Culture on Tour Edward M. Bruner, 2005
Recruited to be a lecturer on a group tour of Indonesia Edward M Bruner decided to make the tourists aware of tourism itself He photographed tourists photographing Indonesians asking the group how they felt having their pictures taken without their permission After a dance performance Bruner explained to the group that the exhibition was not traditional but instead had been set up specifically for tourists His efforts to induce reflexivity led to conflict with the tour company which wanted the displays to be viewed as replicas of culture and to remain unexamined Although Bruner was eventually fired the experience became part of a sustained exploration of tourist performances narratives and practices Synthesizing more than twenty years of research in cultural tourism *Culture on Tour* analyzes a remarkable variety of tourist productions ranging from safari excursions in Kenya and dance dramas in Bali to an Abraham Lincoln heritage site in Illinois Bruner examines each site in all its particularity taking account of global and local factors as well as the multiple perspectives of the various actors the tourists the producers the locals and even the anthropologist himself The collection will be essential to those in the field as well as to readers interested in globalization and travel

Contemporary Ethnographies Francisco Ferrándiz, 2020-04-28
Contemporary Ethnographies is a call to use ethnography in imaginative ways adjusting to rapidly evolving social circumstances It is based on a reflexive and theoretically grounded exploration of the author's two main research projects the study of the spiritist possession cult of Mar a Lionza in Venezuela and the analysis of the contemporary exhumation of Civil War 1936-1939 mass graves in contemporary Spain Ferrándiz critically reviews the labyrinthine and continuous

transforming nature of ethnographic engagement He defends both the need for methodological rigour and the astounding flexibility of ethnography to adjust in creative ways to shifting realities in a dynamic world a world in which research scenarios multiply social actors are on the move physically or digitally acts of violence proliferate new technologies are transforming the experience and perception of human life and the demand production circulation and consumption of knowledge is greatly diversified overshadowing former well established and more hierarchical patterns of diffusion The book is conceived of as a historically grounded open debate providing as many certainties as moments of unpredictability and unresolved dilemmas It is valuable reading for students and scholars interested in ethnographic methods and anthropological theory

Westbrook, 2009-05-15 As the image of anthropologists exploring exotic locales and filling in blanks on the map has faded the idea that cultural anthropology has much to say about the contemporary world has likewise diminished In an increasingly smaller world how can anthropology help us to tackle the concerns of a global society David A Westbrook argues that the traditional tool of the cultural anthropologist ethnography can still function as an intellectually exciting way to understand our interconnected yet mysterious worlds *Navigators of the Contemporary* describes the changing nature of ethnography as anthropologists use it to analyze places closer to home Westbrook maintains that a

conversational style of ethnography can help us look beyond our assumptions and gain new insight into arenas of contemporary life such as corporations financial institutions science the military and religion Westbrook s witty absorbing book is a friendly challenge to anthropologists to shed light on the present and join broader streams of intellectual life And for those outside the discipline his inspiring vision of ethnography opens up the prospect of understanding our own world in much greater depth

The Ethnographer's Method Alex Stewart,1998-06-17 Helping ethnographers devise a clearly articulated explanation of their methods this book argues that norms about discussing methods in ethnographies are underdeveloped The book considers what ought to be normative in methods discussions within ethnography from the research design to the end product

Mistrust Matthew Carey,2017 Trust occupies a unique place in contemporary discourse Seen as both necessary and good it is variously depicted as enhancing the social fabric lowering crime rates increasing happiness and generating prosperity It allows for complex political systems permits human communication underpins financial instruments and economic institutions and holds society itself together There is scant space within this vision for a nuanced discussion of mistrust With few exceptions it is treated as little more than a corrosive absence This monograph instead proposes an ethnographic and conceptual exploration of mistrust as a legitimate epistemological stance in its own right It examines the impact of mistrust on practices of conversation and communication friendship and society as well as politics and cooperation and suggests that suspicion doubt and uncertainty can also ground ways of organizing human society and cooperating with others

Projects in Ethnographic Research Michael V. Angrosino,2004-11-04 Designed to give students a hands on taste of what it is like to do ethnographic research this concise manual offers a related set of three enriching yet manageable research projects with

clear workable instructions and guidelines Through them Professor Angrosino demonstrates for students at all levels that ethnography is an exciting and challenging form of social research Solid encouraging and readable the guide provides a basic format so that students can learn the fundamental ethnographic data collection techniques of observation interviewing and analyzing archives while conducting their own mini projects in local settings Projects in Ethnographic Research also includes many well chosen concrete and illuminating examples drawn from the research of the authors own students and from the published works of other ethnographers Projects in Ethnographic Research is most useful to those who teach introductory cultural anthropology and who want to introduce their students to some important field techniques but cannot justify assigning a longer more comprehensive methods book Brief and reasonably priced the Angrosino text is sure to become an important component in introductory classrooms because it enhances some of the key concepts in cultural anthropology It will also ignite the interest of future ethnographers

Reflective Interviewing Kathryn Roulston,2010-01-21 Qualitative researchers have long made use of many different interview forms Yet for novice researchers making the connections between theory and method is not always easy This book provides a theoretically informed guide for researchers learning how to interview in the social sciences In order to undertake quality research using qualitative interviews a researcher must be able to theorize the application of interviews to investigate research problems in social science research As part of this process researchers examine their subject positions in relation to participants and examine their interview interactions systematically to inform research design This book provides a practical approach to interviewing helping researchers to learn about themselves as interviewers in ways that will inform the design conduct analysis and representation of interview data The author takes the reader through the practicalities of designing and conducting an interview study and relates various forms of interview to different underlying epistemological assumptions about how knowledge is produced The book concludes with practical advice and perspectives from experienced researchers who use interviews as a method of data generation This book is written for a multidisciplinary audience of students of qualitative research methods
