In the “fast-paced, frightening” (The New York Times Book Review) sequel to *Bird Box*, the inspiration for the record-breaking Netflix film starring Sandra Bullock, bestselling author Josh Malerman brings unseen horrors to life. **NOMINATED FOR THE BRAM STOKER AWARD** • “Malorie is even more of a psychological thriller than *Bird Box*, and all the scarier for it.”—The Wall Street Journal Twelve years after Malorie and her children rowed up the river to safety, a blindfold is still the only thing that stands between sanity and madness. One glimpse of the creatures that stalk the world will drive a person to unspeakable violence. There remains no explanation. No solution. All Malorie can do is survive—and impart her fierce will to do so on her children. Don’t get lazy, she tells them. Don’t take off your blindfold. **AND DON’T LOOK.** But then comes what feels like impossible news. And with it, the first time Malorie has allowed herself to hope. Someone very dear to her, someone she believed dead, may be alive. Malorie has already lost so much: her sister, a house full of people who meant everything, and any chance at an ordinary life. But getting her life back means returning to a world full of unknowable horrors—and risking the lives of her children again. Because the creatures are not the only thing Malorie fears: There are the people who claim to have caught and experimented on the creatures. Murmuring of monstrous inventions and dangerous new ideas. And rumors that the creatures themselves have changed into something even more frightening. Malorie has a harrowing choice to make: to live by the rules of survival that have served her so well, or to venture into the darkness and reach for hope once more. One day in the park, the Aldens’ dog, Watch, comes across a mysterious box with a note inside. “Congratulations!” the note says. “You’ve found it!” The box is part of a fun new treasure-hunting game, and soon Henry, Jessie, Violet, and Benny are looking all over town for cleverly hidden boxes. But they’re not the only ones on the trail for clues! When several of the treasure boxes go missing, the game is ruined for everyone. Who would steal the boxes—and why? **The Negro Motorist Green Book** was a groundbreaking guide that provided African American travelers with crucial information on safe places to stay, eat, and visit during the era of segregation in the United States. This essential resource, originally published from 1936 to 1966, offered a lifeline to black motorists navigating a deeply divided nation, helping them avoid the dangers and indignities of racism on the road. More than just a travel guide, **The Negro Motorist Green Book** stands as a powerful symbol of resilience and resistance in the face of oppression, offering a poignant glimpse into the challenges and triumphs of the African American experience in the 20th century. After her mother tosses out a large box of junk, a girl and her younger brother

pull it out. They pretend it is a cave, car, house, and cage. And even when it lies in pieces on the ground, their imaginations lead them to even more inventive uses for the box. Full color. Closed Circuit Television (CCTV) cameras are a prominent, if increasingly familiar, feature of urbanism. They symbolize the faith that spatial authorities place in technical interventions for the treatment of social problems. CCTV was principally introduced to sterilize municipalities, to govern conducts and to protect properties. Vast expenditure has been committed to these technologies without a clear sense of how precisely they influence things. CCTV cameras might appear inanimate, but *Opening the Black Box* shows them to be vital mediums within relational circulations of supervision. The book principally excavates the social relations entwining the everyday application of CCTV. It takes the reader on a journey from living beneath the camera, to working behind the lens. Attention focuses on the labour exerted by camera operators as they source and process distanced spectacles. These workers are paid to scan monitor screens in search of disorderly vistas, visualizing stimuli according to its perceived riskiness and/or allurements. But the projection of this gaze can draw an unsettling reflection. It can mean enduring behavioural extremities as an impotent witness. It can also entail making spontaneous decisions that determine the course of justice. *Opening the Black Box*, therefore, contemplates the seductive and traumatic dimensions of monitoring telemediated ‘riskscapes’ through the prism of camera circuitry. It probes the positioning of camera operators as ‘vicarious’ custodians of a precarious social order and engages their subjective experiences. It reveals the work of watching to be an ambiguous practice: as much about managing external disturbances on the street as managing internal disruptions in the self. In the park, the Aldens dog, Watch, comes across a mysterious box with a note inside. The box is part of a fun new treasure-hunting game, and soon the Alden children are looking for other cleverly hidden boxes. When several boxes go missing, the game is ruined for everyone. Who would steal the boxes--and why? Illustrations. “New Yorkers are particular about pizza, and no one has a more well-formed opinion than Scott Wiener.” —*Newsday* One of the world’s foremost pizza experts presents more than 100 weird and wild pizza box designs Since the origins of to-go pizza, pizzerias and pizza chains have taken great pride in covering take-out boxes with captivating designs. They’ve also wrestled with the best way to manufacture a box that can keep a pizza looking and tasting great. Here, the world’s expert on pizza boxes presents more than one hundred weird and wild box designs and explores the curious history of the pizza box. Included are international designs, corporate designs, and dozens of quirky images from mom-and-pop pizzerias. Where does all this art come from? Scott Wiener has been collecting and cataloging pizza boxes for more than five years. In *Viva la Pizza!*, Wiener traces design trends over the past four decades and profiles some of the world’s most prolific box designers and manufacturers. The result is a captivating overview of pizza culture and a new way to look at one of the world’s favorite foods. A box is just a box . . . unless it’s not a box. From mountain to rocket ship, a small rabbit shows that a box will go as far as the imagination allows. Inspired by a memory of sitting in a box on her driveway with her sister, Antoinette Portis captures the thrill when pretend feels so real that it actually becomes real—when the imagination takes over and inside a cardboard box, a child is transported to a world where anything is possible. “The ‘inside-the-box approach’ can reveal key opportunities for innovation that are hiding in plain sight” (Daniel H. Pink, author of *Drive*). The traditional attitude toward creativity in the American business world is to “think outside the box”—to brainstorm without restraint in hopes of coming up with a breakthrough idea, often in moments of crisis. Sometimes it works, but it’s a problem-specific solution that does nothing to engender creative thinking more generally. *Inside the Box* demonstrates Systematic Inventive Thinking (SIT), which systemizes creativity as part of the corporate culture. This counterintuitive and powerfully effective approach to creativity requires thinking inside the box, working in one’s familiar world to create new ideas independent of specific problems. SIT’s techniques and principles have instilled creative thinking into such companies as Procter & Gamble, Johnson & Johnson, and other industry leaders. *Inside the Box* shows how corporations have successfully used SIT in business settings as diverse as medicine, technology, new product development, and food packaging. Dozens of books discuss how to make creative thinking part of a corporate culture, but none takes the innovative and unconventional approach of *Inside the Box*. With “inside the box” thinking, companies of any size can become sufficiently creative to solve problems even before they develop and to innovate on an ongoing basis. It’s a system that works! “Boyd and Goldenberg explain the basic building blocks for creativity and by doing so help all of us better express our potential” (Dan Ariely, author of *Predictably Irrational*). Wanting to be more like his father, a young

