The Cultural Revolution Michel Oksenberg, Carl Riskin, Ezra F Vogel, 2020-08 The Chinese Communist system was from its very inception based on an inherent contradiction and tension and the Cultural Revolution is the latest and most violent manifestation of that contradiction Built into the very structure of the system was an inner conflict between the desiderata the imperatives and the requirements that technocratic modernization on the one hand and Maoist values and strategy on the other The Cultural Revolution collects four papers prepared for a research conference on the topic convened by the University of Michigan Center for Chinese Studies in March 1968 Michel Oksenberg opens the volume by examining the impact of the Cultural Revolution on occupational groups including peasants industrial managers and workers intellectuals students party and government officials and the military Carl Riskin is concerned with the economic effects of the revolution taking up production trends in agriculture and industry movements in foreign trade and implications of Maoist economic policies for China's economic growth Robert A Scalapino turns to China's foreign policy behavior during this period arguing that Chinese Communists in general and Mao in particular formed foreign policy with a curious combination of cosmic utopian internationalism and practical ethnocentrism rooted both in Chinese tradition and Communist experience Ezra F Vogel closes the volume by exploring the structure of the conflict the struggles between factions and the character of those factions

Age of Ambition: Chasing Fortune, Truth, and Faith in the New China Evan Osnos, 2014-05-13 Pulitzer Prize in General Nonfiction finalist Winner of the 2014 National Book Award in nonfiction As the Beijing correspondent for The New Yorker Evan Osnos was on the ground in China for years witness to profound political economic and cultural upheaval Age of Ambition provides a vibrant colorful and revelatory inner history of China during a moment of profound transformation From abroad we often see China as a caricature a nation of pragmatic plutocrats and ruthlessly dedicated students destined to rule the global economy or an addled Goliath riddled with corruption and on the edge of stagnation What we don't see is how both powerful and ordinary people are remaking their lives as their country dramatically changes In Age of Ambition Osnos describes the greatest collision taking place in that country the clash between the rise of the individual and the Communist Party's struggle to retain control He asks probing questions Why does a government with more success lifting people from poverty than any civilization in history choose to put strict restraints on freedom of expression Why do millions of young Chinese professionals fluent in English and devoted to Western pop culture consider themselves angry youth dedicated to resisting the West's influence How are Chinese from all strata finding meaning after two decades of the relentless pursuit of wealth Writing with great narrative verve and a keen sense of irony Osnos follows the moving stories of everyday people and reveals life in the new China to be a battleground between aspiration and authoritarianism in which only one can prevail An Economist Best Book of 2014 Winner of the bronze medal for the Council on Foreign Relations 2015 Arthur Ross Book Award

Out of Mao's Shadow Philip P. Pan, 2008-06-17 From an award winning journalist for The Washington Post and one of the leading China correspondents of his generation comes an eloquent and vivid chronicle of the world's most successful authoritarian state a nation undergoing a remarkable transformation Philip P Pan's groundbreaking book takes us inside the dramatic battle for China's soul and into the lives of individuals struggling to come to terms with their nation's past the turmoil and trauma of Mao's rule and to take control of its future Capitalism has brought prosperity and global respect to China but the Communist government continues to resist the demands of its people for political freedom Pan who reported in China for the Post for seven years and speaks fluent Chinese eluded the police and succeeded in going where few Western journalists have dared From the rusting factories in the industrial northeast to a tabloid newsroom in the booming south from a small town courtroom to the plush offices of the nation's wealthiest tycoons he tells the gripping stories of ordinary men and women fighting for political change An elderly surgeon exposes the government's cover up of the SARS epidemic A filmmaker investigates the execution of a young woman during the Cultural Revolution A blind man is jailed for leading a crusade against forced abortions carried out under the one child policy The young people who filled Tiananmen Square in the spring of 1989 saw their hopes for a democratic China crushed in a massacre but Pan reveals that as older more pragmatic adults many continue to push for justice in different ways They are survivors whose families endured one of the world's deadliest famines during the Great Leap Forward whose idealism was exploited during the madness of the Cultural Revolution and whose values have been tested by the booming economy and the rush to get rich

The Last Utopia Samuel Moyn,2012-03-05 Human rights offer a vision of international justice that today's idealistic millions hold dear. Yet the very concept on which the movement is based became familiar only a few decades ago when it profoundly reshaped our hopes for an improved humanity. In this pioneering book Samuel Moyn elevates that extraordinary transformation to center stage and asks what it reveals about the ideal's troubled present and uncertain future. For some human rights stretch back to the dawn of Western civilization, the age of the American and French Revolutions or the post World War II moment when the Universal Declaration of Human Rights was framed. Revisiting these episodes in a dramatic tour of humanity's moral history, *The Last Utopia* shows that it was in the decade after 1968 that human rights began to make sense to broad communities of people as the proper cause of justice. Across eastern and western Europe as well as throughout the United States and Latin America, human rights crystallized in a few short years as social activism and political rhetoric moved it from the hallways of the United Nations to the global forefront. It was on the ruins of earlier political utopias, Moyn argues, that human rights achieved contemporary prominence. The morality of individual rights substituted for the soiled political dreams of revolutionary communism and nationalism as international law became an alternative to popular struggle and bloody violence. But as the ideal of human rights enters into rival political agendas, it requires more vigilance and scrutiny than when it became the watchword of our hopes.

