David Ross Williams, 1995-01-01 **Eloquent Science** David Schultz, 2013-01-16 Mary Grace Soccio My writing could not please this kindhearted woman no matter how hard I tried Although Gifed and Talented seventh grade math posed no problem for me the same was not true for Mrs Soccio s English class I was frustrated that my first assignment only netted me a C I worked harder making re sion afer revision a concept I had never really put much faith in before At last I produced an essay that seemed the apex of what I was capable of wr ing Although the topic of that essay is now lost to my memory the grade I received was not a B Te best I could do was a B Te realization sank in that maybe I was not such a good writer In those days my youthful hubris did not understand about t apacity bui ing In other words being challenged would result in my intellectual growth an academic restatement of Nietzsche s What does not destroy me makes me stronger Consequently I asked to be withdrawn from Gifed and Talented English in the eighth grade *From Virgin Land to Disney World* , 2016-08-22 With the publication in English in 1930 of Civilization and its Discontents and its thesis that instinct and ultimately nature had been and must be forever subordinated in order that civilization might thrive and endure Freud contributed what some contemporaries saw to the central debate of his era a debate which had long preoccupied both official American pundits and the American populace at large At the beginning of the new Millennium evidence abounds that an American debate still rages over the meaning of nature the rightful weight of instinct and the status of civilization The Millennium itself has appeared in popular and official discourses as an appropriate marker of an age in which nature is close to the edge of radical extinction and has also become more and more unreliable as a paradigm for representation and debate At the same time the contemporary tailoring of nature to postmodern needs and expectations inevitably reveals the conceptual difficulty of any possible simple opposition between nature and culture as if they were clearly distinguishable domains If nature then can clearly be seen as a discursive concept it may also be a timeless concept insofar that it has been shaped created and used at all times Every epoch age and era had its own nature with myth history

and ideology as its dominant shaping forces From the Frontier to Cyberia nature has been suffering the agony of the real resurfacing in discursive strategies and demonstrating a powerful impact on American society culture and self definition The essays in this collection speak critically of the natural and examine the American debate in the many guises it has assumed over the last century within the context of major critical approaches psychoanalytical concepts and postmodern theorizing
