Monastic Education in Late Antiquity Lillian I. Larsen, Samuel Rubenson, 2018-08-23 In re-examining the Christianization of the Roman Empire and subsequent transformation of Graeco-Roman classical culture this volume challenges conventional ways of understanding both the history of Christian monasticism and the history of education The chapters interrogate assumptions that have framed monastic practice as pedagogically unprecedented with few obvious precursors and or parallels A number explore how both teaching and practice merge classical pedagogical structures with Christian sources and traditions Others re-situate monasticism within a longer trajectory of educational and institutional frameworks elucidating models that remain central to the preservation of both Greek and Latin literary culture and the skills of reading and writing Through re-examination of archaeological evidence and critical re-reading of signature monastic texts each documents the degree to which monastic structures emerged in close alignment with urban literate society and retain established affinity with classical rhetorical and philosophical school traditions

Asceticism and Its Critics Oliver Freiberger,2006-10-19 Scholars of religion have always been fascinated by asceticism Some have even regarded this radical way of life the withdrawal from the world combined with practices that seriously affect basic bodily needs up to extreme forms of self mortification as the ultimate form of a true religious quest This view is rooted in hagiographic descriptions of prominent ascetics and in other literary accounts that praise the ascetic life style Scholars have often overlooked however that in the history of religions ascetic beliefs and practices have also been strongly criticized by followers of the same religious tradition as well as by outsiders The respective sources provide sufficient evidence of such critical strands but surprisingly as yet no attempt has been made to analyze this criticism of asceticism systematically This book is a first attempt of filling this gap Ten studies present cases from both Asian and European traditions classical and medieval Hinduism early and contemporary Buddhism in South and East Asia European antiquity early and medieval Christianity and 19th 20th century Aryan religion Focusing on the critics of asceticism their motives their arguments and the targets of their critique these studies provide a broad range of issues for comparison They suggest that the critique of asceticism is based on a worldview differing from and competing with the ascetic worldview often in one and the same historical context The book demonstrates that examining the critics of asceticism helps understand better the complexity of religious traditions and their cultural contexts The comparative analysis moreover shows that the criticism of asceticism reflects a religious worldview as significant and widespread in the history of religions as asceticism itself is
