the global economy and herald the emergence of a closed, inward-looking bloc. In this timely and important book, Naoko Munakata offers an alternative perspective, based on her experience as an economic official and trade negotiator over the past 20 years. East Asian integration, she argues, is not driven by defensiveness or anti-Western sentiment. Instead, it reflects pragmatic calculations of economic interest, as well as a desire for mutual trust and a sense of community. Munakata makes her case by analyzing developments in the region since the mid-1980s, highlighting such important factors as the evolution of Asia-Pacific Economic Cooperation (APEC), the impact of the 1997–98 Asian financial crisis, and the rise of China. She also outlines possible future scenarios for the region and offers policy prescriptions for building on regionalism's achievements to date. Over the coming decades, the rise of China, its relationship with Japan, and the institutional arrangements that bind those countries to the United States and the countries of East and Southeast Asia will become critical factors in the global balance of power. Transforming East Asia is essential reading for anyone seeking to understand the roots of this transformation. This book studies the East Asian world-system and its dynastic cycles as they were influenced by climate and demographic change, diseases, the expansion of trade, and the rise of science and technology. By studying the history of East Asia until the beginning of the 20th century and offering a comparative perspective on East Asian countries, including China, Japan and Korea, it describes the historical evolution of the East Asian world-system as being the result of good or poor management of the respective populations and environments. Lastly, the book discusses how the East Asian regions have become integrated into a single world-system by a combination of trade, commerce, and military action. Given its scope, the book will appeal to scholars of history, sociology, political science and environmental studies, and to anyone interested in learning about the effects of climate change on the dynamic development of societies. "A comprehensive history of East Asia, including extensive coverage of the region's cultural, political, economic, and social history. Coverage focuses on the narratives of China, Japan, and Korea while examining the history of each society in a larger, global context."--Back cover. This book examines the economic, political and institutional dimensions of pan-Asian integration. With little progress made in the Doha Round, there is heightened interest in deeper regional integration in Asia. The book explores regional patterns of trade and investment and the potential for deeper integration. Engaging, integrated, and analytical, East Asia: A New History provides a comprehensive history of the East Asian countries and addresses a diverse range of social, economic, and intellectual topics. This accessible and richly illustrated book examines China, Japan, Korea, and Vietnam, and includes coverage of the common people, the environment, and the experiences of women--topics that are often neglected in other books. MARKET Appropriate for anyone interested in the History of East Asia. 73-99350-7 Asia as we know it today is the product of a wide range of polity expansions over time. Recognising the territorial expansions of Asian polities large and small through the last several millennia helps rectify the fallacy, long-held and deeply entrenched, that Asian polities have been interested only in the control of populations, not in expanding their command of territory. In countering this misapprehension, this book suggests that Asian polities have indeed been concerned with territorial control and expansion over time, whether for political or strategic advantage, trade purposes, defence needs, agricultural expansion or increased income through taxation. The book explores the historical experiences of a set of polity expansions within Asia, specifically in East and Southeast Asia, and, by examining the

