In spite of all the papers that others have written about the manuscript, there is no complete survey of all the approaches, ideas, background information and analytic studies that have accumulated over the nearly fifty-five years since the manuscript was discovered by Wilfrid M. Voynich in 1912. This report pulls together all the information the author could obtain from all the sources she has examined, and to present it in an orderly fashion. The resulting survey will provide a firm basis upon which other students may build their work, whether they seek to decipher the text or simply to learn more about the problem. Beginning in 1952, an unnumbered Dec. issue is published consisting of the society's Proceedings and the annual index of the Journal. John Beals/Bales (1650-1726) was born in England and died at Nottingham, Nottingham Twp., Chester Co., PA. He married Mary Clayton/Cleaton, the daughter of William Clayton and Prudence Miller Mickel of Chichester, Rumbalds Parish, Sussex, England. They were the parents of six children. Seven generations of descendants are given. The working paper is divided into two main parts. The first part is a descriptive analysis of the illicit use of biological agents by criminals and terrorists. It draws on a series of case studies documented in the second part. The case studies describe every instance identifiable in open source materials in which a perpetrator used, acquired, or threatened to use a biological agent. While the inventory of cases is clearly incomplete, it provides an empirical basis for addressing a number of important questions relating to both biocrimes and bioterrorism. This material should enable policymakers concerned with bioterrorism to make more informed decisions. In the course of this project, the author has researched over 270 alleged cases involving biological agents. This includes all incidents found in open sources that allegedly occurred during the 20th Century. While the list is certainly not complete, it provides the most comprehensive existing unclassified coverage of instances of illicit use of biological agents. This book offers a detailed review of the pathological and imaging features, diagnosis and treatment of IgG4-Related Kidney Disease (IgG4-RKD). IgG4-related disease (IgG4-RD), which is characterized by an elevated serum IgG4 level and infiltration of systemic organs by IgG4 positive plasma cells, is a newly recognized systemic disease. Diverse renal manifestations including specific tubulointerstitial nephritis, membranous nephropathy, and tumor-like urological diseases extending to the pelvis and urinary tract in IgG4-RD have been reported and are recently attracting attention as IgG4-RKD. In this book, leading researchers in the field present the latest insights into the broad spectrum of IgG4-RKD characteristics. In addition, they provide a detailed explanation of the pathology of IgG4-RKD including comparisons between the kidney and other affected organs, such as the lacrimal, salivary glands and pancreas in the histopathological section. IgG4-Related Kidney Disease will have a major impact on future immunological and nephrological studies and offers a useful resource not only for nephrologists but also general physicians and investigators in related fields. Technology enhanced learning (TEL) aims to design, develop and test sociotechnical innovations that will support and enhance learning practices of both individuals and organisations. It is therefore an application domain that generally covers technologies that support all forms of teaching and learning activities. Since information retrieval (in terms of searching for relevant learning resources to support teachers or learners) is a pivotal activity in TEL, the deployment of recommender systems has attracted increased interest. This brief attempts to provide an introduction to recommender systems for TEL settings, as well as to highlight their particularities compared to recommender systems for other application domains. In this book it explores science and technology, makes connections between these epistemic, cultural, and political trends, and develops profound insights into the nature of our postmodernity.