How China Sees the World John M. Friend,Bradley A. Thayer,2018-11-01 Han centrism, a virulent form of Chinese nationalism, asserts that the Han Chinese are superior to other peoples and have a legitimate right to advance Chinese interests at the expense of other countries. Han nationalists have called for policies that will allow China to reclaim the prosperity stolen by foreign powers during the Century of Humiliation. The growth of Chinese capabilities and Han centrism suggests that the United States, its allies, and other countries in Asia will face an increasingly assertive China, one that thinks it possesses a right to dominate international politics. John M. Friend and Bradley A. Thayer explore the roots of the growing Han nationalist group and the implications of Chinese hypernationalism for minorities within China and for international relations. The deeply rooted chauvinism and social Darwinism underlying Han centrism, along with China's rapid growth, threaten the current stability of international politics, making national and international competition and conflict over security more likely. Western thinkers have yet to consider the adverse implications of a hypernationalistic China, as opposed to the policies of a pragmatic China, were it to become the world's dominant state.

The China Mirage James Bradley,2015-04-21 From the bestselling author of *Flags of our Fathers*, *Flyboys*, and *The Imperial Cruise*, a spellbinding history of turbulent U.S.-China relations from the 19th century to World War II and Mao's ascent. In each of his books, James Bradley has exposed the hidden truths behind America's engagement in Asia. Now comes his most engrossing work yet. Beginning in the 1850s, Bradley introduces us to the prominent Americans who made their fortunes in the China opium trade. As they, good Christians all, profitably addicted millions of American missionaries arrived, promising salvation for those who adopted Western ways. And that was just the beginning. From drug dealer Warren Delano to his grandson Franklin Delano Roosevelt, from the port of Hong Kong to the towers of Princeton University, from the era of Appomattox to the age of the A Bomb, *The China Mirage* explores a difficult century that defines U.S.-Chinese relations to this day.

On Their Own Terms Benjamin A. Elman, 2009-07-01 In *On Their Own Terms* Benjamin A. Elman offers a much needed synthesis of early Chinese science during the Jesuit period 1600-1800 and the modern sciences as they evolved in China under Protestant influence 1840s-1900. By 1600 Europe was ahead of Asia in producing basic machines such as clocks, levers, and pulleys that would be necessary for the mechanization of agriculture and industry. In the seventeenth and eighteenth centuries, Elman shows Europeans still sought from the Chinese their secrets of producing silk, fine textiles, and porcelain, as well as large-scale tea cultivation. Chinese literati borrowed in turn new algebraic notations of Hindu-Arabic origin, Tycho's cosmology, Euclidian geometry, and various computational advances. Since the middle of the nineteenth century, imperial reformers, early Republicans, Guomindang party cadres, and Chinese Communists have all prioritized science and technology. In this book, Elman gives a nuanced account of the ways in which native Chinese science evolved over four centuries under the influence of both Jesuit and Protestant missionaries. In the end, he argues the Chinese produced modern science on their own terms.

The Moral Imagination John Paul Lederach, 2010 John Paul Lederach's work in the field of conciliation and mediation is internationally recognized. He has provided consultation, training, and direct mediation in a range of situations, from the Miskito-Sandinista conflict in Nicaragua to Somalia, Northern Ireland, Tajikistan, and the Philippines. His influential 1997 book *Building Peace* has become a classic in the discipline. In this book, Lederach poses the question: How do we transcend the cycles of violence that bewitch our human community while still living in them? Peacebuilding, in his view, is both a learned skill and an art. Finding this art, he says, requires a worldview shift. Conflict professionals must envision their work as a creative act, an exercise of what Lederach terms the moral imagination. This imagination must, however, emerge from and speak to the hard realities of human affairs. The peacebuilder must have one foot in what is and one foot beyond what exists. The book is organized around four guiding stories that point to the moral imagination but are incomplete. Lederach seeks to understand what happened in these individual cases and how they are relevant to large-scale change. His purpose is not to propose a grand new theory. Instead, he wishes to stay close to the messiness of real processes and change and to recognize the serendipitous nature of the discoveries and insights that emerge along the way. Overwhelmed, the equally important creative process. Like most professional peacemakers, Lederach sees his work as a religious vocation. Lederach meditates on his own calling and on the spirituality that moves ordinary people to reject violence and seek reconciliation. Drawing on his twenty-five years of experience in the field, he explores the evolution of his understanding of peacebuilding and points the way toward the future of the art. http://www.loc.gov/catdir/enhancements/fy0616/2004011794_d.html
