This book can be described as 1/3 trading psychology, 1/3 risk management and 1/3 technical analysis. My early days of trading were filled with frustration, confusion and constant losses. After making some of the same mistakes over and over again I being to adapt and learned a few tricks to minimize my losses. As I began passing these tricks on to my fellow traders through my twitter account and blog (chedstrading.blogspot.com) it launched me on a path of learning and teaching. With enough time that path lead to dedicated studies of Japanese candlesticks and classical charting, and ultimately CMT certification.My career and brand have been built on "helping new traders avoid my old mistakes", and this book is a natural extension of those efforts. This book is also a natural extension of my "Complete Beginners Guide to Trading" that I wrote back in 2017 when I was undergoing chemotherapy for lymphoma. I subsequently beat my cancer and wrote a book about that experience, and have since continued to grow in my journey as a trader and teacher. Building on my years of work with my twitter account, learning blog and various other writings on trading subjects, I am happy to now bring together in one place all those bits and pieces that have helped to make me a successful trader. I have personally made every single mistake mentioned in this book multiple times and therefore can speak from the heart, which I hope makes each lesson a little bit easier to learn. Thank you for reading and best of luck in your trading journey. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-geniuses everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In Grit, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better" (The New York Times Book Review). Among Grit's most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, Grit is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is "a fascinating tour of the psychological research on success" (The Wall Street Journal). This text is intended for a 1-semester CS1 course sequence. The Brief Version contains the first 18 chapters of the Comprehensive Version. The first 13 chapters are appropriate for preparing the AP Computer Science exam. For courses in Java Programming. Have you ever noticed that we tend to compartmentalize when teaching our children? In real life, there aren't artificial barriers between "subjects." In driving a car, you see and read road signs, read maps, and count miles. It has become quite clear that there is an abundance of math curriculums available that are nothing but monotonous drill sheets dressed up in pretty colors. Pretty colors do not make a living book. Based on a true incident that happened to one of the author's ancestors, Katie's Trunk gives an unusual and arresting glimpse of the beginnings of the American Revolution. Katie could feel it in the air—something was wrong. Neighbors didn't speak to each other anymore, and someone even hissed "Tory!" at her. All around Katie, men were arming themselves for war. Then one day it happened—the rebels came! Katie's father told the family to hide in the woods. At first Katie obeyed, but as she crouched in the underbrush she got mad and ran back to defend her home. It wasn't right for people to treat one another this way.