Harsha Bhogle in his weekly column in the Indian Express has captured the entire gamut of Indian cricket. Out of the Box brings together the very best of Harsha's writings, in a book that will be a veritable delight for any cricket fan. Knowledgeable, frank and witty, and with a sense of drama comparable to that of cricket itself, Harsha brings the nation's cricketing ethos inimitably to life. And he is at his best when paying tribute to some cricketing greats—Lara, Inzamam, Jayasuriya, Ganguly, Sehwag, and the incomparable Tendulkar. As he follows India's fortunes on the cricket field at home and overseas, Harsha asks the question: can India really be no.1 in all three forms of the game? The answer lies in our history, and in the pages of *Out of the Box* Mariana is nervous for her first day of school. Her papa gives her a little "comfort" box and instructs her to open it whenever she absolutely, positively, really, really needs it. When she does, a whoosh of air flies out and surrounds her like a warm hug. As the day goes by, her confidence slowly increases and she tries harder and harder to not open the box. When an unkind classmate falls at recess and she is the only one around to help, will she need the box . . . or will he? Yellow hates Red, so does Green, and no one likes Orange! Can these crayons quit arguing and learn to cooperate? Shane DeRolf's deceptively simple poem celebrates the creation of harmony through diversity. In combination with Michael Letzig's vibrant illustrations, young readers will understand that when we all work together, the

A LOUDER THAN WAR BOOK OF THE YEAR A riveting journey into the psyche of Britain through its golden age of television and film; a cross-genre feast of moving pictures, from classics to occult hidden gems, *The Magic Box* is the nation's visual self-portrait in technicolour detail. 'The definition of gripping. Truly, a trove of wyrd treasures.' BENJAMIN MYERS 'A lovingly researched history of British TV [that] recalls the brilliant, the bizarre and the unworldly.' GUARDIAN 'A reclamation, not just of a visual 'golden age', but of Britain as a darkly magical place.' THE SPECTATOR 'A feat of argument, description and affection.' FINANCIAL TIMES 'Young unearths the ghosts of TV past - and Britain's dark psyche.' HERALD 'Highly entertaining . . . [A] fabulous treasure trove.' SCOTSMAN 'Young is a phenomenal scholar.' OBSERVER 'Impassioned.' THE CRITIC Growing up in the 1970s, Rob Young's main storyteller was the wooden box with the glass window in the corner of the family living room, otherwise known as the TV set. Before the age of DVDs and Blu-ray discs, YouTube and commercial streaming services, watching television was a vastly different experience. You switched on, you sat back and you watched. There was no pause or fast-forward button. The cross-genre feast of moving pictures produced in Britain between the late 1950s and late 1980s - from Quatermass and Tom Jones to *The Wicker Man* and *Brideshead Revisited*, from *A Canterbury Tale* and *The Go-Between* to *Bagpuss* and *Children of the Stones*, and from John Betjeman's travelogues to ghost stories at Christmas - contributed to a national conversation and collective memory. British-made sci-fi, folk horror,

period drama and televisual grand tours played out tensions between the past and the present, dramatised the fractures and injustices in society and acted as a portal for magical and ghostly visions. In *The Magic Box*, Rob Young takes us on a fascinating journey into this influential golden age of screen and discovers what it reveals about the nature and character of Britain, its uncategorisable people and buried histories - and how its presence can still be felt on screen in the twenty-first century. '[A] forensic dissection . . . this tightly packed treatise takes pains to illustrate how what we view affects how we view ourselves.' TOTAL FILM 'I'm scared I'll forget you!'] From the perspective of a young child, Joanna Rowland artfully describes what it is like to remember and grieve a loved one who has died. The child in the story creates a memory box to keep mementos and written memories of the loved one, to help in the grieving process. The unique point of view allows the reader to imagine the loss of any they have loved - a friend, family member, or even a pet. A parent guide in the back includes information on helping children manage the complex and difficult emotions they feel when they lose someone they love, as well as suggestions on how to create their own memory box.
