We are all caught up in our children's lives. We all remember our own schooldays and, as parents, we watch anxiously as our children go through it. As we look at the world of teaching from the outside we wonder not only what is going on but what we can do to help. Jonathan Smith, a born teacher and writer, takes us on his personal journey from his first days as a pupil through to the challenges of his professional and private life on the other side of the desk. He makes us feel what it is like to be a teacher facing the joys and the battles of a class. How do you influence a child? He describes how you catch and stretch their minds. What difference can a teacher make, or how much damage can he do? Should clever pupils teach themselves? What works in the classroom world and what does not? And while influencing the young, how do you develop yourself, how do you teach yourself to keep another life and find that elusive balance? This is a compelling and combative story, warmly anecdotal in approach, yet as sharp in its views of the current debates as it is sensitive in its psychological understanding. From the first page to the last, and without a hint of jargon, this inspiring book rings true. ?????????? In this insightful analysis of public school policy, including No Child Left Behind, William E. Smith offers a unique perspective—he has taught at the elementary, middle, and high school levels; served in several administrative roles, including principal of an impoverished, rural K-5 school and a K-12 laboratory school; and been a teacher educator and educational scholar, before returning to the classroom. In Restoring Honor to Public Schools: A Teacher's Vision for

American Education, Smith draws upon thirty years of experience in varied roles to provide an insider's look at teaching and learning. With clear and uncompromising analysis, he assesses the real impact of politics and educational policymaking on our children's lives. Smith provides thoughtful and achievable recommendations for honoring teachers and teaching and restoring civility and intelligence to our nation's discourse about education. Child Development and Education bridges the gap between theory and practice, showing those who teach and care for infants, children, and adolescents how to apply developmental research and theory to everyday practice. More so than any other text, Child Development and Education not only describes developmental phenomena--for infants through late adolescence--but also facilitates observations of and analyses of what children say, do, and create, ensuring that educators can make informed decisions that meet children's and adolescent's needs. New to the fifth edition is a sensitivity to the cultural and bioecological nature of development. New features of the text situate children and adolescents in the contexts of their upbringing and articulate the implications of these experiences for educators and other professionals. Illustrated is the diverse nature of development and how it is influenced by social, environmental, and cultural contexts. Also new to this edition is support for teacher licensure preparation. Teacher candidates are alerted to developmental concepts and theorists they need to know, and are provided practice test questions and case studies to review, demonstrating for them how to prepare for their licensure exam. Further to the clear political commitment made by the European Ministers of Education at the Helsinki Ministerial Conference in April 2013, the Council of Europe launched its Platform on Ethics, Transparency and Integrity in Education, ETINED. ETINED is a network of specialists representing the 50 States Parties to the European Cultural Convention, which carries out initiatives at European, regional and national level to take effective action against corruption and encourage all the relevant stakeholders in society to commit fully to a set of fundamental ethical principles for public and professional life. This publication reflects the discussions held at the 7th Session of the Prague Forum and provides strong evidence of the drive in Europe to promote high quality, corruption-free education based on common ethical principles. Offering many national examples and good practice in this area, it also raises several issues relating to the ethical behaviour of all education players, academic integrity and plagiarism, and the problem of the recognition of qualifications obtained by distance and online learning. It also covers how ETINED came into being, how it has developed and how it is applied in various countries.