motivations, mechanisms, processes, validations and limitations of these Asian territorial expansions, reveals the diverse avenues by which Asian polities have grown. The chapters draw on these historical examples to highlight the connections between Asian polity expansion and centralised political structures, and this aids in a broader and more comprehensive understanding of Asian political practice, both past and present. Through these chapter studies and the integrative introduction, the book interrogates key concepts such as imperialism and colonialism, and the applicability and relevance of such terminology in Asian contexts, both historical and contemporary. Comparisons and contrasts with European historical expansions are also suggested. This book will be welcomed by students and scholars of Asian history, as well as by those with an interest in Asian interactions, international relations, polity expansion, Asia--Europe historical comparisons and globalisation. This book describes the past, present and future of East Asian order, and analyzes how China, Japan, the U.S and ASEAN play important roles in the transformation of East Asian order, and discusses the new logic of regional order formation in the era of globalization and regional integration. The book analyzes China's relationship with East Asian order, great powers and regional institutions involved, especially bilateral relations between China and Japan, China and the U.S., China and ASEAN, and explores how China could improve its regional strategy. Addressing a hot topic in world politics from the angle of regional order, and using methods such as historical analysis, comparative analysis, quantitative analysis and case study, this readable book enables readers to develop an understanding of the history and status quo of East Asia and China's role in the region. "Asia was the principle focus of empire-builders from Alexander and Akbar to Chinggis Khan and Qianlong and yet, until now, there has been no attempt to provide a comprehensive history of empire in the region. Empire in Asia addresses the need for a thorough survey of the topic. This volume covers the long 19th century, commonly seen in terms of 'high imperialism' and the global projection of Western power. This volume explores the dynamic, volatile and often contested processes by which, by the early years of the 20th century, Asian states, space and peoples became deeply integrated into the wider dynamics of global reordering. Drawing on case studies from across Asia, the contributors discuss key themes including ideology, concepts of identity, religion and politics, state building and state formation, the relationships between space, people, and sovereignty, the movements of goods, money, people and ideas, and the influence and impact of conflict and military power. The two volumes of Empire in Asia offer a significant contribution to the theory and practice of empire when considered globally and comparatively and are essential reading for all students and scholars of global, imperial and Asian history."--Bloomsbury Publishing. Over the course of less than a century, the U.S. transformed from a nation that excluded Asians from immigration and citizenship to one that receives more immigrants from Asia than from anywhere else in the world. Yet questions of how that dramatic shift took place have long gone unanswered. In this first comprehensive history of Asian exclusion repeal, Jane H. Hong unearths the transpacific movement that successfully ended restrictions on Asian immigration. The mid-twentieth century repeal of Asian exclusion, Hong shows, was part of the price of America's postwar empire in Asia. The demands of U.S. empire-building during an era of decolonization created new opportunities for advocates from both the U.S. and Asia to lobby U.S. Congress for repeal. Drawing from sources in the United States, India, and the Philippines, Opening the Gates to Asia charts a movement more than twenty years in the making. Positioning repeal at the intersection of U.S. civil rights struggles and Asian decolonization, Hong raises thorny questions about the meanings of nation, independence, and citizenship on the global stage.

This book analyses the efforts throughout East Asia to deploy education for purposes of political socialization, and in particular in order to shape notions of identity. The chapters also examine the trend of 'common textbook initiatives', which have recently emerged in East Asia with the aim of helping to defuse tensions arguably fuelled by existing practices of mutual (mis)representation. These are analysed in relation to the East Asian political context, and compared with previous and ongoing endeavours in other parts of the world, particularly Europe, which have been keenly observed by East Asian practitioners. Written by a group of international education experts, chapters discuss the enduring focus on the role of curricula in inculcating homogenous visions of the national self, and indeed homogenized visions of significant 'others'. Including contributions from scholars and curriculum developers involved personally in the writing of national and multi-national history textbooks this book will be of interest to students and scholars of Asian education, Asian history and comparative education studies. Gotelind Müller is Professor of Chinese Studies, University of Heidelberg, Germany

At the core of this book is a seemingly simple question: What is Asia? In search of common historical roots, traditions and visions of political-cultural integration, first Japanese, then Chinese, Korean and Indian intellectuals, politicians and writers understood Asianisms as an umbrella for all conceptions, imaginations and processes which emphasized commonalities or common interests among different Asian regions and nations. This book investigates the multifarious discursive and material constructions of Asia within the region and in the West. It reconstructs regional constellations, intersections and relations in their national, transnational and global contexts. Moving far beyond the more well-known Japanese Pan-Asianism of the first half of the twentieth century, the chapters investigate visions of Asia that have sought to provide common meanings and political projects in efforts to trace, and construct, Asia as a united and common space of interaction. By tracing the imagination of civil society actors throughout Asia, the volume leaves behind state-centered approaches to regional integration and uncovers the richness and depth of complex identities within a large and culturally heterogeneous space. East Asia is now experiencing significant economic growth and social change. Integration of East Asia seems an irresistible trend, as East Asian countries are closely interdependent with each other and share many common interests in economic development. This book analyzes the cooperation and challenges of East Asian countries in the process of integration. It includes 15 chapters in four sections. The first section discusses the impact of East Asia cooperation and economic integration. The second section emphasizes the election of political leadership in East Asia. The third section covers the topics of East Asian cultural identity, history and norms. The fourth section studies the relationship between East Asia and the World. The chapters are selected from two Trilateral symposia held in Seoul and Shanghai in 2013 and 2014, respectively. The Symposia offer comprehensive and diversified views of scholars from China, Korea and Japan. In an ambitious effort to overcome the extreme fragmentation of early Southeast Asian historiography, this study connects Southeast Asia to world history. Victor Lieberman argues that over a thousand years, each of mainland Southeast Asia's great lowland corridors experienced a pattern of accelerating integration punctuated by recurrent collapse. These trajectories were synchronized not only between corridors, but most curiously, between the mainland as a whole, much of Europe, and other sectors of Eurasia. Lieberman describes in detail the nature of mainland consolidation and dissects the mix of endogenous and external factors responsible.
